MANAGEMENT ASSERTION LETTER

February 21, 2024

Pension Plan Auditors
FORVIS, LLP
225 North Water Street, Suite 400
Decatur, Illinois 62523

Ladies and Gentlemen:

We are responsible for the identification of, and compliance with, all aspects of laws, rules, and regulations applicable to identifying and enrolling eligible employees of the Chicago State University (University) and reporting their significant elements of census data and related employer and/or employee contributions within the State Universities Retirement System (System). We are responsible for and we have established and maintained an effective system of internal controls over the specified requirements. We have performed an evaluation of the University's compliance with the specified requirements during the applicable periods noted below. Based on this evaluation, we assert the University has materially complied with the specified requirements listed below.

- A. All of the University's employees required to be enrolled in the System in accordance with applicable laws, rules, and regulations were properly enrolled in the System during the census data accumulation year ended June 30, 2022.
- B. The changes in significant elements of census data for employees required to be enrolled in the System occurring during the census data accumulation year ended June 30, 2022, were completely and accurately reported by the University to the System. The significant elements of census data of the System include each employee's:
 - date of birth;
 - gender; and,
 - earned service credit.
- C. The changes in significant elements of census data for employees required to be enrolled in the System occurring during the census data accumulation year ended June 30, 2022, were completely and accurately reported by the University to CMS. The significant elements of census data of the Plan include each employee's:
 - date of birth;
 - gender; and,
 - earned service credit.

D. The employee and employer contributions remitted by the University to the System during the proportionate share allocation year ended June 30, 2023, were complete, accurate, and in accordance with applicable laws, rules, and regulations.

Yours truly,

Chicago State University

Report on Compliance

As Special Assistant Auditors for the Auditor General of the State Universities Retirement System (System), we have examined compliance by management of the State of Illinois, Chicago State University (University) with the specified requirements listed below, as more fully described in the *Audit Guide for Financial Audits and Compliance Attestation Engagements of Illinois State Agencies (Audit Guide)* as adopted by the Auditor General, during:

- 1) the census data accumulation year for the System ended June 30, 2022;
- 2) the proportionate share allocation year for the System ended June 30, 2023;
- 3) the census data accumulation year for the State Employees' Group Insurance Program (Plan) administered by the State of Illinois, Department of Central Management Services (CMS) ended June 30, 2022; and
- 4) the proportionate share allocation year for the Plan ended June 30, 2023.

Management of the University is responsible for compliance with the specified requirements. Our responsibility is to express an opinion on the University's compliance with the specified requirements based on our examination.

The specified requirements are:

- A. All of the University's employees required to be enrolled in the System in accordance with applicable laws, rules, and regulations were properly enrolled in the System during the census data accumulation year ended June 30, 2022.
- B. The changes in significant elements of census data for employees required to be enrolled in the System occurring during the census data accumulation year ended June 30, 2022, were completely and accurately reported by the University to the System.

The significant elements of census data of the System include each employee's:

- a. date of birth;
 - b. gender; and,
 - c. earned service credit.
- C. The changes in significant elements of census data for employees required to be enrolled in the Plan occurring during the census data accumulation year ended June 30, 2022, were completely and accurately reported by the System to CMS through the System.

The significant elements of census data of the System include each member's:

- a. date of birth;
 - b. gender; and,
 - c. earned service credit.
- D. The employee and/or employer contributions remitted by the University to the System during the proportionate share allocation year ended June 30, 2023, were complete, accurate, and in accordance with applicable laws, rules, and regulations.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants, the standards applicable to attestation engagements contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the Illinois State Auditing Act (Act), and the *Audit Guide*. Those standards, the Act, and the *Audit Guide* require that we plan and perform the examination to obtain reasonable assurance about whether the University complied with the specified requirements in all material respects. An examination involves performing procedures to obtain evidence about whether the University complied with the specified requirements. The nature, timing, and extent of the procedures selected depend on our judgement, including an assessment of the risks of material noncompliance with the specified requirements, whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

We are required to be independent and to meet our other ethical responsibilities in accordance with relevant ethical requirements relating to the engagement.

Our examination does not provide a legal determination on the University's compliance with the specified requirements.

In our opinion, the University complied with the specified requirements during:

- 1) the census data accumulation year for the System ended June 30, 2022;
- 2) the proportionate share allocation year for the System ended June 30, 2023;
- 3) the census data accumulation year for the Plan administered by CMS ended June 30, 2022; and,
- 4) the proportionate share allocation year for the Plan ended June 30, 2023,

in all material respects. However, the results of our procedures disclosed instances of noncompliance with the specified requirements, which are required to be reported in accordance with criteria established by the *Audit Guide* and are described in the accompanying Schedule of Findings as item 2023-001.

The University's response to the census data compliance finding identified in our examination is described in the accompanying Schedule of Findings. The University's response was not subjected to the procedures applied in the examination and, accordingly, we express no opinion on the response.

