Provisions of Public Act 93-0484

Public Act 93-0484 amended the Illinois Act on the Aging to state: "Every citizen of the State of Illinois who qualifies for home-delivered meals under the federal Older Americans Act shall be provided services, subject to appropriation." These amendments also require the Illinois Department on Aging to file a home delivered meal report with the General Assembly each year. At a minimum, the report must include the following information:

- Estimates, by county, of citizens denied service due to insufficient funds during the preceding fiscal year and the potential impact on service delivery of any additional funds appropriated for the current fiscal year (*Outlined on Pages 26 - 29 of the FY 2021 Home Delivered Meal Report*).
- Estimates of additional funds needed to permit the full funding of the program and the statewide provision of services in the next fiscal year, including staffing and equipment needed to prepare and deliver meals. (*Outlined on Page 30 - 31 of the FY 2021 Home Delivered Meal Report*).
- Geographic areas and special populations unserved and underserved in the preceding fiscal year (*Outlined on Pages 38 - 42 of the FY 2021 Home Delivered Meal Report*).
- Recommendations for increasing the amount of federal funding captured for the program. (*Outlined on Page 92 of the FY 2021 Home Delivered Meal Report*).
- Any other information needed to assist the General Assembly and the Illinois Council on Aging in developing a plan to address unserved and underserved areas of the State (*Outlined throughout the FY 2021 Home Delivered Meal Report*).

The Aging Network in Illinois

The Illinois Department on Aging

The Illinois Department on Aging was created by the State Legislature in 1973 for the purpose of improving the quality of life for Illinois' senior citizens by coordinating programs and services enabling older adults to preserve their independence for as long as possible. It is the single state agency in Illinois authorized to receive and dispense Federal Older Americans Act funds, as well as specific state funds, through Area Agencies on Aging and community-based service providers.

The legislative mandate of the Illinois Department on Aging is to provide a comprehensive and coordinated service system for the State's approximately 2,800,000 older adults, giving high priority to those in greatest need; to conduct studies and research into the needs and problems of the elderly; and to ensure participation by older adults in the planning and operation of all phases of the system. The mission of the Illinois Department on Aging is to serve and advocate for older Illinoisans and their caregivers by administering quality and culturally appropriate programs that promote partnerships and encourage independence, dignity, and quality of life. In fulfilling its mission, the Illinois Department on Aging responds to the dynamic needs of society's aging population through a variety of activities including:

- Planning, implementing, and monitoring integrated service systems;
- Coordinating and assisting the efforts of local community agencies;
- Advocating for the needs of the State's elderly population; and
- Cooperating with federal, state, local, and other agencies of government in developing programs and initiatives.

Area Agencies on Aging

The State of Illinois is divided into 13 Planning and Service Areas (PSAs). There is one Area Agency on Aging designated by the Illinois Department on Aging located within each PSA. In Illinois, 12 not-for-profit agencies and one unit of local government serve as Area Agencies on Aging. Each Area Agency on Aging is responsible for planning, coordinating, and advocating for the development of a comprehensive and coordinated system of services for the elderly and caregivers within the boundaries of the individual PSAs. For additional information on PSAs and Area Agency on Aging locations, refer to pages 22 and 23 of this report.

The Illinois Department on Aging, in accordance with the Older Americans Act, has decentralized the planning process by delegating planning responsibilities to the Area Agencies on Aging. This assures that programs developed by, and services funded by, the Area Agencies on Aging are integrated into the three-year planning cycle followed by the Illinois Department on Aging. This cycle begins with an assessment of the needs of local older adults, family caregivers and grandparents raising grandchildren for services. Through a process of public hearings, surveys, research, and the assistance of the Area Agencies' advisory councils, these needs are ranked in order of importance and matched with available resources.

The proposed funding distribution, budget, and other planning information are then incorporated into an Area Plan on Aging following a format prepared by the Illinois Department on Aging. Also included in the plan is an outline of proposed Area Agency on Aging activities for the coming years. Following public hearings on the proposed Area Plan, the Area Plan is submitted to the Illinois Department on Aging for review and approval. Area Agencies on Aging are permitted to amend their Area Plans annually in response to changing needs, priorities and funds available. Federal Older Americans Act and State funds are allocated to the Area Agencies on Aging upon approval of the Area Plan or Area Plan annual amendments by the Illinois Department on Aging.

The Area Agencies on Aging in Illinois are not, as a rule, direct service providers. They contract with local providers for services that have been identified as needs through the planning process. The Area Agencies on Aging are responsible for monitoring, evaluating, planning for services, and providing technical assistance as needed. In addition, the Area Agencies on Aging function as advocates for older adults and are the primary disseminators of information relating to aging issues within their respective Planning and Service Areas.

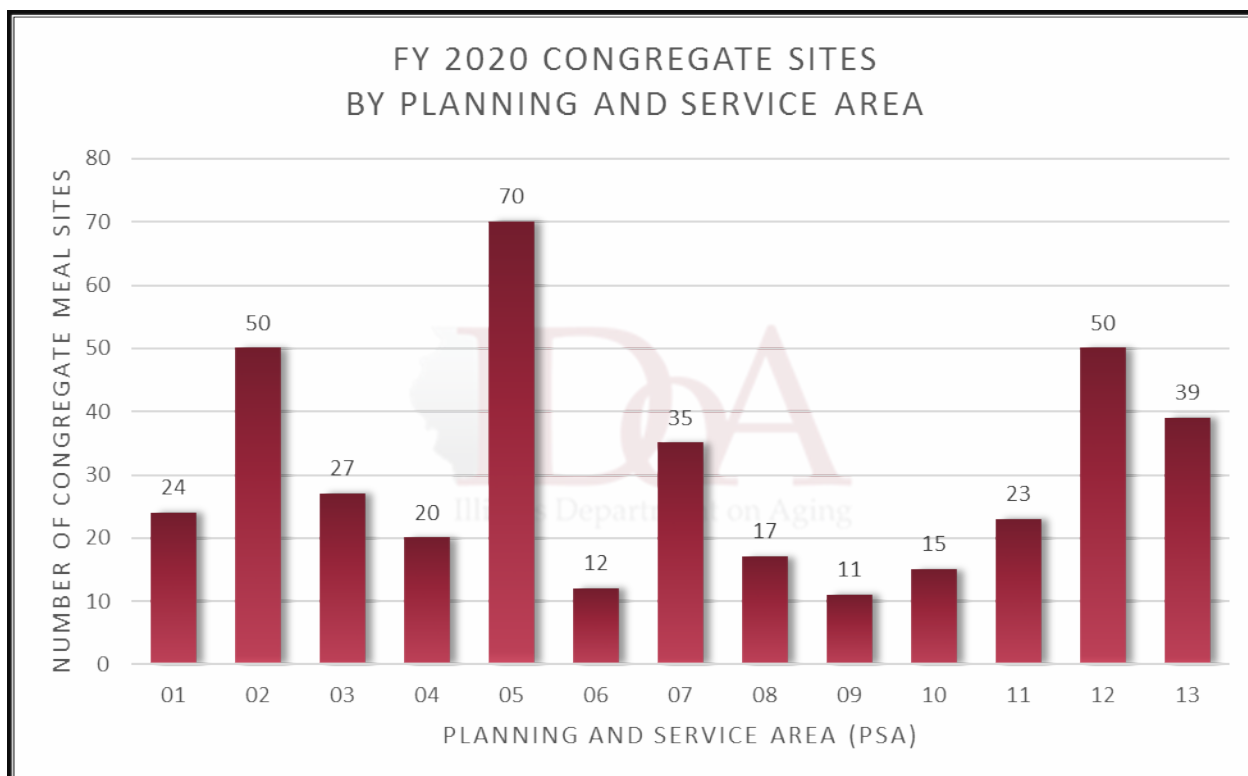

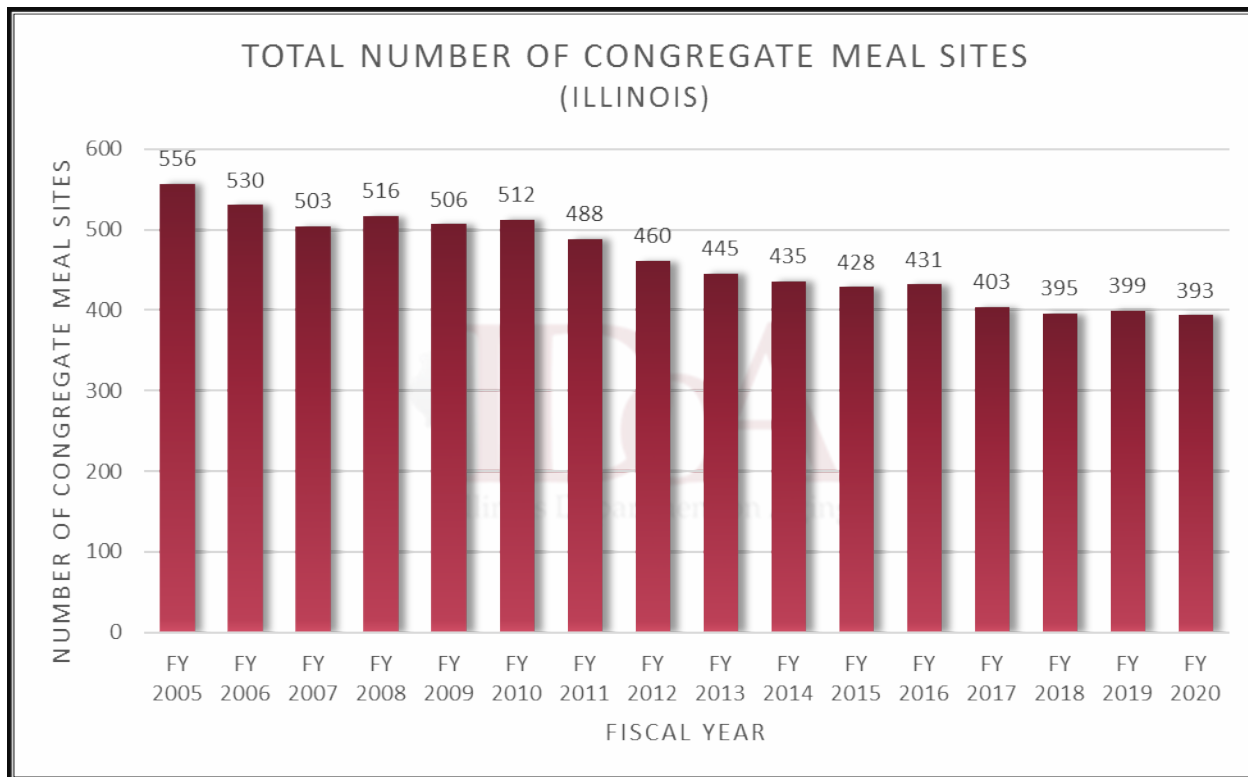

Service Providers

Community-based service providers also represent a key segment of the Aging Network in Illinois because they provide the programs and direct services to older adults and their caregivers.

