

# Illinois Traffic and Pedestrian Stop Study

2019 ANNUAL REPORT: TRAFFIC STOPS

## Part II: Detailed Tables

Prepared for the Illinois Department of Transportation

By

The Mountain-Whisper-Light Statistics

In Cooperation with SC-B Consulting, Inc.

## **Acknowledgements**

The Mountain-Whisper-Light Statistics and SC-B Consulting, Inc. gratefully acknowledge the contributions of Jessica Keldermans, Bureau Chief, Bureau of Data Collection, Illinois Department of Transportation, and her associates at the Bureau of Data Collection. We are also grateful to the law enforcement agencies and their staff for their diligence and patience in collecting and processing the data used in this study.

## *Traffic Stops: Agency Tables*

The following section comprises tables summarizing 2019 Illinois traffic stop data.

A summary of Illinois statewide traffic stops appears first followed by 1) summaries for each agency in alphabetical order, 2) a table listing median durations of traffic stops by agency, 3) a table listing agencies that reported zero stops, 4) a table listing agencies that reported incomplete data, and 5) a table listing non-compliant agencies.

Each law enforcement agency that provided complete stops data for 2019 was provided an opportunity to review their tables and provide feedback prior to the study team's completion of this final report. The feedback was helpful and has led to some improvements in the report content and the tables, for which the study team is grateful. Some agencies have offered comments on their earlier version of the tables. An agency's comments appear in this document following their statistical tables.

Readers are urged to read *Part I* of this report, the *Executive Summary*, a separate document. *Part I* is a guide to the use of the tables and explains how all the numbers were derived. *Part I* also includes a technical appendix, which may be of interest to those who seek a deeper understanding of the methodology.

Summary of Traffic Stops for 2019 - ILLINOIS STATEWIDE RESULTS						
	White	Black or African American	Hispanic or Latino	Asian	American Indian or Alaska Native	Native Hawaiian or Other Pacific Islander
<b>Panel: 1 Summary of Traffic Stops, Rates, and Rate Ratios with 95% Confidence Intervals. Total stops: 2,483,904. Total benchmark population: 9,024,740.</b>						
Stops	1,251,219	734,899	398,413	79,921	13,678	5,774
Benchmark	5,853,518	1,260,534	1,387,742	508,855	11,781	2,310
Stop Rate (95% Confidence Interval)	0.2138 (0.2134 - 0.2141)	0.583 (0.582 - 0.584)	0.287 (0.286 - 0.288)	0.157 (0.156 - 0.158)	1.16 (1.14 - 1.18)	2.5 (2.4 - 2.6)

Traffic 13558      HUNTLEY POLICE      2019    It should be known that Huntley is located right off of a major expressway I 90, and has a State Route, RT 47 leading through town and is also a thoroughfare to Wisconsin especially on weekends. We also have a large industrial park that may impact our driving population statistics.

Traffic 13991 ILLINOIS STATE POLICE 2019 The Illinois State Police (ISP) remains committed to make Illinois roadways safe for all drivers. Through traffic stops and consent searches, Illinois State Troopers are taking illegal weapons and other illegal substances off of the roads and highways of Illinois, making travel safer for everyone.

The ISP continues to build on the progress we have made since the implementation of the Traffic Stop Statistical Study (TSSS) in 2004 and continues to evaluate the data captured in the TSSS.

ISP's training focus remains on using the data to educate and train officers to be aware of their actions and ensure all drivers are treated equitably. The ISP remains committed to public safety and ensuring all drivers understand their rights.

Finally, Understanding Perceptions of Biased-Based Policing will continue to be mandatory training for all new officers and be refreshed on an annual basis during in-service training.

Traffic 13478      LAKE BLUFF POLICE      2019      Thank you for the opportunity to provide feedback for the 2019 traffic/pedestrian stop data information. My team and I have been able to review the material that has been provided. Based on our analysis of the data, we feel there is a few concerns that should be noted. First, we not fully understanding where the benchmark numbers are being drawn from. Based on our subjective perspective, they seem off. Second, in panel 3, the verbal warnings and written warnings have been reversed. However, the overall number of traffic stops is relatively close to our data. Third, we are trying to understand the “Rate ratio vs White”. This appears to be far different from previous years data methodology. We are not sure how we compare what was from previous years to the current data sets for 2019. We, as a CALEA agency, produce a yearly report reflecting this data. Now, the challenge to try and explain what was before compared to now is not as clear. Is there a reason that this change was made or was it arbitrary based on the new service provider for the report? We hope that these concerns will be addressed so that we, as an agency, are able to accuracy analyze our data and determine if there are any specific areas that may consider further investigation.

Traffic 13481      LAKE FOREST POLICE    2019    Overall, it is disappointing to see such a radical change in methodology from previous reports. These changes essentially make year-to-year comparisons impossible, and it seems unwise to cast aside 15 years of work. The benchmarks in panel 1 are significantly outside the census data on Lake County, if that is still our comparable territory. Given the large number of drivers we see from Cook, McHenry, and Kenosha counties, Lake County is probably not the proper benchmark area. In panel 2, we are unsure why the second largest cause for stops, equipment violations, has been removed. There are some (probably insignificant) minor data errors in the fields, and one much larger error. In Panel 3, the data in the row for "Verbal Warnings" has been exchanged for the data in the row for "Written Warning." Please correct this on your final product, thank you.