The purpose of this report is solely to describe the scope of our testing and the results of that testing in accordance with the requirements of the *Audit Guide*. Accordingly, this report is not suitable for any other purpose.

Report on Internal Control Over Compliance

Management of the University is responsible for establishing and maintaining effective internal control over compliance with the specified requirements (internal control). In planning and performing our examination, we considered the University's internal control to determine the examination procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the University's compliance with the specified requirements and to test and report on the University's internal control in accordance with the *Audit Guide*, but not for the purpose of expressing an opinion on the effectiveness of the University's internal control. Accordingly, we do not express an opinion on the effectiveness of the University's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with the specified requirements on a timely basis. *A material weakness in internal control* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that material noncompliance with the specified requirements will not be prevented, or detected and corrected, on a timely basis. *A significant deficiency in internal control* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and, therefore, material weaknesses or significant deficiencies may exist that have not been identified. We did identify certain deficiencies in internal control, described in the accompanying Schedule of Findings as item 2023-001, that we consider to be a significant deficiency.

The University's response to the internal control finding identified in our examination is described in the accompanying Schedule of Findings. The University's response was not subjected to the procedures applied in the examination and, accordingly, we express no opinion on the response.

The purpose of this report is solely to describe the scope of our testing of internal control and the results of that testing based on the requirements of the *Audit Guide*. Accordingly, this report is not suitable for any other purpose.

State of Illinois
Chicago State University
Schedule of Findings
For the Year Ended June 30, 2023

2023-001. Finding – Inadequate Internal Controls over Census Data

The Chicago State University (University) did not have adequate internal control over reporting its census data to provide assurance census data submitted to its pension and other postemployment benefits (OPEB) plans was complete and accurate.

Census data is demographic data (date of birth, gender, years of service, etc.) of the active, inactive, or retired members of a pension or OPEB plan. The accumulation of inactive or retired members' census data occurs before the current accumulation period of census data used in the plan's actuarial valuation (which eventually flows into each employer's financial statements), meaning the plan is solely responsible for establishing internal controls over these records and transmitting the data to the plan's actuary. In contrast, responsibility for active members' census data during the current accumulation period is split among the plan and each member's current employer(s). Initially, employers must accurately transmit census data elements of their employees to the plan. Then, the plan must record and retain these records for active employees and then transmit this census data to the plan's actuary.

We noted the University's employees are members of the State Universities Retirement System (SURS) for their pensions and the State Employees Group Insurance Program sponsored by the State of Illinois, Department of Central Management Services (CMS) for their OPEB. In addition, we noted these plans have characteristics of different types of pension and OPEB plans, including single employer plans and cost-sharing multiple-employer plans. Additionally, CMS' actuary uses census data for employees of the State's public universities provided by SURS, along with census data for the other participating members provided by the State's four other pensions plans, to prepare their projection of the liabilities of CMS' plan. Finally, SURS' actuary and CMS' actuary used census data transmitted by the University during Fiscal Year 2022 to project pension and OPEB-related balances and activity at the plans during Fiscal Year 2023, which is incorporated into the University's Fiscal Year 2024 financial statements.

During testing, we noted the following:

- During our testing of eligibility testing, we noted 2 instructors were not reported as eligible to participate in SURS by the University. For the June 30, 2022 census data, it was determined the service credit was different by a combined total of ½ of a year. These have been previously reported, but had not been corrected as of June 30, 2022.
- The University was not able to provide supporting documentation for the census data points related to 24 members selected for testing.

State of Illinois
Chicago State University
Schedule of Findings
For the Year Ended June 30, 2023

2023-001. Finding – Inadequate Internal Controls over Census Data (Continued)

We provided SURS' actuary and CMS' actuary with the exceptions we identified during our testing, along with the results of census data testing at the State Employees Retirement System of Illinois, and determined the net effect of these errors, along with the errors of other plan participants, was immaterial to SURS' and CMS' pension and OPEB-related balances and activity at the plans during Fiscal Year 2023.

The Fiscal Control and Internal Auditing Act (30 ILCS 10/3001) requires the University establish and maintain a system, or systems, of internal fiscal and administrative controls to provide assurance funds applicable to operations are properly recorded and accounted for to permit the preparation of reliable financial reports and to maintain accountability over the State's resources.