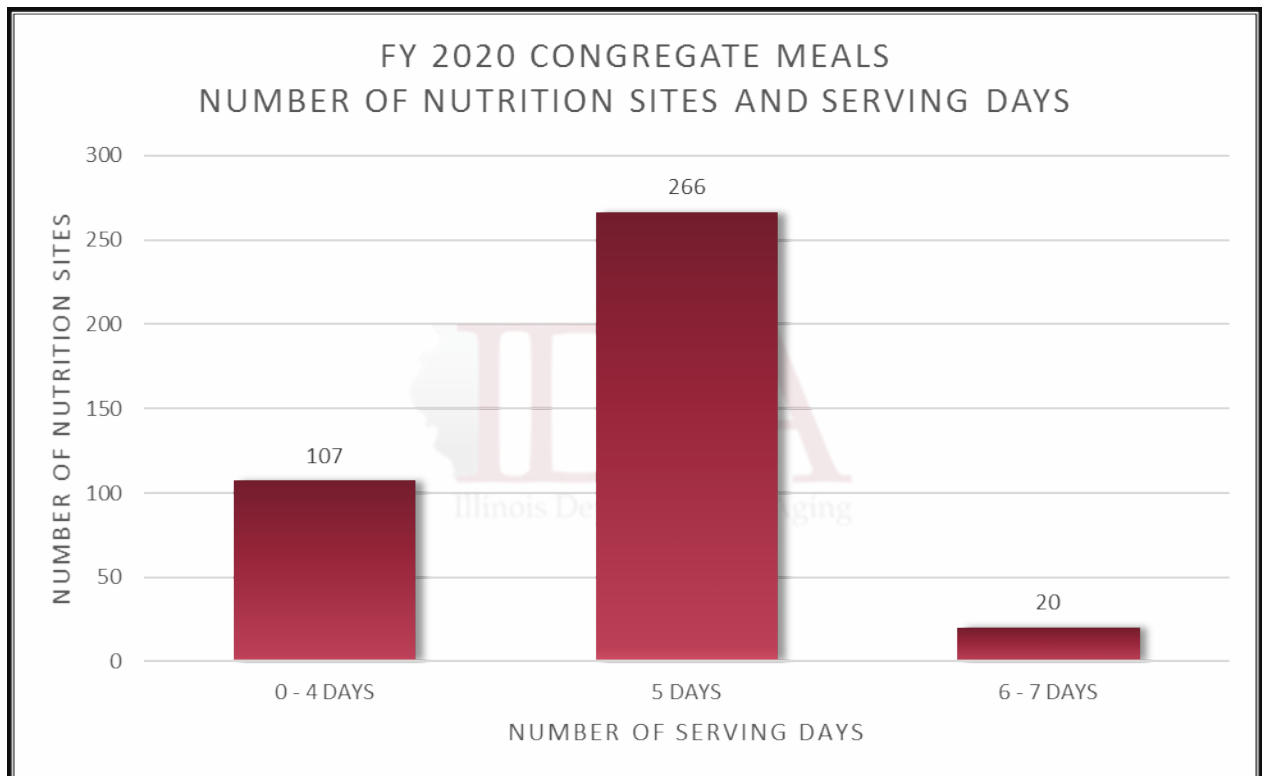

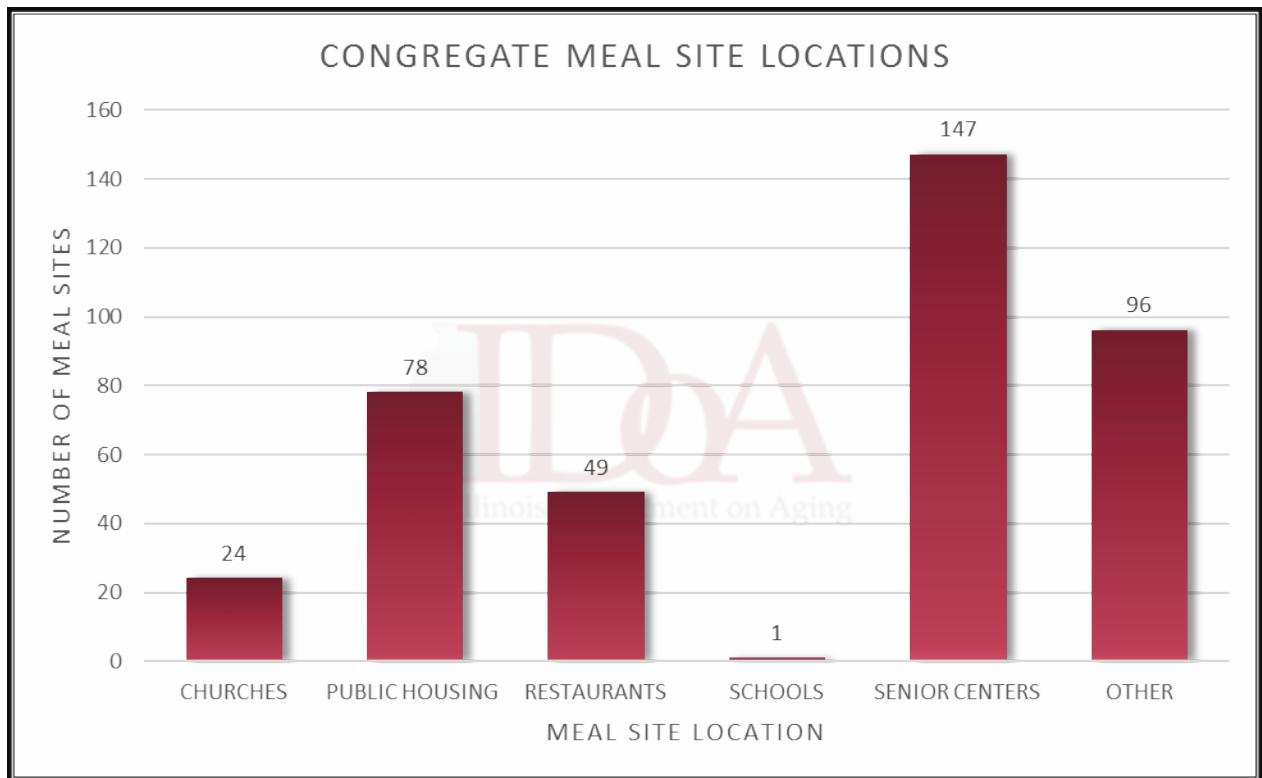

The direct service delivery system consists of agencies funded with Title III and State funds through Area Agencies on Aging and funded through the Illinois Department on Aging with Community Care Program funds. Many agencies receive both Title III and Community Care Program funding. The Community Care Program providers offer case management, in-home service, adult day service, emergency home response, automated medication dispenser, and other demonstration projects. Title III providers offer a wide range of home and community-based services, including home delivered meals.