Traffic 13568                      NORMAL POLICE                      2019    The statistical analysis of the traffic stop data published by IDOT continues to ignore the longstanding issue this Department has with the analysis, specifically being that the diversity of the actual driving community is not taken in to account. The analysts are provided demographic information for drivers in the data collection entries provided to IDOT. Review of this information for the Town of Normal indicates that only 25.23% of the actual traffic stops were conducted on residents of the Town of Normal, according to Secretary of State data provided by motorists at the time of the stop. 26.32% of the motorists stopped by this Department were residents of the City of Bloomington, and 48.45% of recorded traffic stops for this agency were conducted on residents with addresses which were outside of the Bloomington/Normal area. This data is significant given that nearly 75% of the stops reported were conducted on motorists who reside outside of the census area used to determine benchmark driving populations for this study and whose driver's license from the Illinois Secretary of State do not contain a residence in this community. The benchmark populations assigned to minorities related to the Town of Normal do not accurately depict the culturally diverse driving population in this community. There are several large employers, as well as multiple colleges and universities all bringing large numbers of commuters and temporary residents to the area. This is clearly illustrated through the analysis conducted on the recorded address of drivers stopped in 2019, with an overwhelming majority of stops effected on drivers with a permanent residence documented outside of the Town of Normal.

Traffic 13019                      NORTHLAKE POLICE      2019    As in years past, the Northlake Police Department is committed to fair and impartial traffic enforcement. Our officers fully support the purpose of Pedestrian and Traffic Stop Data collection and stand against race profiling. We have pointed out in the past, Northlake has proactively developed a secondary monitoring system to track officer stop activity which is reviewed by line supervisors multiple times a year.

As mentioned in previous years, our City shares borders and several major roadways with jurisdictions some of which have a 90% Estimated Minority Driving Population. We have also noted IDOT has estimated many thousands of vehicles travel through roadways in Northlake on any given day. Because Northlake is a destination for shopping and commerce, drivers from high EMDP communities commute to or through the City of Northlake. We welcome all travelers.

Our police department agrees with IDOT that limitations exists when using purely census driven data. For this year's traffic study, IDOT points out benchmarks have errors. "Boundaries of the cities and counties may not closely fit the actual area of residence of drivers and pedestrians who might be encountered in a specific community". We thank IDOT for acknowledging a city no more than one square mile like Northlake, has a truly diverse driving population on any given day of the week. Holding Northlake to a static census count from over 10 years ago has never provide the full scope of our public interactions. The newer stop data interpretations implemented by IDOT should be very helpful tool for police departments as we move forward to provide fair and impartial policing.

Traffic 13451                      OSWEGO POLICE                      2019    The Village of Oswego is located in the northeast corner of Kendall County and abuts Kane, DuPage and Will Counties. The Oswego Police Department, in their efforts to make appropriate measures of their traffic stop data, considers their motoring public to be more closely tied to the demographics of Community Unit School District 308 and analyzes their traffic stop data against the school district's demographics rather than the demographics of Kendall County, which is being used for calculations in this report. The school district has two high schools, both of which are located in Oswego, as are 55% of the district's feeder schools. Oswego, along with five other surrounding communities, including some outside of Kendall County, feed into the unit school district and those residents account for 75% all traffic stops; Oswego residents account for 31%. Data from traffic accidents indicates 84% of the involved drivers are residents from these communities as well.

Traffic 13006                      PARK FOREST POLICE 2019    The Park Forest Police Department views the Illinois Traffic & Pedestrian Stop Studies as instrumental in monitoring and ensuring procedurally just policing in Illinois, and we are committed to policing in a way that is both transparent and equitable. However, a failure of the data provided in the study is the benchmark, which is not reflective of the driving population of our region. As an example, the population of Park Forest and its surrounding communities (University Park, Chicago Heights, Matteson, Olympia Fields, and Richton Park) combined is approximately 20% white, approximately 70% black or African American, with the remaining 10% of other minority demographic groups. Additionally, the high school district which serves the majority of Park Forest residents and residents of several surrounding communities is District 227. The student body population of that high school district in 2018 was 2.6% white, with the remaining 97.4% of the student body of a minority racial demographic, further indicating that the regional racial demographic make-up is much different than the benchmark provided. The benchmark indicates a driving population of approximately 50% white motorists, which is problematic when trying to gain a true understanding of the rate at which motorists of different racial demographic groups are stopped. We have previously communicated our request to have the benchmark data reviewed for accuracy due to the unique demographic, commercial, and transportation factors of the south suburban Cook County region and continue to do so.

Traffic 13653 \_\_\_\_\_ PETERSBURG POLICE 2019 There is an error with our traffic stop summary. We did not have any written citations that I am aware of. There may of been a few where an officer clicked the wrong box closing his call. However, I reviewed the several months of the data I uploaded to your site and it showed as verbal warnings and no written citations. I also checked a few random stops in your system and they showed verbal warning as well. I'm not sure where the disconnect happened but if this could be fixed it would be greatly appreciated. Thank you

Traffic 13922                      STERLING POLICE                      2019    I re-calculated/checked panel 3 for all race categories. I added up the percentages for each category per race. Verbal Warning, Written Warning, and Citations. All totaled 100% except for Black or African American. That one totaled 105%. I went back through and recalculated the percentages based on the total number of stops for that particular race and the total number of verbal warnings, written warnings, and citations. I came up with the following calculations (changes): Verbal Warnings- 58% instead of analysis finding of 60%; Written Warnings- 15%, no change from analysis; and Citations- 27%, instead of analysis finding of 30%. I rechecked the calculations on the other races and they were correct. I also calculated under panel 4, White, Contraband Found, to be 22% and not 20% as the analysis indicates. I calculated under panel 4, Hispanic, Contraband Found, to be 27% and not 30% as the analysis indicates. Of course re-check the math.

Traffic 13100      URBANA POLICE      2019    The Urbana Police Department recognizes the significant methodological difference from previous years' reports in computing and reporting the racial disparity. The results of these calculations are not comparable to previous years' reports issued by the state.