Additionally, eligibility criteria for participation in SURS under the Illinois Pension Code (Code) (40 ILCS 5/15-134(a)) states any person who is an employee of the University becomes a participant in SURS. Under the Code (40 ILCS 5/15-107), an employee is any member of the educational, administrative, secretarial, clerical, mechanical, labor, or other staff of an employer whose employment in a position in which services are expected to be rendered on a continuous basis for at least four months or an academic term, whichever is less:

- 1) not a student employed on a less than full-time temporary basis;
- 2) not receiving a retirement or disability annuity from SURS;
- 3) not on military leave;
- 4) not eligible to participate in the Federal Civil Service Retirement System,
- 5) not currently on a leave of absence without pay more than 60 days after the termination of SURS' disability benefits;
- 6) not paid from funds received under the Federal Comprehensive Employment and Training Act as a public service employment program participant hired on or after July 1, 1979;
- 7) not a patient in a hospital or home;
- 8) not an employee compensated solely on a fee basis where such income would net earnings from self-employment;
- 9) not providing military courses pursuant to a federally-funded contract where the University has filed a written notice with SURS electing to exclude these persons from the definition of an employee;
- 10) currently on lay-off status of not more than 120 days after the lay-off date;
- 11) not on an absence without pay of more than 30 days; and,
- 12) a nonresident alien on a visa defined under subparagraphs (F), (J), (M), or (Q) of Section 1101(a)(15) of Title 8 of the United States Code who (1) has met the Internal Revenue Service's substantial presence test and (2) became an employee on and after July 1, 1991.

State of Illinois
Chicago State University
Schedule of Findings
For the Year Ended June 30, 2023

2023-001. Finding – Inadequate Internal Controls over Census Data (Continued)

In addition, the Code (40 ILCS 5/15-157) requires the University to, at a minimum, withhold contributions of each employee's total compensation of 8% (9.5% for firefighters or police officers) for their participation in SURS, unless further contributions by the employee would either exceed the maximum retirement annuity in the Code (40 ILCS 5/15-136(c)) or the Tier 2 earnings limitation within the Code (40 ILCS 5/15-111(b)), and remit these amounts to SURS. Further, the Code (40 ILCS 5/15-155(b)) requires the University remit employer contributions to SURS reflecting the accruing normal costs of an employee paid from federal or trust funds.

Finally, for CMS' OPEB plan, we noted participation in OPEB is derivative of an employee's eligibility to participate in SURS, as members of SURS participate in OPEB as annuitants under the State Employees Group Insurance Act of 1971 (Act) (5 ILCS 375/3(b)).

University management indicated the University continued to rely on manual reconciliation processes which were not fully adequate to ensure accuracy and consistency among SURS, CMS, and the records retained at the University.

Failure to ensure complete and accurate census data was reported to SURS reduces the overall reliability of pension and OPEB-related balances and activity reported in the University's financial statements, the financial statements of other employers within both plans, and the State of Illinois' Annual Comprehensive Financial Report. Further, failure to report all eligible employees to SURS may result in employees not receiving the pension and OPEB benefits they are entitled to receive under the Code and the Act. (Finding Code No. 2023-001, 2022-001, 2021-001)

RECOMMENDATION

We recommend the University continue to focus on the incremental changes to the census data file from the prior actuarial valuation, provided no risks are identified that incomplete or inaccurate reporting of census data may have occurred during prior periods. Any errors identified during this process should be promptly corrected by either the University or SURS, with the impact of these errors communicated to both SURS' actuary and CMS' actuary.

Finally, we recommend that the University ensure all eligible employees are reported to SURS, along with any required employee and employer contributions.

State of Illinois
Chicago State University
Schedule of Findings
For the Year Ended June 30, 2023

Finding – Inadequate Internal Controls over Census Data (Continued)

UNIVERSITY RESPONSE

The University agrees with the recommendation. The University is developing processes to ensure all events occurring within a census data accumulation year are timely reported to SURS. Documentation and cross-training are still on-going to improve processes and minimize errors. The University will continue to review and update incremental changes to the census data file to ensure that all errors are promptly corrected.

Report on Compliance

As Special Assistant Auditors for the Auditor General of the State Universities Retirement System (System), we have examined compliance by management of the State of Illinois, Eastern Illinois University (University) with the specified requirements listed below, as more fully described in the *Audit Guide for Financial Audits and Compliance Attestation Engagements of Illinois State Agencies (Audit Guide)* as adopted by the Auditor General, during:

- 1) the census data accumulation year for the System ended June 30, 2022;
- 2) the proportionate share allocation year for the System ended June 30, 2023;
- 3) the census data accumulation year for the State Employees' Group Insurance Program (Plan) administered by the State of Illinois, Department of Central Management Services (CMS) ended June 30, 2022; and
- 4) the proportionate share allocation year for the Plan ended June 30, 2023.

Management of the University is responsible for compliance with the specified requirements. Our responsibility is to express an opinion on the University's compliance with the specified requirements based on our examination.

The specified requirements are:

- A. All of the University's employees required to be enrolled in the System in accordance with applicable laws, rules, and regulations were properly enrolled in the System during the census data accumulation year ended June 30, 2022.
- B. The changes in significant elements of census data for employees required to be enrolled in the System occurring during the census data accumulation year ended June 30, 2022, were completely and accurately reported by the University to the System.

The significant elements of census data of the System include each employee's:

- a. date of birth;
 - b. gender; and,
 - c. earned service credit.
- C. The changes in significant elements of census data for employees required to be enrolled in the Plan occurring during the census data accumulation year ended June 30, 2022, were completely and accurately reported by the System to CMS through the System.