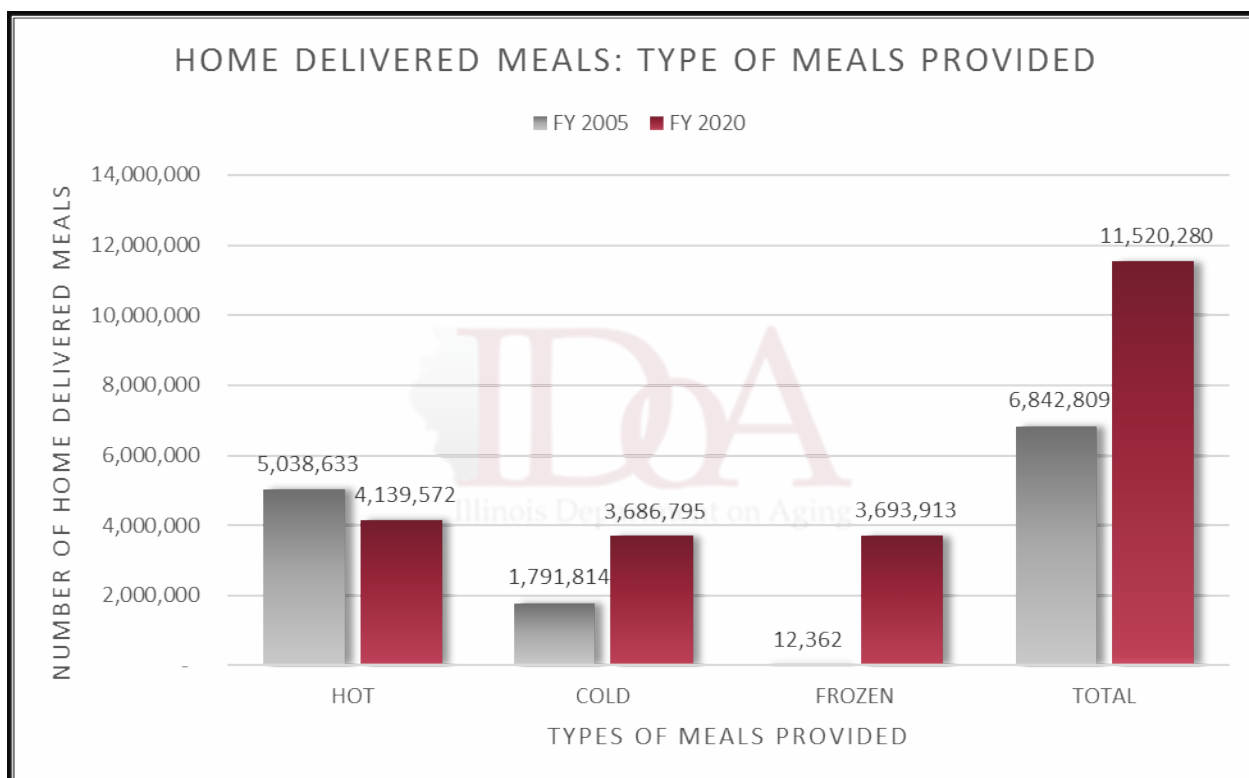

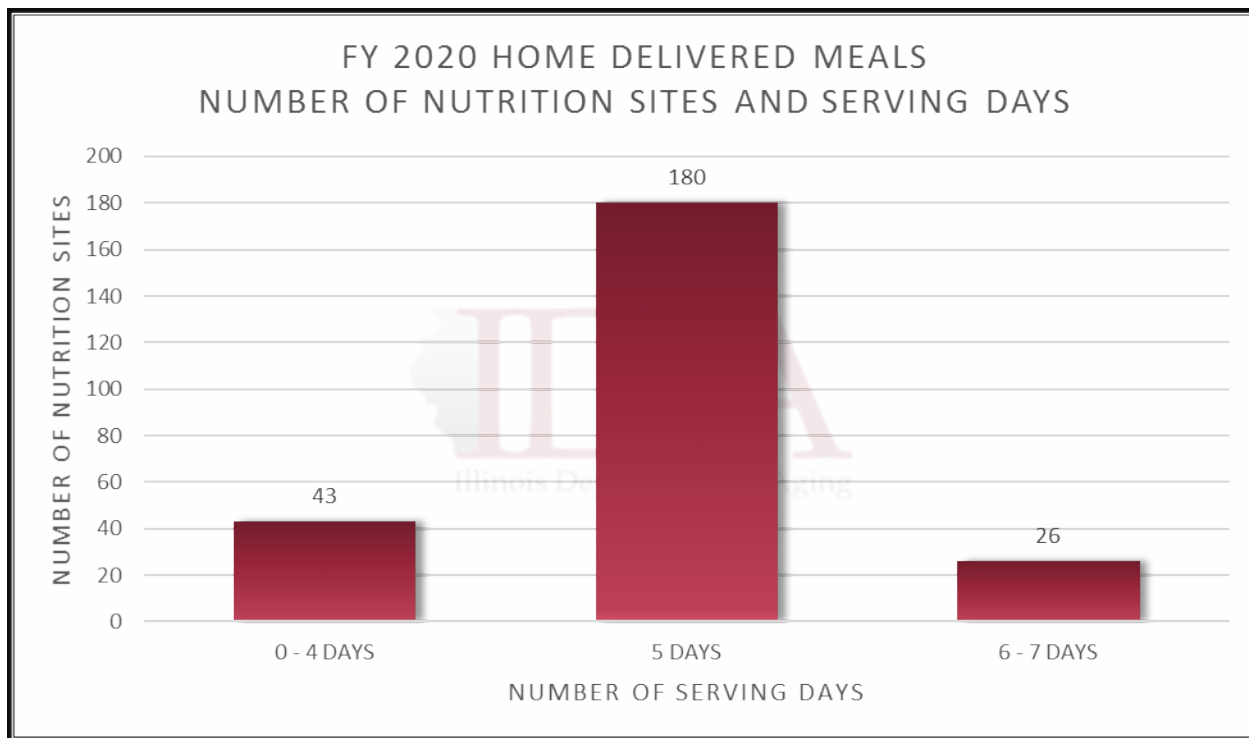

During FY 2021, it is estimated that more than 635,088 older adults, family caregivers and grandparents raising grandchildren will be served by nutrition and social service agencies under Title III of the Older Americans Act. These services include information and assistance, outreach, congregate meals, home delivered meals, transportation, legal assistance, respite care, chore, residential repair, senior center activities and health promotion and disease prevention.

In FY 2021, more than 1.4 million congregate meals will be served to approximately 55,676 older adults at more than 373 meal sites located throughout the State. Approximately 52,807 homebound elderly will receive an estimated 8.3 million home delivered meals. The following pages outline additional information about nutrition programs in Illinois. These projections are based on the FY 2021 Area Plans submitted by the Area Agencies on Aging. Service projections may need to be revised due to when final federal appropriations are finalized.

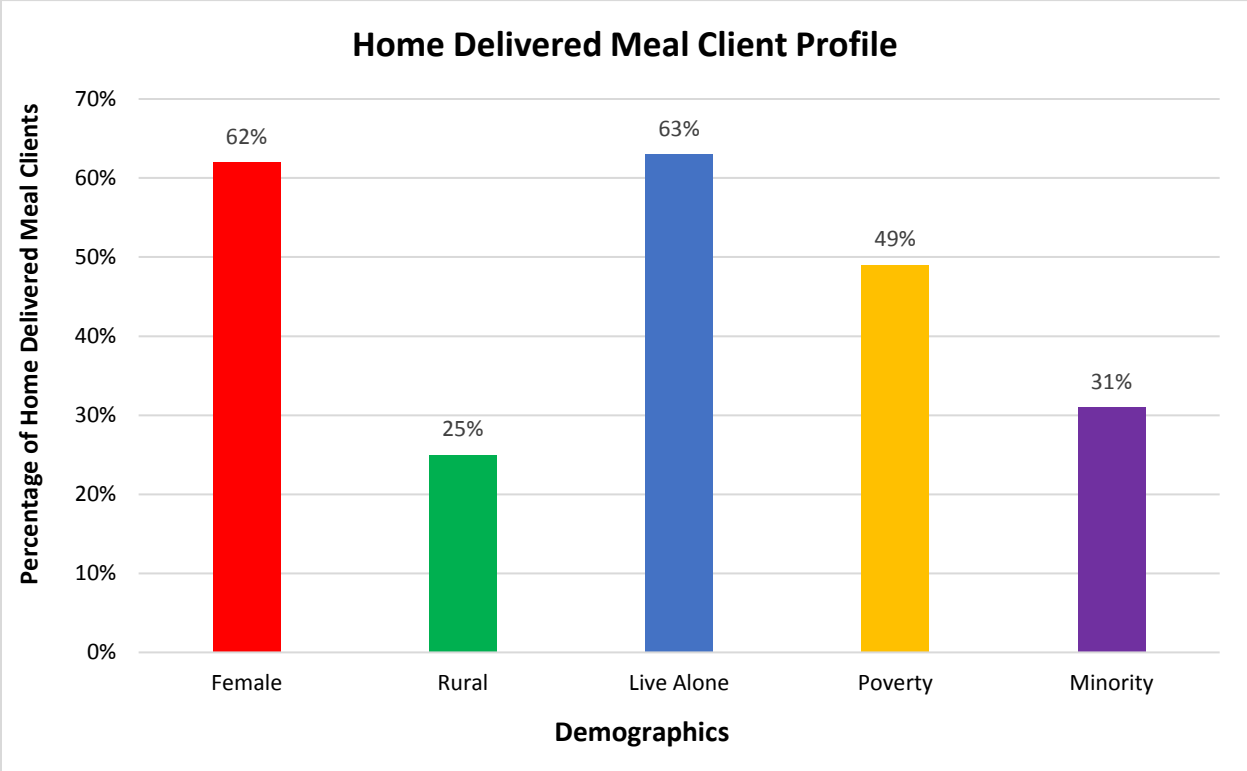

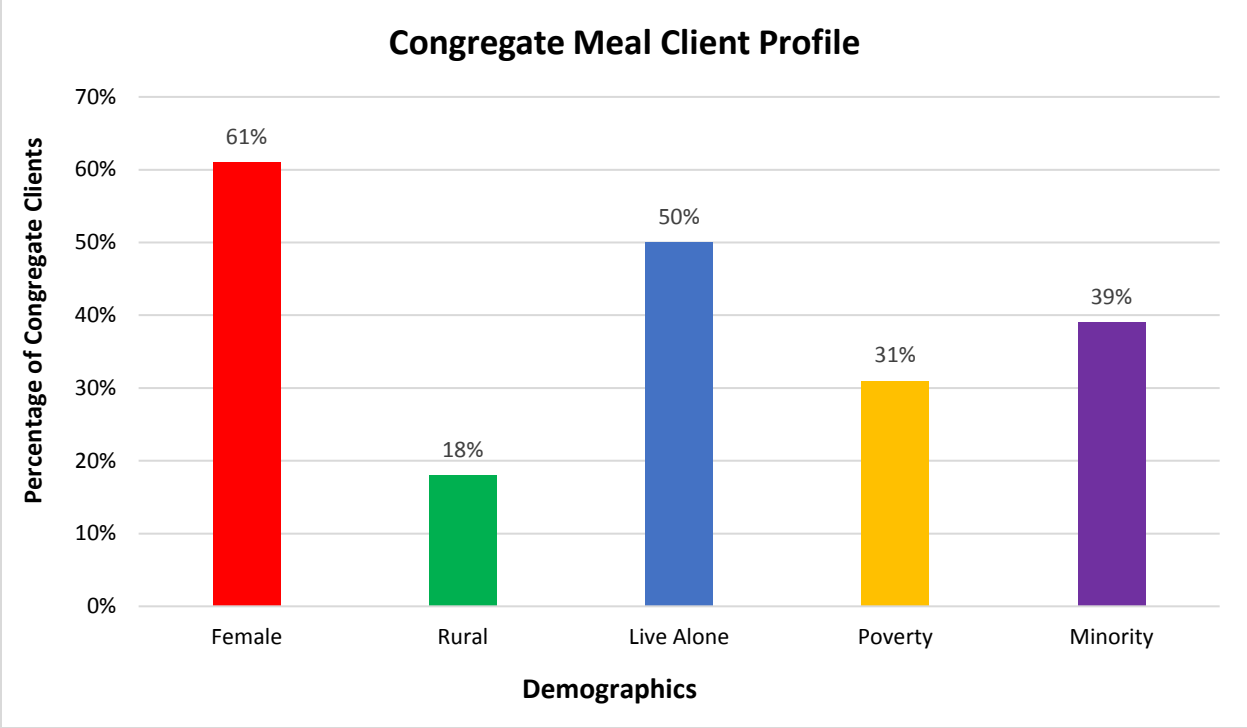

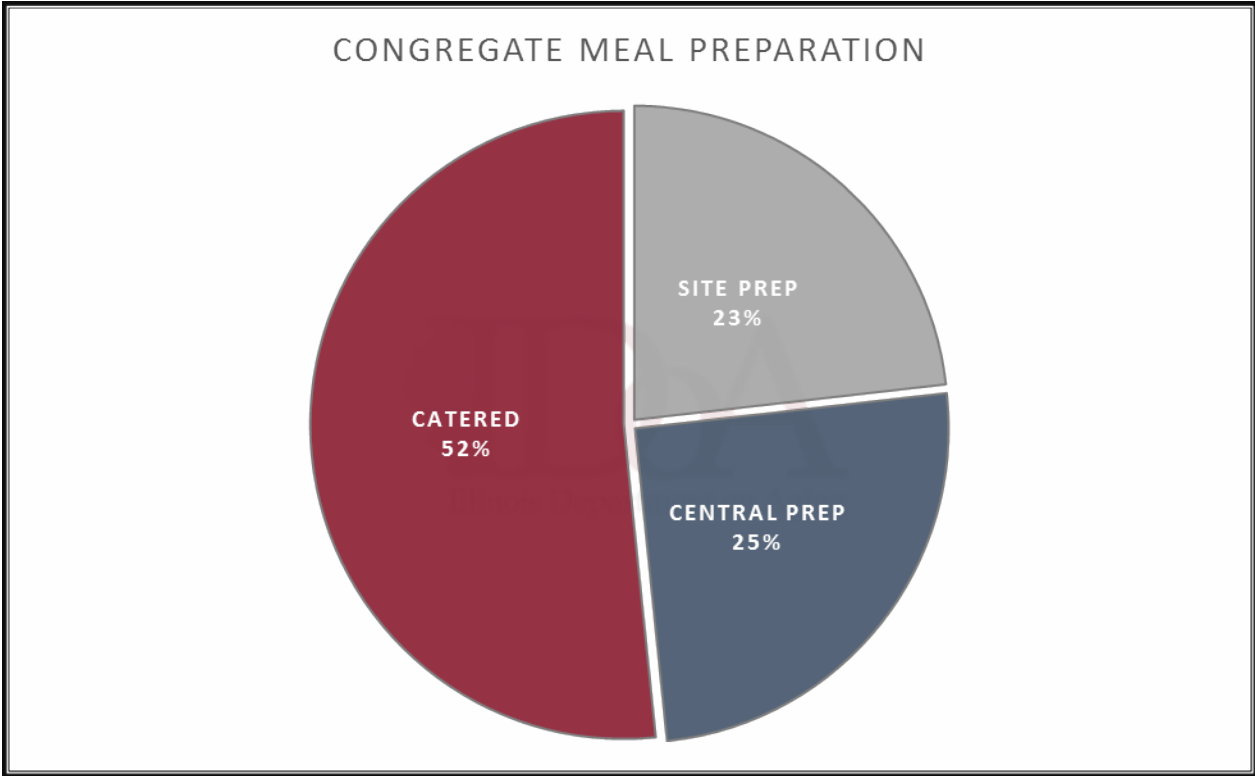

Note: Total Number of Congregate Meal Sites in Illinois include those open from the period of October 1, 2019 to February 29, 2020, which lead up to the temporary suspension of Congregate Dining Sites due to the pandemic.

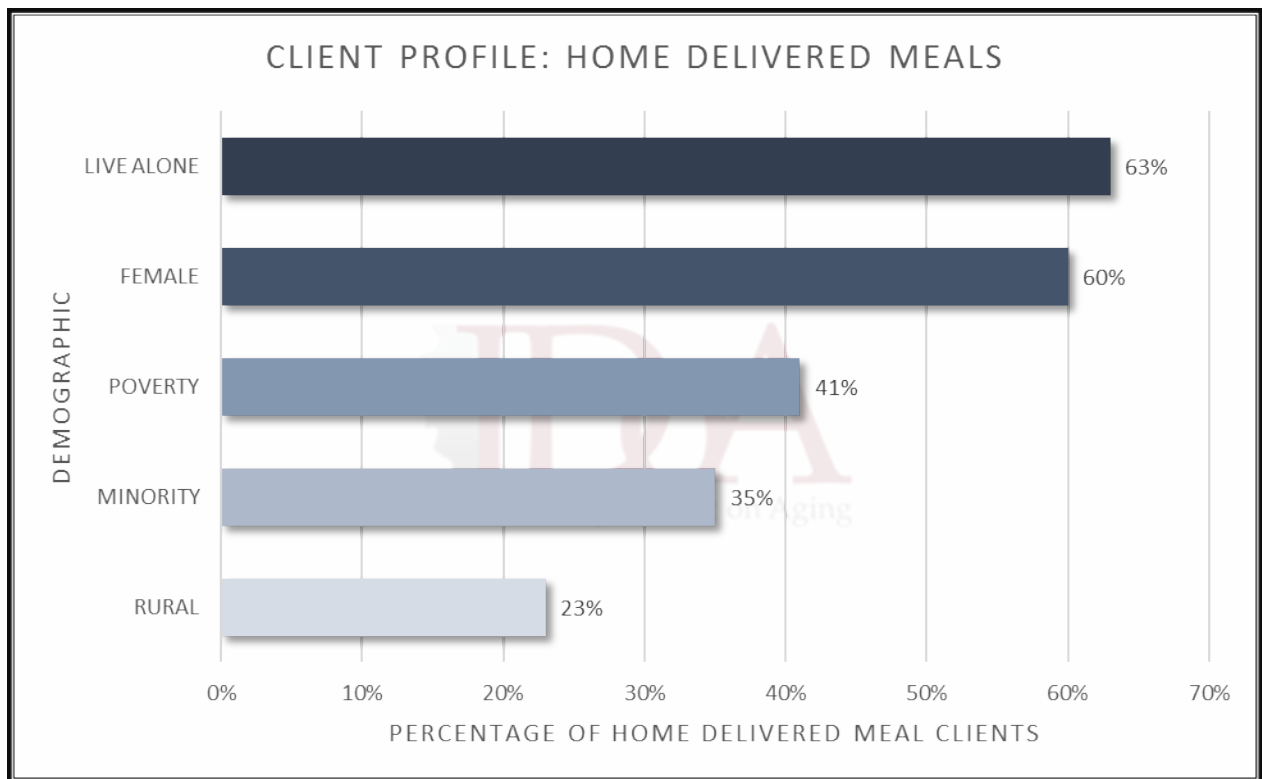

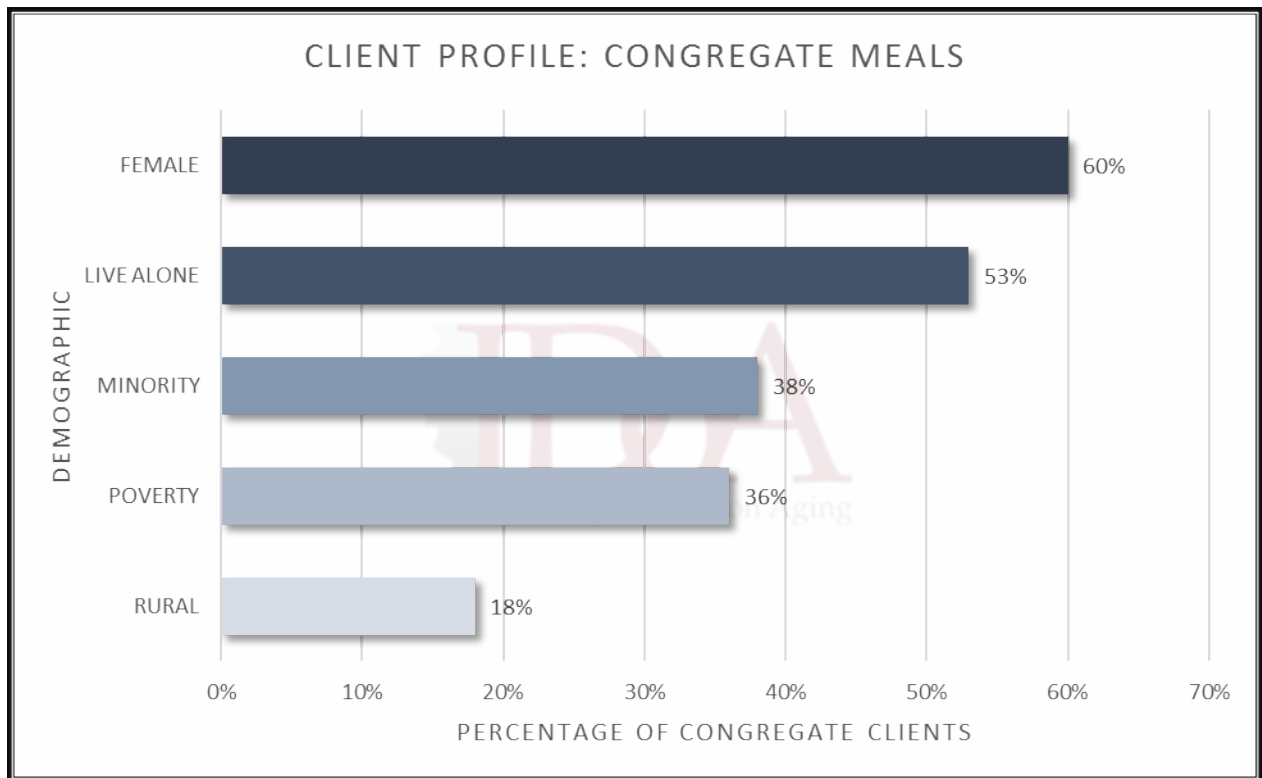

Note: The Department temporarily suspended Congregate Meal services in March 2020 in an effort to stop the spread of COVID-19 (Coronavirus) pandemic. As a result, services provided under the Home Delivered Meals program began to increase. The number of cold and frozen meals increased in an effort provide meals to older adults in a contactless manner and to reduce the risk of spreading the virus.

Note: Catered includes meals prepared at an offsite facility and are then brought to a Congregate meal site. Site Prep includes meals that are prepared on location where the Congregate meals are served. Central Prep includes meals that are prepared at a central location and then delivered to satellite locations/meal sites.

Note: 2019 Nutrition Service Provider Survey conducted by Illinois Department on Aging

Statewide Frequency that Nutrition Education is Provided to Congregate and Home Delivered Meal Participants

Note: 2019 Nutrition Service Provider Survey conducted by Illinois Department on Aging

Background and Analysis

With the aging of the U.S. population, increased attention has been directed to delivering health and related services to older adults in the community. Since adequate nutrition is critical to health, functioning, and the quality of life, the Elderly Nutrition Program is an important component of home and community-based services for older adults.

The Illinois Department on Aging's Elderly Nutrition Program provides grants to 13 Area Agencies on Aging and more than 100 nutrition service providers to support nutrition services to older adults throughout Illinois. The Elderly Nutrition Program, authorized under Title III of the Older Americans Act, is intended to improve the dietary intakes of older adults. Meals provided under the Older Americans Act must provide at least one-third of the daily-recommended Dietary Reference Intakes (DRIs) as established by the Food and Nutrition Board of the Institute of Medicine of the National Academy of Sciences, if the older adult is offered one meal per day.

While there is no means test for participation in the Elderly Nutrition Program, services are targeted to older adults with the greatest economic or social need, with special attention given to low-income minority older individuals, older individuals with limited English proficiency, and older individuals residing in rural areas as required in the Older Americans Act. In addition, the State expanded this definition to include sexual orientation, gender identity, gender expression, and HIV status through Public Act 101-0325.

Many older adults cannot consistently obtain a nutritious diet. Older adults age 85+, minority older adults, older adults in greatest economic need, older adults who live alone, and individuals with chronic health conditions are at the highest risk of being malnourished. Food insecurity is having inadequate access to nutritious foods needed to maintain or live a healthy life. In 2017, 28.7% of the U.S. population that was considered food insecure were below the poverty line, 17.2% black, 16.3% Hispanic, 8.4% older adults aged 65 to 69 years old. In Illinois, 7.8% of seniors were considered food insecure (Ziliak & Gunderson, 2019).

Adequate nutrition is critical for healthy aging, the prevention or delay of chronic disease and disease-related disabilities and delay recovery from illnesses. The Aging Network's Nutrition Programs provide congregate and home delivered meals, link older adults to supportive services, decrease social isolation, and provide nutrition education to help decrease or manage chronic health conditions.

The COVID-19 (coronavirus) pandemic continues to have a significant impact on the congregate and home delivered meal programs in Illinois and nationwide. All congregate meal sites and activities were temporarily suspended on March 12, 2020 in Illinois to help decrease the risk of contracting the coronavirus.

In many cases, senior centers are also congregate meal sites, so they are not stand-alone centers. Many of the buildings are small and cannot accommodate social distancing, especially while seniors are picking up meals at these sites, so social gatherings cannot safely be held. When the weather permits, some senior centers conduct outdoor activities such as parking lot Bingo, movies, concerts, etc. They also check on clients at risk of social isolation by engaging in the Telephone Reassurance program, utilizing both volunteers and staff.

Virtual activities are also conducted such as: GetSetUp, a social and learning community designed for older adults, with classes available around the clock on every topic. Additionally, some Planning and Service Areas offer virtual exercise classes, concerts, and Memory Cafes, which seek to fill the void created by the closure of the congregate sites.

Agencies shifted to providing "grab-and-go" or pick-up options for their congregate meal participants and/or started providing home delivered meals to participants that were previously attending congregate meal sites for a nutritious meal and socialization. Frequently, nutrition providers have been told by congregate participants that they primarily attend the meal sites for social activities and companionship rather than the meal. These programs are even more important for older adults in combatting social isolation and loneliness due to prolonged social distancing related to COVID-19 (Armitage and Nellums, 2020).