The significant elements of census data of the System include each member's:

- a. date of birth;
 - b. gender; and,
 - c. earned service credit.
- D. The employee and/or employer contributions remitted by the University to the System during the proportionate share allocation year ended June 30, 2022, were complete, accurate, and in accordance with applicable laws, rules, and regulations.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants, the standards applicable to attestation engagements contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the Illinois State Auditing Act (Act), and the *Audit Guide*. Those standards, the Act, and the *Audit Guide* require that we plan and perform the examination to obtain reasonable assurance about whether the University complied with the specified requirements in all material respects. An examination involves performing procedures to obtain evidence about whether the University complied with the specified requirements. The nature, timing, and extent of the procedures selected depend on our judgement, including an assessment of the risks of material noncompliance with the specified requirements, whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

We are required to be independent and to meet our other ethical responsibilities in accordance with relevant ethical requirements relating to the engagement.

Our examination does not provide a legal determination on the University's compliance with the specified requirements.

In our opinion, the University complied with the specified requirements during:

- 1) the census data accumulation year for the System ended June 30, 2022;
- 2) the proportionate share allocation year for the System ended June 30, 2023;
- 3) the census data accumulation year for the Plan administered by CMS ended June 30, 2022; and,
- 4) the proportionate share allocation year for the Plan ended June 30, 2023,

in all material respects. However, the results of our procedures disclosed instances of noncompliance with the specified requirements, which are required to be reported in accordance with criteria established by the *Audit Guide* and are described in the accompanying Schedule of Findings as item 2023-001.

The University's response to the census data compliance finding identified in our examination is described in the accompanying Schedule of Findings. The University's response was not subjected to the procedures applied in the examination and, accordingly, we express no opinion on the response.

The purpose of this report is solely to describe the scope of our testing and the results of that testing in accordance with the requirements of the *Audit Guide*. Accordingly, this report is not suitable for any other purpose.

Report on Internal Control Over Compliance

Management of the University is responsible for establishing and maintaining effective internal control over compliance with the specified requirements (internal control). In planning and performing our examination, we considered the University's internal control to determine the examination procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the University's compliance with the specified requirements and to test and report on the University's internal control in accordance with the *Audit Guide*, but not for the purpose of expressing an opinion on the effectiveness of the University's internal control. Accordingly, we do not express an opinion on the effectiveness of the University's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with the specified requirements on a timely basis. *A material weakness in internal control* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that material noncompliance with the specified requirements will not be prevented, or detected and corrected, on a timely basis. *A significant deficiency in internal control* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and, therefore, material weaknesses or significant deficiencies may exist that have not been identified. We did identify certain deficiencies in internal control, described in the accompanying Schedule of Findings as item 2023-001, that we consider to be a material weakness.

The University's response to the internal control finding identified in our examination is described in the accompanying Schedule of Findings. The University's response was not subjected to the procedures applied in the examination and, accordingly, we express no opinion on the response.

The purpose of this report is solely to describe the scope of our testing of internal control and the results of that testing based on the requirements of the *Audit Guide*. Accordingly, this report is not suitable for any other purpose.

SIGNED ORIGINAL ON FILE

Decatur, Illinois
February 21, 2024

State of Illinois
Eastern Illinois University
Schedule of Findings
For the Year Ended June 30, 2023

2023-001. Finding – Inadequate Internal Controls over Census Data

The Eastern Illinois University (University) did not have adequate internal control over reporting its census data and did not have a reconciliation process to provide assurance census data submitted to its pension and other postemployment benefits (OPEB) plans was complete and accurate.

Census data is demographic data (date of birth, gender, years of service, etc.) of the active, inactive, or retired members of a pension or OPEB plan. The accumulation of inactive or retired members' census data occurs before the current accumulation period of census data used in the plan's actuarial valuation (which eventually flows into each employer's financial statements), meaning the plan is solely responsible for establishing internal controls over these records and transmitting the data to the plan's actuary. In contrast, responsibility for active members' census data during the current accumulation period is split among the plan and each member's current employer(s). Initially, employers must accurately transmit census data elements of their employees to the plan. Then, the plan must record and retain these records for active employees and then transmit this census data to the plan's actuary.

We noted the University's employees are members of the State Universities Retirement System (SURS) for their pensions and the State Employees Group Insurance Program sponsored by the State of Illinois, Department of Central Management Services (CMS) for their OPEB. In addition, we noted these plans have characteristics of different types of pension and OPEB plans, including single employer plans and cost-sharing multiple-employer plans. Additionally, CMS' actuary uses census data for employees of the State's public universities provided by SURS, along with census data for the other participating members provided by the State's four other pensions plans, to prepare their projection of the liabilities of CMS' plan. Finally, SURS' actuary and CMS' actuary used census data transmitted by the University during Fiscal Year 2022 to project pension and OPEB-related balances and activity at the plans during Fiscal Year 2023, which is incorporated into the University's Fiscal Year 2024 financial statements.