Based on a Meals on Wheels America study funded by AARP, those who received daily-delivered meals experienced the greatest improvements in health and quality of life indicators over the study period compared to the other two groups (individuals who received frozen, weekly-delivered meals and the control group) (Thomas & Dosa, 2015).

The home delivered meal program serves the frail elderly in need of long-term support and those in need of short-term intervention due to illnesses. Based on the results of Administration on Aging national surveys, the typical home delivered meal client is an elderly woman age 75 and older who lives alone. She is functionally impaired and has three or more diagnosed chronic health conditions with an income at or below the poverty level. Ninety-one percent of home delivered meal clients report that the services allow them to remain in their homes (ACL, 2018).

As outlined on the following page, the congregate meal program provides older adults with a nutritional meal, social interaction as well as volunteer opportunities. However, participation in the congregate meal program has declined over the past 25 years. In FY 1992, the congregate meal program provided meals to more than 97,848 older adults. In FY 2021, the congregate meal program will provide meals to an estimated 55,676 older adults, which is a decline of 43 percent since FY 1992. This substantial decline in the number of congregate participants served in FY 2020 and FY 2021 is largely related to the COVID-19 (coronavirus) pandemic and the temporary suspension of congregate meal sites.

This decline in the number of older adults participating in the congregate meal program is also occurring throughout the nation. It is primarily due to younger older adults not participating in the congregate meal program for various reasons (e.g., lack of interest in group meal programs targeted for the elderly and more nutritional and service options in their communities).

In contrast, participation in the home delivered meal program has varied during the past 25 years. In FY 1992, the home delivered meal program provided meals to more than 33,449 older adults. The highest level of participation was in FY 2000 when over 50,100 individuals were served. This number gradually declined from FY 2000 to FY 2016 to just over 31,000 individuals. Since 2016, the number of individuals in the home delivered meal program has increased. In FY 2021, the home delivered meal program will provide meals to an estimated 52,807 older adults. This number is influenced by the increase in participation due to the COVID-19 pandemic and temporary closure of congregate meal sites.

There are still areas in Illinois that are not served by home delivered meal programs due to a lack of funding. Many of the current clients need more than 1 meal per day and weekend meals. The Elderly Nutrition Program cannot address most of these needs without additional funding. Additionally, the need for home delivered meals will continue to grow as the number of older adults increases, particularly the group aged 85 and over, which is the fastest growing segment of the older population. Nationwide, this age group is projected to increase from 5.9 million to 18 million from 2012 to 2050, which will represent 4.5% of the population (Ortman, et al., 2014).

In 2000, the 85+ population in Illinois was 192,031 and in 2010, the number rose to 234,912 (U.S. Census Bureau, 2010). It is projected to be 351,941 by 2030, which is an increase of 83.3% from 2000 (U.S. Census Bureau, 2005). The following information outlines the growth of the age 85+ population in Illinois since 1970:

Age 85 + Population in Illinois

1970 Census	1980 Census	1990 Census	2000 Census	2010 Census	2019 Pop. Estimates	% Increase Between 1970 & 2019	% Increase Between 2000 & 2018

² 2020	88,395	11,520,280	55,638	1,004,845	144,033	12,525,125
³ 2021	52,807	8,293,020	55,676	1,472,988	108,483	9,766,008

¹ The increase in Congregate meals in FY 2010 was due to ARRA funding.

² The increase in Home Delivered Meals in FY 2020 and decrease in Congregate "Persons Served" and "Meals Provided" was related to the temporary suspension of Congregate Meal Services due to the COVID-19 (Coronavirus) pandemic.

³ FY 2021 "Persons Served" and "Meals Provided" numbers are projections. The number of "Persons Served" and "Meals Provided" for Congregate services are projected to be lower related to the temporary suspension of Congregate Meal Services due to the COVID-19 (Coronavirus) pandemic.

Note: The "Other" column includes Program Income, Local Match, Nutrition Services Incentive Program (NSIP) awards.

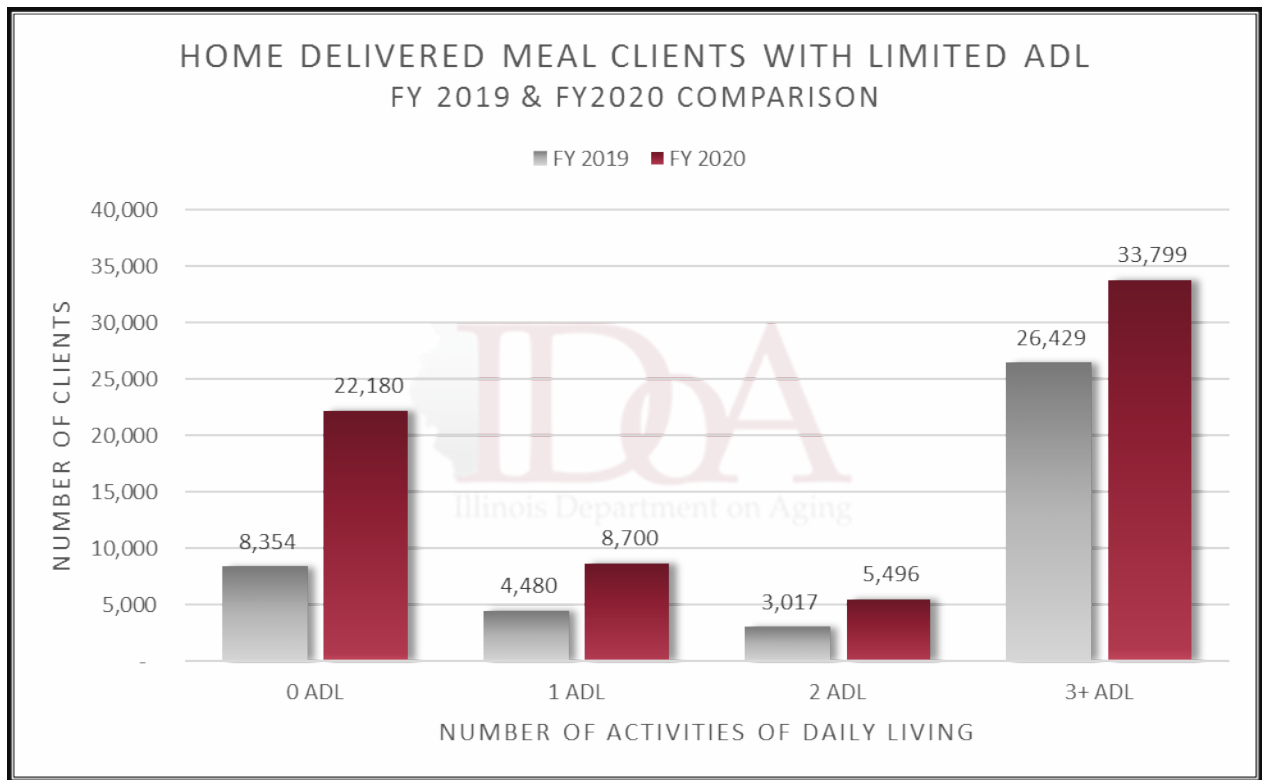

¹ FY 2020 is based on 4th Quarter Projections. The FY 2020 decrease in Federal expenditures for Home Delivered Meals and increase in "Other" expenditures is related to the shift in funding source to the **Coronavirus Aid, Relief, and Economic Security (CARES) Act and The Families First Coronavirus Response (FFCRA)** funding due to the COVID-19 (Coronavirus) pandemic, which are included in the "Other" column.

² FY 2021 is based on Area Plan projections. The FY 2021 Home Delivered Meals "Other" column includes the Consolidated Appropriations Act funding.

³ The FY 2020 decrease in Congregate expenditures is related to the temporary suspension of Congregate Meal Services due to the COVID-19 (coronavirus) pandemic.

Home Delivered Meal Clients with Limited Activities of Daily Living (ADL)

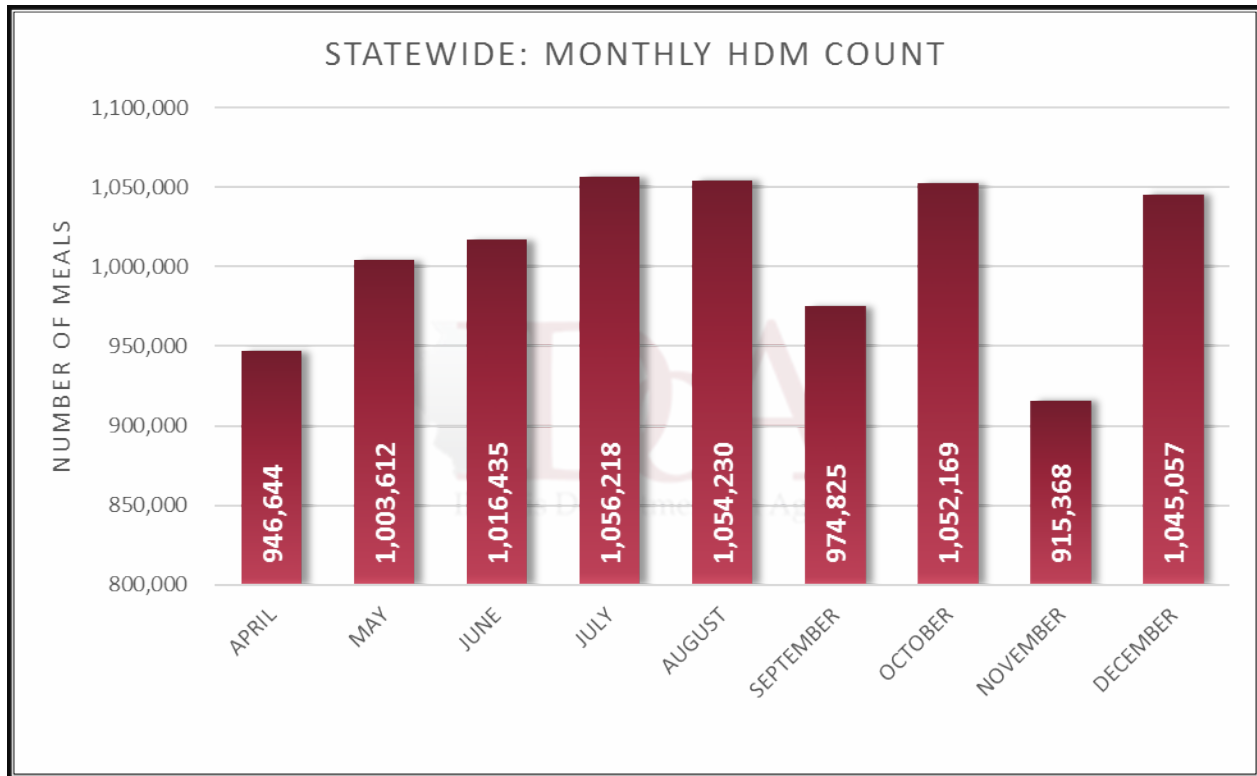

Note: Activities of Daily Living indicates the person’s total score on the Katz Index of Independence in Activities of Daily Living (ADL). Activities include bathing, dressing, toileting, transferring, continence, and feeding. Permissible values are 0-6.

A limitation is defined as unable to perform the activity without substantial assistance (including verbal reminding, physical cuing, or supervision).

(Source: NAMRS¹/OAA)

¹ NAMRS is the National Adult Maltreatment Reporting System.

Statewide Monthly Home Delivered Meals Since the Pandemic

Note: The Department temporarily suspended Congregate Meal services in March 2020 in an effort to stop the spread of COVID-19 (Coronavirus) pandemic. As a result, services provided under the Home Delivered Meals program began to increase, as many former Congregate Meal participants began to receive Home Delivered Meals for the first time.

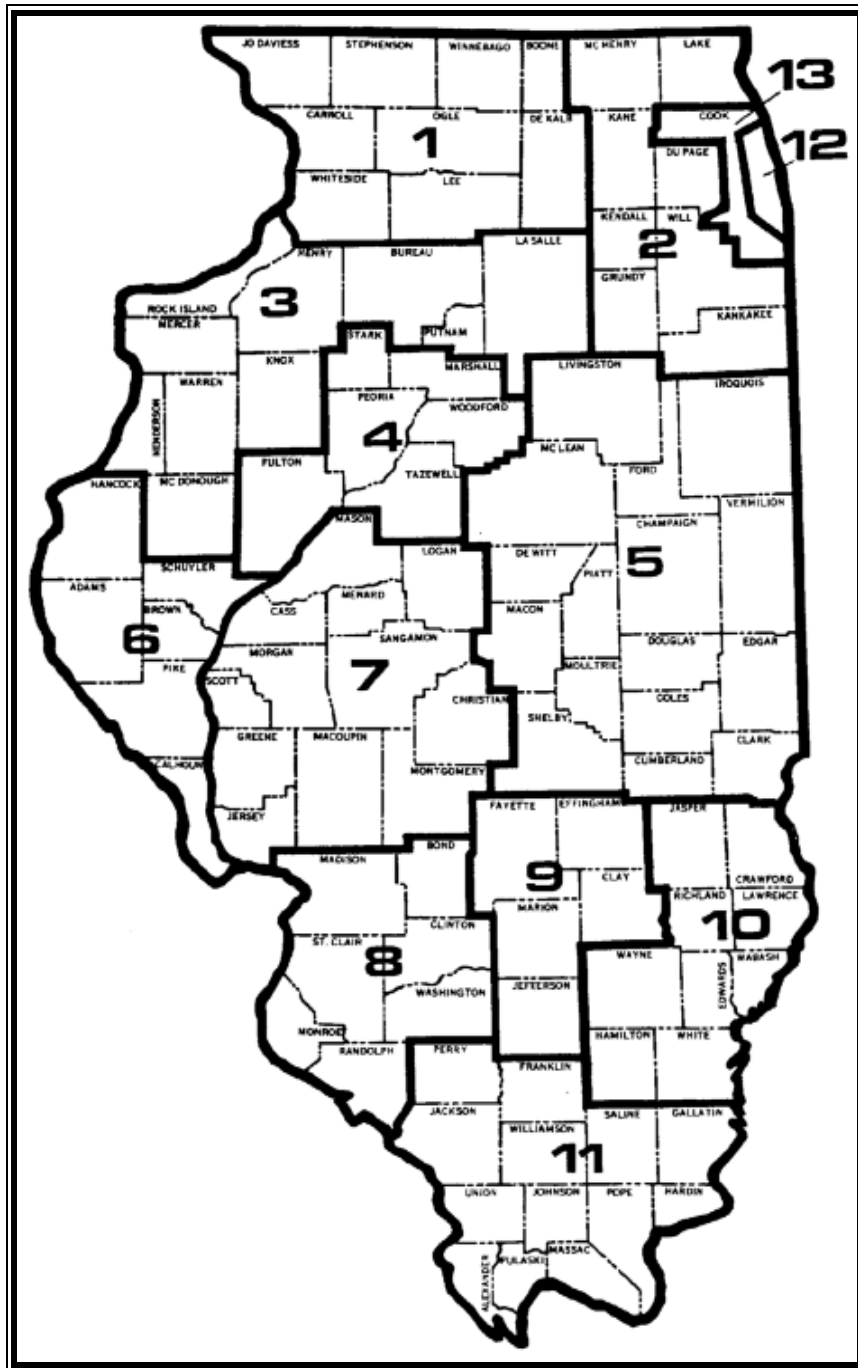

National Survey Results for Home Delivered Meals

The federal Administration on Aging conducted the Thirteenth National Survey of Program Clients in 2018. The purpose of this nationally representative sample survey was to collect information on client satisfaction, consumer assessment of service quality, and consumer reported outcomes of clients participating in OAA state and community programs on aging. The following table outlines the results for the home delivered meal service.

National Performance Measures Project Results	% of Home Delivered Meal Clients
Portion of Food Eaten that Home Delivered Meals Represents on a Daily Basis	
Less than 1/3 of all the food	6.8%
Between 1/3 and 1/2 of all the food	24.3%
About 1/2 of all the food	31.3%
More than 1/2 of all the food	31.1%
Other	0.7%
Health Issues	
Arthritis/Rheumatism	69.2%
High Blood Pressure/Hypertension	72.7%
Heart Attack/Coronary	43.9%
High Cholesterol	49.2%
Diabetes or High Blood Sugar	34.7%
Asthma	49.1%
Length of Time Receiving Home Delivered Meals	
6 months or less	22.5%
More than 6 months but less than 1 year	16.6%
At least 1 Year but less than 2 years	23.9%
2 to 5 years	25.8%
More than 5 years	7.3%
Home Delivered Meals Help Clients To	
Continue to live in own home	91.5%
Eat healthier foods	81.3%
Feel better	86.5%
Improve health	77.6%
HDMs Are Good or Excellent	87.5%
Older Adult Likes the HDMs	91.8%
Older Adults Would Recommend HDMs to Friend	95.2%

Number of Older Adults Denied Home Delivered Meals and Number of Older Adults on Waiting Lists

The following information outlines the estimated number of older adults denied home delivered meals in FY 2020 and the current number of older adults on waiting lists due to insufficient funding. It is estimated that 235 older adults were denied home delivered meals in FY 2020 due to insufficient funding. This is a 10 percent decrease since FY 2019. At the present time, 227 older adults are on waiting lists for home delivered meals throughout Illinois; this is a 67 percent increase over the past year.

Note: The above table reflects the number of older adults still in need of home delivered meals and those on waiting lists due to lack of funding in each Planning and Service Area (PSA) as of November 2020 when the annual Home Delivered Meals survey data was collected.

The number of older adults on waiting lists and number of older adults still in need of meals continued to change as Federal funding (i.e. The Coronavirus Aid, Relief, and Economic Security (CARES) Act and The Families First Coronavirus Response (FFCRA)) was released to the Area Agencies on Aging.

Several waiting lists have been eliminated since then, while other PSAs currently have a waiting list that previously did not have one.

Additional Funding Needed for Older Adults Denied Services and for Older Adults on Waiting Lists

PSA	Additional Funds Needed for Older Adults Denied Services	Additional Funds Needed for Older Adults on Waiting Lists	Comments
01	\$0	\$0	n/a
02	\$300,000	\$2,706,550	Throughout PSA02, no one was denied home delivered meal service. However, clients were placed on a waiting list in Kankakee and Will Counties. Additional funding due to COVID-19 enabled providers to eliminate wait lists. It is also anticipated that the change in provider in Will County will reduce future waiting lists due to more efficient operations. Going forward, between the two counties, approximately \$300,000 additional funding is needed each year to avoid having a wait list.
03	\$450,000	\$794,813	Voluntary Action Center (VAC), who serves La Salle, Putnam, and Bureau Counties Stated: In order to sustain current levels and avoid waiting list we will need to receive level of funding that included the CARES Act and FFCRA. As volunteers have returned to work and are no longer available, we once again need to rely on paid drivers. In order to make routes as efficient as possible we need two additional delivery trucks with holding ovens and refrigerator (\$90,000). We will need to hire two drivers (\$30,000) We anticipate total costs of \$1,160,000 to sustain current level while meeting future needs. That would mean an additional \$450,000 in federal/ state funding, in addition to the FY 21 allocation of about \$517,000.
04	\$0	\$293,000	Neighborhood House: At this time additional funding is required to recoup FY20 losses due to an increase in services to start all persons requesting services during the COVID-19 pandemic. Going forward to reduce/eliminate our current waitlist we would need an increase of at minimum \$293,000 just to cover food prep and delivery costs. There are additional costs such as equipment replacement, repair and upgrades that are imperative to Neighborhood House operating at its fullest and safest capacity. We also have program administrative oversight costs to cover, along with training/educational costs for each various aspect of the program. Please understand that \$293,000 does not cover our entire cost of adding these clients to our service base.

05	\$0	\$0	n/a
06	\$0	\$0	n/a
07	\$23,468	\$58,562	Includes funds for meals, wage increase for personnel, supplies, and associated delivery costs.
08	\$0	\$0	n/a
09	\$91,525	\$100,000	Additional funds to reimburse volunteers, a delivery vehicle, equipment, personnel, and delivery funds.
10	\$198,000	\$0	Includes funds for food, supplies, fuel, personnel, a new vehicle, maintenance, and insurance.
11	\$370,819	\$321,953	Includes funds for meal preparation, personnel, and delivery,
12	\$0	\$0	n/a
13	\$0	\$0	Funds needed to continue to provide ethnic meals and special diets to keep up with current rate of increase.
Total:	\$1,433,812	\$4,274,878	

Note: The above table reflects the additional funding needed by each Planning and Service Area (PSA) as of November 2020 when the annual Home Delivered Meals survey data was collected.

Waiting lists and the number of older adults still in need of services continued to change as Federal funding (i.e. The Coronavirus Aid, Relief, and Economic Security (CARES) Act and The Families First Coronavirus Response (FFCRA)) was released to the Area Agencies on Aging.

Several waiting lists have been eliminated since then, while other PSAs currently have a waiting list that did not previously have one.

The Coronavirus Aid, Relief, and Economic Security (CARES) Act and The Families First Coronavirus Response (FFCRA) Funding Used to Expand Home Delivered Meals

PSA	How CARES and FFCRA Funding Was Used
01	<p>Lifescape purchased delivery vehicles. New routes were added as a result of the increase demand for meals.</p> <p>NICAA / Golden Meals:</p> <ul style="list-style-type: none"> • 200 Coolers were purchased to ensure social distancing . • Face masks were purchased and distributed to all staff and all HDM clients. • Sanitizing machine purchased along with thermometers. • One additional deliver driver was hired.
02	<ul style="list-style-type: none"> • Increased number of meals and clients served throughout the PSA. • Provided shelf stable meals to all clients, including those receiving pick-up meals. • Eliminated waiting lists in two counties. • Nutrition providers increased staff to accommodate the delivery of the increased volume of units (people/meals). • Nutrition providers purchased PPE for employees and volunteers across the PSA. • Nutrition providers supplied COVID-19 related training to employees and volunteers. • Nutrition providers upgraded technology, communications capabilities, and facilities as needed to accommodate mandated social distancing and shelter in place. • Some areas provided additional daily meals to ensure food security to older adults. • Converted existing congregate dining sites to pick-up meal sites and developed new temporary pick-up meal sites.