During testing, we noted the following:

- The University had not performed an initial complete reconciliation of its census data recorded by SURS to its internal records to establish a base year of complete and accurate census data.
- After establishing a base year, the University had not developed a process to annually obtain from SURS the incremental changes recorded by SURS in their census data records and reconcile these changes back to the University's internal supporting records.

State of Illinois
Eastern Illinois University
Schedule of Findings
For the Year Ended June 30, 2023

2023-001. Finding – Inadequate Internal Controls over Census Data (Continued)

- During our previous cut-off testing of data transmitted by the University to SURS, we noted 2 instances of an inactive employee becoming active were reported to SURS after the close of the fiscal year in which the event occurred. We also noted 4 instances whereby service credit was different by a total of 6.50 years. All of these instances have been previously reported, however still impacted the June 30, 2022 census data.
- During our testing of instructor eligibility testing, we noted 19 instructors were not reported as eligible to participate in SURS by the University. All of these instances have been previously reported, however still impacted the June 30, 2022 census data. SURS determined the total potential impact of these errors was the instructors' service credit was off by a combined 41.5 years.

We provided SURS' actuary and CMS' actuary with the exceptions we identified during our testing, along with the results of census data testing at the State Employees Retirement System of Illinois, and determined the net effect of these errors, along with the errors of other plan participants, was immaterial to SURS' and CMS' pension and OPEB-related balances and activity at the plans during Fiscal Year 2023.

The Fiscal Control and Internal Auditing Act (30 ILCS 10/3001) requires the University establish and maintain a system, or systems, of internal fiscal and administrative controls to provide assurance funds applicable to operations are properly recorded and accounted for to permit the preparation of reliable financial reports and to maintain accountability over the State's resources.

Additionally, eligibility criteria for participation in SURS under the Illinois Pension Code (Code) (40 ILCS 5/15-134(a)) states any person who is an employee of the University becomes a participant in SURS. Under the Code (40 ILCS 5/15-107), an employee is any member of the educational, administrative, secretarial, clerical, mechanical, labor, or other staff of an employer whose employment in a position in which services are expected to be rendered on a continuous basis for at least four months or an academic term, whichever is less:

- 1) not a student employed on a less than full-time temporary basis;
- 2) not receiving a retirement or disability annuity from SURS;
- 3) not on military leave;
- 4) not eligible to participate in the Federal Civil Service Retirement System,
- 5) not currently on a leave of absence without pay more than 60 days after the termination of SURS' disability benefits;
- 6) not paid from funds received under the Federal Comprehensive Employment and Training Act as a public service employment program participant hired on or after July 1, 1979;
- 7) not a patient in a hospital or home;

State of Illinois
Eastern Illinois University
Schedule of Findings
For the Year Ended June 30, 2023

2023-001. Finding – Inadequate Internal Controls over Census Data (Continued)

- 8) not an employee compensated solely on a fee basis where such income would net earnings from self-employment;
- 9) not providing military courses pursuant to a federally-funded contract where the University has filed a written notice with SURS electing to exclude these persons from the definition of an employee;
- 10) currently on lay-off status of not more than 120 days after the lay-off date;
- 11) not on an absence without pay of more than 30 days; and,
- 12) a nonresident alien on a visa defined under subparagraphs (F), (J), (M), or (Q) of Section 1101(a)(15) of Title 8 of the United States Code who (1) has met the Internal Revenue Service’s substantial presence test and (2) became an employee on and after July 1, 1991.

In addition, the Code (40 ILCS 5/15-157) requires the University to, at a minimum, withhold contributions of each employee’s total compensation of 8% (9.5% for firefighters or police officers) for their participation in SURS, unless further contributions by the employee would either exceed the maximum retirement annuity in the Code (40 ILCS 5/15-136(c)) or the Tier 2 earnings limitation within the Code (40 ILCS 5/15-111(b)), and remit these amounts to SURS. Further, the Code (40 ILCS 5/15-155(b)) requires the University remit employer contributions to SURS reflecting the accruing normal costs of an employee paid from federal or trust funds.

Finally, for CMS’ OPEB plan, we noted participation in OPEB is derivative of an employee’s eligibility to participate in SURS, as members of SURS participate in OPEB as annuitants under the State Employees Group Insurance Act of 1971 (Act) (5 ILCS 375/3(b)).

University officials indicated the base year reconciliation process was not established until Fiscal Year 2021, which is currently being performed by University staff. In addition, they indicated the late reported events were due to employees being paid one pay period after the occurrence of the reporting event. For example, a retirement that occurs on June 30, would still have one pay to be made in July. The timing of that payment would depend on whether the employee was a bi-weekly or monthly employee. Finally, they indicated the instructors were not reported to SURS due to the University utilizing a different reasonable and good faith interpretation of the Code’s eligibility requirements.

Failure to ensure complete and accurate census data was reported to SURS reduces the overall reliability of pension and OPEB-related balances and activity reported in the University’s financial statements, the financial statements of other employers within both plans, and the State of Illinois’ Annual Comprehensive Financial Report. Further, failure to

State of Illinois
Eastern Illinois University
Schedule of Findings
For the Year Ended June 30, 2023

2023-001. Finding – Inadequate Internal Controls over Census Data (Continued)

report all eligible employees to SURS may result in employees not receiving the pension and OPEB benefits they are entitled to receive under the Code and the Act. (Finding Code No. 2023-001, 2022-001, 2021-001)

RECOMMENDATION

We recommend the University continue to work with SURS to complete the base year reconciliation of Fiscal Year 2021 active members' census data from its underlying records to a report of census data submitted to SURS' actuary and CMS' actuary. After completing an initial full reconciliation, the University may limit the annual reconciliations to focus on the incremental changes to the census data file from the prior actuarial valuation, provided no risks are identified that incomplete or inaccurate reporting of census data may have occurred during prior periods. Any errors identified during this process should be promptly corrected by either the University or SURS, with the impact of these errors communicated to both SURS' actuary and CMS' actuary.

Further, we recommend the University ensure all events occurring within a census data accumulation year are timely reported to SURS so these events can be incorporated into the census data provided to SURS' actuary and CMS' actuary.

Finally, we recommend the University ensure all eligible employees are reported to SURS, along with any required employee and employer contributions.

UNIVERSITY RESPONSE

The University accepts the recommendation. The University continues to work on the completion of the initial full reconciliation. The University will work to improve the reporting of all reportable events in accordance with the rules established by the Code and administrative rules.

MANAGEMENT ASSERTION LETTER

February 21, 2024

Pension Plan Auditors
FORVIS, LLP
225 North Water Street, Suite 400
Decatur, Illinois 62523

Ladies and Gentlemen:

We are responsible for the identification of, and compliance with, all aspects of laws, rules, and regulations applicable to identifying and enrolling eligible employees of the Governors State University (University) and reporting their significant elements of census data and related employer and/or employee contributions within the State Universities Retirement System (System) and the State Employees' Group Insurance Program (Plan) administered by the State of Illinois, Department of Central Management Services (CMS). We are responsible for and we have established and maintained an effective system of internal controls over the specified requirements. We have performed an evaluation of the University's compliance with the specified requirements during the applicable periods noted below. Based on this evaluation, we assert the University has materially complied with the specified requirements listed below.

- A. All of the University's employees required to be enrolled in the System in accordance with applicable laws, rules, and regulations were properly enrolled in the System during the census data accumulation year ended June 30, 2022.
- B. The changes in significant elements of census data for employees required to be enrolled in the System occurring during the census data accumulation year ended June 30, 2022, were completely and accurately reported by the University to the System. The significant elements of census data of the System include each employee's:
 - date of birth;
 - gender; and,
 - earned service credit.

- C. The changes in significant elements of census data for employees required to be enrolled in the System occurring during the census data accumulation year ended June 30, 2022, were completely and accurately reported by the University to CMS. The significant elements of census data of the Plan include each employee's:
- date of birth;
 - gender; and,
 - earned service credit.
- D. The employee and employer contributions remitted by the University to the System during the proportionate share allocation year ended June 30, 2023, were complete, accurate, and in accordance with applicable laws, rules, and regulations.

Yours truly,

Governors State University

Report on Compliance

As Special Assistant Auditors for the Auditor General of the State Universities Retirement System (System), we have examined compliance by management of the State of Illinois, Governors State University (University) with the specified requirements listed below, as more fully described in the *Audit Guide for Financial Audits and Compliance Attestation Engagements of Illinois State Agencies (Audit Guide)* as adopted by the Auditor General, during:

- 1) the census data accumulation year for the System ended June 30, 2022;
- 2) the proportionate share allocation year for the System ended June 30, 2023;
- 3) the census data accumulation year for the State Employees' Group Insurance Program (Plan) administered by the State of Illinois, Department of Central Management Services (CMS) ended June 30, 2022; and
- 4) the proportionate share allocation year for the Plan ended June 30, 2023.

Management of the University is responsible for compliance with the specified requirements. Our responsibility is to express an opinion on the University's compliance with the specified requirements based on our examination.

The specified requirements are:

- A. All of the University's employees required to be enrolled in the System in accordance with applicable laws, rules, and regulations were properly enrolled in the System during the census data accumulation year ended June 30, 2022.
- B. The changes in significant elements of census data for employees required to be enrolled in the System occurring during the census data accumulation year ended June 30, 2022, were completely and accurately reported by the University to the System.

The significant elements of census data of the System include each employee's:

- a. date of birth;
 - b. gender; and,
 - c. earned service credit.
- C. The changes in significant elements of census data for employees required to be enrolled in the Plan occurring during the census data accumulation year ended June 30, 2022, were completely and accurately reported by the System to CMS through the System.