<p>03</p>	<p>Bureau County Senior Center used the CARES ACT funding to purchase an additional vehicle to help continue to provide home delivered meals. The vehicle ensured transportation of meals to seniors.</p> <p>Henry County Senior Citizens added new meal routes and eased up on the HDM qualifications during the COVID pandemic.</p> <p>Rock Island County Senior Center, who serves Rock Island and Mercer Counties stated: The CARES Act funds helped to eliminate the waitlist, provide shelf stable meals and continue to provide shelf stable meals to those who might need food in an emergency if the deliveries would need to discontinue. No areas in Mercer County and Rock Island County were denied due to all participants were switched to meal delivery service through Mom's Meals, so everyone who qualified regardless of area were able to be served.</p> <p>YMCA of McDonough County Senior Program/Senior Center, who serves McDonough County stated: The funds were greatly needed as we have expanded the number of people on our current routes and have been able to utilize Mom's Meals for those outside our routes.</p> <p>Jamieson Community Center, who serves Henderson and Warren Counties stated: A new route was established, purchased 30 days of shelf-stable meals for each participant served, and were able to meet the demand to add new people to the home-delivered meal routes. Purchased PPE and was able to cover the increased cost of food related to the pandemic. In addition, deliveries are no contact, limiting our drivers' ability to do wellness checks on the people served. To compensate for this and the social isolation our participants are experiencing, staff members are making weekly contact by phone with all participants.</p> <p>VNA Community Services, who serves Knox County stated: CARES Act and FFCRA funds were used to expand Home Delivered Meals. The VNA served an additional 150 senior participants during the pandemic.</p>
<p>04</p>	<p>MSW Projects: Marshall, Stark, Woodford: The CARES Act & Families First funds were used to provide meals to congregate clients who did not feel safe leaving their homes, and additional home delivered meal clients in the current areas where meals are currently being served to avoid being put on a waiting list. CARES Act funds were also used to purchase additional meal carriers, hot packs, and plug in heaters to be able to serve extra meals at safe temperatures. CARES Act funds were used to purchase a new delivery van as the existing van has over 100,000 miles and mechanical issues. CARES Act funds were also used for marketing materials such as magnets to put on volunteer delivery vehicles while delivering meals, refrigerator magnets for each nutrition site to give to current and potential clients, shirts for staff to wear while working and at any future marketing events. The magnets are a way to for the clients to identify the volunteer delivering the meal and also a way to have the nutrition site information in a convenient place when needing to call. CARES Act funds will also be used to purchase new computers, printers, and software for the office staff to ensure productivity and ease of work.</p> <p>Fulton: Additional shelf stable meals provided, 75 new clients added on, additional route and 2 additional drivers added, driver's hours expanded to compensate additional deliveries.</p> <p>Neighborhood House added 5 additional routes in FY20 to cover additional clients being added to the program. Additional meal transportation bags and coolers were needed along with an increase of PPE supplies.</p>

<p>05</p>	<p>Peace Meal reported additional meals were provided to all clients (shelf stable). No wait list was established in response to the increased request for HDMs. Additional supplies were purchased to aid in delivery (delivery bags, PPE, etc.).</p> <p>CRIS Healthy-Aging Center reported Cares act FFCRA money was used to eliminate the waiting list and continue to add on all new referrals as they come in. weekly referrals are averaging 9-10 week, more than one meal per day was offered and provided to those who requested.</p> <p>Catholic Charities MOW's reported because of the addition of the Congregate meal provider closing because of COVID we expanded our HDM program by 7 routes in a matter of a weeks-time. In addition, we supplied 6,272 shelf stable meals to our clients because of the COVID.</p>
<p>06</p>	<p>CARES Act and FFCRA funds were used to support maintenance and limited expansion of the current HDM program serving all six counties in the PSA.</p>
<p>07</p>	<p>CEFS: These funds were used to provide a second meal to our clients during COVID.</p> <p>CAPCIL: CARES funds were not completely spent since it was not all received. Received \$15,823 out of the \$79,113 which is covering the C2 debt. Awaiting the remaining funds to cover this debt.</p> <p>The FFCRA funds were used to reach more home delivered meal participants that occurred due to the additional need. We had additional meals, supplies, time and mileage cost to cover.</p> <p>IL Valley: Increased fuel costs; Increased vehicle maintenance/repair costs; Increased food expense; Increased food supply costs; Increased personnel costs – staff working longer hours due to extended routes and additional meals being delivered; Increased PPE costs; Increased janitorial costs; Increased kitchen equipment repairs; Increased mileage/ personnel expense to deliver shelf-stable meals.</p> <p>No equipment purchases made yet; researching and retrieving estimates for sink sprayers in 2 centers and will soon need additional refrigerators and freezers for increased food storage needs.</p> <p>PCOA: Additionally, funds received in response to the Coronavirus were used to eliminate the waitlists and to help provide clients with frozen and shelf stable meals.</p> <p>SSCIL: Groceries for the seniors on the waiting list & disposables for food.</p>

<p>08</p>	<p>Bond: Nearly doubled the number of clients that were served with the CARES & FFCRA funds. We have established 3 new routes. Provided 21 SSM to each client but did not increase the number of meals per day.</p> <p>Mascoutah: served more congregate clients on home delivery routes. Since the middle of March 2020, added 41 clients from congregate to home delivery. Of those 11 have been approved through SIVNA receive HDM's. Have provided more than 300 extra home delivered meals for consumption on weekends or for clients to have extra meals on hand. Made and delivered 185 SSM to those individuals. We have also provided over 200 extra meals to our HDM-Congregate Emergency Carryout clients. Continue to have a strong demand for both HDM's and our carryout meals.</p> <p>Millstadt: Purchased supplies including masks, hand sanitizer, wipes, and disinfectant to keep volunteers and clients safe from Coronavirus. Warming Containers and (2) Coolers to transport additional meals to clients. Carry Out Containers to wrap additional meals in. Touchless Lavatories and Sinks. Additional Computers and System to accommodate extra volunteers and employees for meals being prepared, served and delivered.</p> <p>Lessie Bates- Seasoned Circle Café: (3) Utility Carts, (1) Commercial Upright Reach-In Freezer, (1) Commercial Upright Reach-In Refrigerator, (1) Heated Holding Cabinet w/Clear Door</p> <p>Sparta: FFCRA funds were used to help deliver 632 meals in our serving area.</p> <p>Steeleville: Used the FFCRA funding to purchase a new slicer, new fryer, garbage disposal and three different instances of emergency meals to the home delivered.</p> <p>Alton SSP: Additional funds were used to provide nutrition services to nearly 1,000 individuals per day. Prior to the COVID19 pandemic we were providing a total of nearly 600 meals. The pandemic exacerbated the need for nutrition services.</p>
<p>09</p>	<p>Comp Services: Eliminated our waitlist. Had to establish a new county route which meant hiring a new driver. Currently using our vehicle that is used for our congregate site, but once that re-opens, a vehicle will be needed to serve this new route. A new city route needs to be established, however, it is very difficult at this time to find volunteers and staff when resources are already spread thin. Providing frozen meals for the weekend upon request.</p> <p>CEFS: These funds were used to serve an additional evening cold meal along with their noon meal.</p> <p>BCMW: Hired additional drivers and purchased two new vehicles from our FY 20 funds to expand our home delivered meals. Started two new routes at our Salem Site and one new route in our Centralia Site so we could deliver to people who we would not normally deliver. Purchased a new oven/stove for the Salem Meal Site because theirs was old and the oven did not heat evenly.</p> <p>Used this funding to offset the additional cost for food and supplies due to the increase of the cost and the increase in the number of meals being served.</p>

<p style="text-align: center;">10</p>	<p>Lawrence: While our centers were closed to walk-ins, we opened our Home Delivered Meal Program up to anyone who had attended our centers but couldn't come because of the closing. The virus caused many more Seniors to request Home Delivered Meals.</p> <p>Ordered several Electric type food carries and bags to enable us to deliver the additional meals at a cost of \$2,295. A few of these items are on back order because the virus is affecting the deliver programs throughout the United States.</p> <p>Wabash: Additional driver added.</p> <p>Crawford; Jasper; Richland: Anyone that requested a meal was served.</p> <p>White; Hamilton – used the funds to offer evening meals for those who need/want them and frozen meals on weekends. In order to do this, we had to purchase more food and equipment for the meals. This equipment included hot boxes, bags, heating stones and coolers. We also had to hire two part-time employees, and borrow money to purchase another van to deliver meals.</p> <p>Edwards: Greatly increased the number of meals provided. Since the CARES dollars only replaced the Title III dollars, we saw no increase in funding this fiscal year. The FFCRA dollars were used to greatly expand our weekend meals. No dollars were used to purchase equipment.</p> <p>Wayne: Greatly increased the number of meals provided. Since the CARES dollars only replaced the Title III dollars, we saw no increase in funding this fiscal year. The FFCRA dollars were used to greatly expand our weekend meals. No dollars were used to purchase equipment.</p>
<p style="text-align: center;">11</p>	<p>Waiting lists were eliminated and routes were expanded in all 13 counties outside of the normal service area. All older adults were served if needed. Additional frozen meals were provided to clientele to provide for weekend and evening meals if appropriate, and emergency meals in case of site closure. Each client received at least two weeks of frozen meals, with additional shelf-stable meals from FEMA. Providers used the additional funds to pay hazard pay for workers agreeing to continue working during the pandemic or hire additional staff to assist with additional workload. Providers from all 13 counties purchased hot packs and coolers for deliveries, 4 used vans/SUVs for delivering to expanded service areas, additional food to add to emergency meals outside of everyday food preparation, ovens, stoves, small copy machines for increased documentation, and new sinks to replace old equipment and accommodate additional dish washing needs. All equipment purchased is used in direct connection to the home delivered meal process in either preparing, packaging, or delivering the food safely and according to guidelines.</p>
<p style="text-align: center;">12</p>	<p>As part of the COVID-19 strategy, a primary focus of the Department of Family and Support Services, Senior Services Area Agency on Aging was to ensure the provision of home delivered meals to older adults who did not have any other resources for obtaining meals which included seniors without available supports to assist them during the "Stay at Home" order. The success of the strategy implemented by DFSS to ensure older adults in Chicago have access to food during the Pandemic resulted in over 4,000 new clients being added to the HDM program from March, 2020 to May, 2020, an increase of more than 60% within a two-month period of time.</p> <p>Our Home Delivered Meals Provider, Open Kitchens, had to scale up their operation to keep pace with the burgeoning client demand including hiring additional staff, procuring triple the number of PPE supplies, leasing and buying new delivery vehicles, increasing the number of delivery routes including adding weekend delivery routes, purchasing thermal cameras that detect fever-like temperatures of staff entering the workplace, and ensuring all employees are screened for COVID-19 on a regular basis. For FY2020, the additional COVID-19 funding has been used to reimburse the HDM provider for the purchase of one new delivery vehicle, thermal cameras for their facility, the additional labor costs for assembling the emergency shelf stable meals kits and for the cost of over 1 million meals prepared and delivered to homebound seniors.</p>

<p style="text-align: center;">13</p>	<p>Serving new referrals:</p> <ul style="list-style-type: none"> • Home Delivered Meals – Demand for home delivered meals exceeded our FY2020 projections by 15%, necessitating the delivery of an additional 159,000 units. • Mom Meals Emergency Program – To help our nutrition sites meet the sudden surge in demand for home delivered meals, AgeOptions used \$246,000 in emergency funding to provide nearly 38,000 Mom’s Meals delivered throughout our service area. • Top Box Foods – In an effort to serve older adults who relied on grocery shopping for some of their nutritional needs before the pandemic, AgeOptions used \$280,000 in emergency funding to partner with home-delivery grocery company Top Box Foods. Older adults received the equivalent of 174,000 meals in the form of fresh produce and fruits, frozen meats and packaged staples. The success of the program has led to a three-year grant award to AgeOptions from the Administration on Community Living to study how grocery delivery programs might fit with the Older Americans Act. • Privately-sourced shelf-stable Meals – AgeOptions acted quickly at the onset of the pandemic. In early March we ordered the first of a series of shelf-stable meal deliveries to providers. This series of deliveries was designed as a contingency plan that continued through today. AgeOptions spent \$919,000 of emergency funding to make sure clients had a 30-day emergency meals supply on hand to guard against large-scale food or staff shortages. • FEMA Meals – With coordination from IDoA, AgeOptions was able to obtain an additional 91,350 shelf-stable meals for older adults. AgeOptions used \$20,000 in emergency funding to distribute the FEMA meals. • Allowing sites to function according to precautions: There were non-food expenses incurred by our nutrition sites to meet the demands imposed by the pandemic. One of the largest expenses was the added per-unit meal costs for alternative individualize, sealed packaging needed for Congregate Meal sites to implement pick-up programs. Other expenses included the purchase of Personal Protective Equipment, such as gloves, masks, the purchase of sanitizer and additional insulated bags for deliveries. No capital-expense purchases were made.

Number of Older Adults Needing Home Delivered Meals in Unserved Areas

The Illinois Department on Aging surveyed the 13 Area Agencies on Aging (AAA) on the estimated number of older adults needing home delivered meals in unserved areas. "Unserved areas" is defined as geographic areas (e.g., rural township areas or neighborhoods in cities, etc.) that are not served by the home delivered meal program due to lack of funding or the need for additional volunteers to deliver the meals.

In Fiscal Year 2021, the Area Agencies on Aging estimate that a total of 832 older adults need home delivered meals in unserved areas of Illinois. In Fiscal Year 2020, this number was 1,387.

The following pages outline the results of the survey by PSA and by county.

Average Number of Older Adults Served Meals Each Day

The Illinois Department on Aging surveyed the 13 Area Agencies on Aging (AAA) on the average number of persons served each day with congregate meals and home delivered meals by nutrition site. An average number of 11,318 persons are served per day by the congregate meal program (based on period from October 1, 2019 to February 29, 2020 prior to the temporary suspension of Congregate Meal Sites during the pandemic), an average number of 23,386 are served per day by the home delivered meal program (based on period from October 1, 2019 to February 29, 2020 prior to the temporary suspension of Congregate Meal Sites during the pandemic), and an average number of 38,399 are served per day by the home delivered meal program (based on period from March 1, 2020 to September 30, 2020 after the temporary suspension of Congregate Meal Sites during the pandemic).

Type of Congregate Meals Provided

The Illinois Department on Aging surveyed the 13 Area Agencies on Aging (AAA) on the number of congregate meals that were served hot, cold, or frozen (for later reheating). Approximately 94% of the congregate meals were hot meals, 6% were cold meals, and less than ½ % were frozen meals.

Type of Home Delivered Meal Provided

The Illinois Department on Aging surveyed the 13 Area Agencies on Aging (AAA) on the number of home delivered meals that were served hot, cold, frozen (for later reheating), or shelf stable. Approximately 35% of the home delivered meals were hot meals, 27% were cold meals, 26% were frozen meals, and 12% were shelf stable. "Take Out/To-Go" meals represented 7% of the total home delivered meals provided statewide.

Congregate Meals - # of Serving Days per Week

The Illinois Department on Aging surveyed the 13 Area Agencies on Aging (AAA) on the number of serving days that each nutrition program provided with the congregate meal program. Approximately 4% of the nutrition sites served congregate meals 6 to 7 days per week, 75% of the nutrition sites served congregate meals 5 days per week, 8% of the nutrition sites served congregate meals 3 to 4 days per week, and 13% of the nutrition sites served congregate meals 1 or 2 days per week. Congregate Meal Sites included those that were open from the period of October 1, 2019 to February 29, 2020, which lead up to the temporary suspension of Congregate Dining Sites due to the COVID-19 pandemic.

Local Cash Match and Program Income Resources

Based on Area Plan budgets submitted by the 13 Area Agencies on Aging, local resources (both cash and in-kind) and program income (client contributions) provide significant financial support to the nutrition program. In FY 2021, it is estimated that local match will provide almost \$9 million (17% of total budget) statewide and that program income will provide \$4.6 million (9% of total budget) to support the home delivered meal program.

The following charts outline how the various resources are used to fund the average cost of a home delivered meal (HDM) and congregate meals.

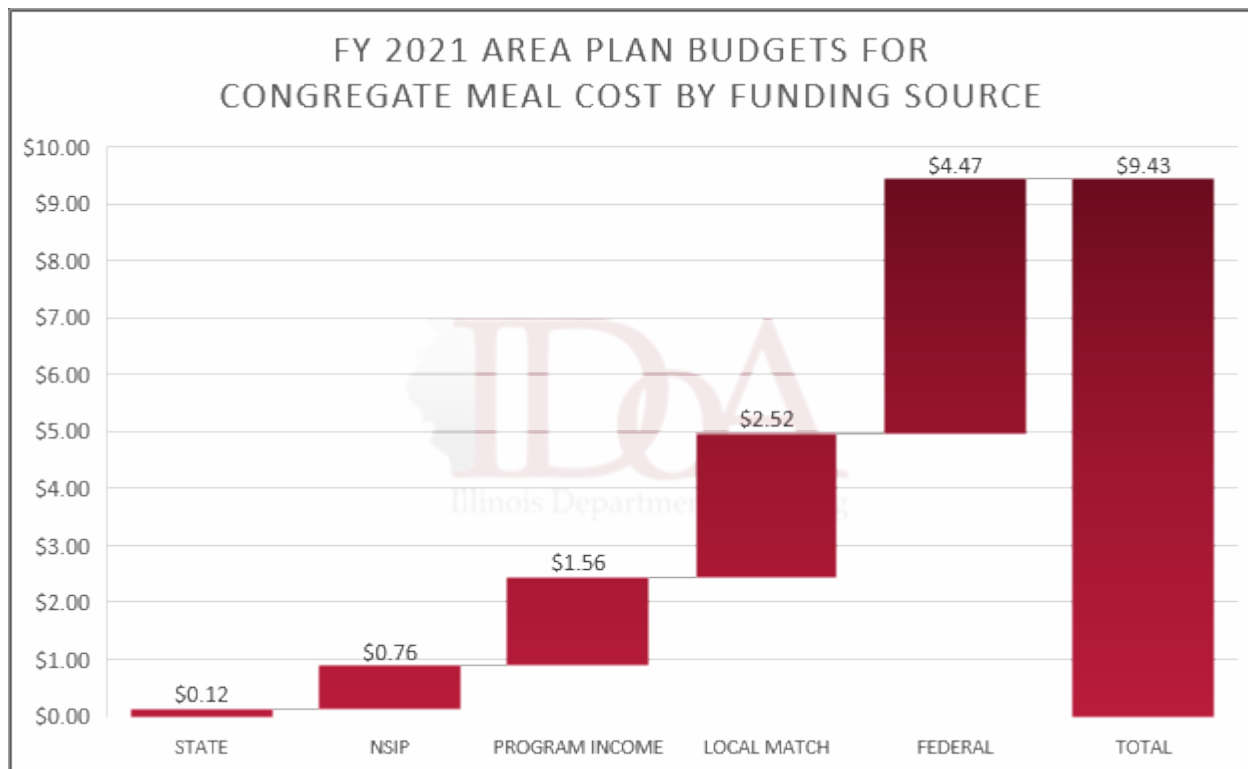

Note: NSIP stands for the Nutrition Services Incentive Program. Meal count used to determine a states allotment under the OAA Title III, Part A (Section 311).

A meal provided to a qualified individual in his/her place of residence through a program that meets all of the criteria for payment using OAA funds (see OAA Title III-C):

- Served to an eligible individual, i.e. a person who is qualified to receive services under the OAA as defined in Title III; and
- Served to an eligible person who has NOT been means-tested for participation; and
- Compliant with the nutrition requirements; and
- Served by an eligible agency, i.e. has a grant or contract with a SUA or AAA; and
- Served to a person who has an opportunity to contribute toward the cost of the meal.

Meals served under Title III-E supplemental services may be included if all the above criteria are met. (Source: OAA)

Note: NSIP stands for the Nutrition Services Incentive Program. Meal count used to determine a states allotment under the OAA Title III, Part A (Section 311).

A meal provided to a qualified individual in a congregate or group setting. through a program that meets all of the criteria for payment using OAA funds (see OAA Title III-C):

- Served to an eligible individual, i.e. a person who is qualified to receive services under the OAA as defined in Title III; and
- Served to an eligible person who has NOT been means-tested for participation; and
- Compliant with the nutrition requirements; and
- Served by an eligible agency, i.e. has a grant or contract with a SUA or AAA; and
- Served to a person who has an opportunity to contribute toward the cost of the meal.

Meals served under Title III-E supplemental services may be included if all the above criteria are met. (Source: OAA)

Recommendations from the Aging Network on Potential Ways to Increase Federal Funding

In prior fiscal years, the Department on Aging has previously surveyed the 13 Area Agencies on Aging (AAAs) and nutrition service providers on potential ways to increase the amount of federal funding captured for the home delivered meal program. The following page outlines the results of these sections of the survey.

Recommendations on potential ways to increase the amount of federal funding captured for the home delivered meal program:

1. Nutrition providers are recommending additional advocacy efforts at the state and federal levels to make legislators aware of the increased need and cost effectiveness of keeping seniors in their local communities longer by increasing funding for community services.
2. Providers feel that family members and recipients of these meals should be encouraged to be more vocal about the need for these meals. They need to contact their legislators about the need.
3. There are studies available to reflect how much and why the cost of living is going up nationally and in Illinois. Advocacy should be done to at least assure that federal funding for Senior Nutrition and other senior programs will increase annually with the stated rise in the cost of living, by an annual percentage.
4. Have appropriate increases for the federal home delivered meal program tied to the COLA like Social Security does.
5. Keep in contact with federal, state, and local politicians so they won't forget their senior constituents. Advocates coupled with senior program participants could be very effective in bringing attention to this potentially lifesaving program.