The significant elements of census data of the System include each member's:

- a. date of birth;
 - b. gender; and,
 - c. earned service credit.
- D. The employee and/or employer contributions remitted by the University to the System during the proportionate share allocation year ended June 30, 2023, were complete, accurate, and in accordance with applicable laws, rules, and regulations.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants, the standards applicable to attestation engagements contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the Illinois State Auditing Act (Act), and the *Audit Guide*. Those standards, the Act, and the *Audit Guide* require that we plan and perform the examination to obtain reasonable assurance about whether the University complied with the specified requirements in all material respects. An examination involves performing procedures to obtain evidence about whether the University complied with the specified requirements. The nature, timing, and extent of the procedures selected depend on our judgement, including an assessment of the risks of material noncompliance with the specified requirements, whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

We are required to be independent and to meet our other ethical responsibilities in accordance with relevant ethical requirements relating to the engagement.

Our examination does not provide a legal determination on the University's compliance with the specified requirements.

In our opinion, the University complied with the specified requirements during:

- 1) the census data accumulation year for the System ended June 30, 2022;
- 2) the proportionate share allocation year for the System ended June 30, 2023;
- 3) the census data accumulation year for the Plan administered by CMS ended June 30, 2022; and,
- 4) the proportionate share allocation year for the Plan ended June 30, 2023,

in all material respects. However, the results of our procedures disclosed instances of noncompliance with the specified requirements, which are required to be reported in accordance with criteria established by the *Audit Guide* and are described in the accompanying Schedule of Findings as item 2023-001.

The University's response to the census data compliance finding identified in our examination is described in the accompanying Schedule of Findings. The University's response was not subjected to the procedures applied in the examination and, accordingly, we express no opinion on the response.

The purpose of this report is solely to describe the scope of our testing and the results of that testing in accordance with the requirements of the *Audit Guide*. Accordingly, this report is not suitable for any other purpose.

Report on Internal Control Over Compliance

Management of the University is responsible for establishing and maintaining effective internal control over compliance with the specified requirements (internal control). In planning and performing our examination, we considered the University's internal control to determine the examination procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the University's compliance with the specified requirements and to test and report on the University's internal control in accordance with the *Audit Guide*, but not for the purpose of expressing an opinion on the effectiveness of the University's internal control. Accordingly, we do not express an opinion on the effectiveness of the University's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with the specified requirements on a timely basis. *A material weakness in internal control* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that material noncompliance with the specified requirements will not be prevented, or detected and corrected, on a timely basis. *A significant deficiency in internal control* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and, therefore, material weaknesses or significant deficiencies may exist that have not been identified. We did identify certain deficiencies in internal control, described in the accompanying Schedule of Findings as item 2023-001, that we consider to be a significant deficiency.

The University's response to the internal control finding identified in our examination is described in the accompanying Schedule of Findings. The University's response was not subjected to the procedures applied in the examination and, accordingly, we express no opinion on the response.

The purpose of this report is solely to describe the scope of our testing of internal control and the results of that testing based on the requirements of the *Audit Guide*. Accordingly, this report is not suitable for any other purpose.

State of Illinois
Governors State University
Compliance Examination of Census Data
For the Year Ended June 30, 2023

2023-001. Finding – Inadequate Internal Controls over Census Data

The Governors State University (University) did not have adequate internal control over reporting its census data to provide assurance census data submitted to its pension and other postemployment benefits (OPEB) plans was complete and accurate.

Census data is demographic data (date of birth, gender, years of service, etc.) of the active, inactive, or retired members of a pension or OPEB plan. The accumulation of inactive or retired members' census data occurs before the current accumulation period of census data used in the plan's actuarial valuation (which eventually flows into each employer's financial statements), meaning the plan is solely responsible for establishing internal controls over these records and transmitting the data to the plan's actuary. In contrast, responsibility for active members' census data during the current accumulation period is split among the plan and each member's current employer(s). Initially, employers must accurately transmit census data elements of their employees to the plan. Then, the plan must record and retain these records for active employees and then transmit this census data to the plan's actuary.

We noted the University's employees are members of the State Universities Retirement System (SURS) for their pensions and the State Employees Group Insurance Program sponsored by the State of Illinois, Department of Central Management Services (CMS) for their OPEB. In addition, we noted these plans have characteristics of different types of pension and OPEB plans, including single employer plans and cost-sharing multiple-employer plans. Additionally, CMS' actuary uses census data for employees of the State's public universities provided by SURS, along with census data for the other participating members provided by the State's four other pensions plans, to prepare their projection of the liabilities of CMS' plan. Finally, SURS' actuary and CMS' actuary used census data transmitted by the University during Fiscal Year 2022 to project pension and OPEB-related balances and activity at the plans during Fiscal Year 2023, which is incorporated into the University's Fiscal Year 2024 financial statements.

During testing, we noted the following:

- During our cut-off testing of data transmitted by the University to SURS, we noted 3 instances of an inactive employee becoming active were reported to SURS after the close of the fiscal year in which the event occurred. These instances have been previously reported, however still impacted the June 30, 2022 census data. SURS determined the total potential impact of these errors was the instructors' service credit was off by a combined 6.75 years.

State of Illinois
Governors State University
Compliance Examination of Census Data
For the Year Ended June 30, 2023

2023-001. Finding – Inadequate Internal Controls over Census Data (Continued)

We provided SURS’ actuary and CMS’ actuary with the exceptions we identified during our testing, along with the results of census data testing at the State Employees Retirement System of Illinois, and determined the net effect of these errors, along with the errors of other plan participants, was immaterial to SURS’ and CMS’ pension and OPEB-related balances and activity at the plans during Fiscal Year 2023.

The Fiscal Control and Internal Auditing Act (30 ILCS 10/3001) requires the University establish and maintain a system, or systems, of internal fiscal and administrative controls to provide assurance funds applicable to operations are properly recorded and accounted for to permit the preparation of reliable financial reports and to maintain accountability over the State’s resources.

University officials indicated the University has established procedures to ensure census data events are reported to SURS timely and accurately. The 3 instances of late reported events occurred before the current procedures were put into place.

Failure to ensure complete and accurate census data was reported to SURS reduces the overall reliability of pension and OPEB-related balances and activity reported in the University’s financial statements, the financial statements of other employers within both plans, and the State of Illinois’ Annual Comprehensive Financial Report. (Finding Code No. 2023-001, 2022-001, 2021-001)

RECOMMENDATION

We recommend the University continue focus on the incremental changes to the census data file from the prior actuarial valuation, provided no risks are identified that incomplete or inaccurate reporting of census data may have occurred during prior periods. Any errors identified during this process should be promptly corrected by either the University or SURS, with the impact of these errors communicated to both SURS’ actuary and CMS’ actuary.

Further, we recommend the University ensure all events occurring within a census data accumulation year are timely reported to SURS so these events can be incorporated into the census data provided to SURS’ actuary and CMS’ actuary.

UNIVERSITY RESPONSE

The University agrees with this finding and accepts the recommendation. The University has already established procedures that will address timely and accurate reporting of census data events to SURS.

MANAGEMENT ASSERTION LETTER

February 21, 2024

Pension Plan Auditors
FORVIS, LLP
225 North Water Street, Suite 400
Decatur, Illinois 62523

Ladies and Gentlemen:

We are responsible for the identification of, and compliance with, all aspects of laws, rules, and regulations applicable to identifying and enrolling eligible employees of the Illinois State University (University) and reporting their significant elements of census data and related employer and/or employee contributions within the State Universities Retirement System (System). We are responsible for and we have established and maintained an effective system of internal controls over the specified requirements. We have performed an evaluation of the University's compliance with the specified requirements during the applicable periods noted below. Based on this evaluation, we assert the University has materially complied with the specified requirements listed below.

- A. All of the University's employees required to be enrolled in the System in accordance with applicable laws, rules, and regulations were properly enrolled in the System during the census data accumulation year ended June 30, 2022.
- B. The changes in significant elements of census data for employees required to be enrolled in the System occurring during the census data accumulation year ended June 30, 2022, were completely and accurately reported by the University to the System. The significant elements of census data of the System include each employee's:
 - date of birth;
 - gender; and,
 - earned service credit.
- C. The changes in significant elements of census data for employees required to be enrolled in the System occurring during the census data accumulation year ended June 30, 2022, were completely and accurately reported by the University to CMS. The significant elements of census data of the Plan include each employee's:
 - date of birth;
 - gender; and,

- earned service credit.

D. The employee and employer contributions remitted by the University to the System during the proportionate share allocation year ended June 30, 2023, were complete, accurate, and in accordance with applicable laws, rules, and regulations.

Yours truly,

Illinois State University

Report on Compliance

As Special Assistant Auditors for the Auditor General of the State Universities Retirement System (System), we have examined compliance by management of the State of Illinois, Illinois State University (University) with the specified requirements listed below, as more fully described in the *Audit Guide for Financial Audits and Compliance Attestation Engagements of Illinois State Agencies (Audit Guide)* as adopted by the Auditor General, during:

- 1) the census data accumulation year for the System ended June 30, 2022;
- 2) the proportionate share allocation year for the System ended June 30, 2023;
- 3) the census data accumulation year for the State Employees' Group Insurance Program (Plan) administered by the State of Illinois, Department of Central Management Services (CMS) ended June 30, 2022; and
- 4) the proportionate share allocation year for the Plan ended June 30, 2023.

Management of the University is responsible for compliance with the specified requirements. Our responsibility is to express an opinion on the University's compliance with the specified requirements based on our examination.

The specified requirements are:

- A. All of the University's employees required to be enrolled in the System in accordance with applicable laws, rules, and regulations were properly enrolled in the System during the census data accumulation year ended June 30, 2022.
- B. The changes in significant elements of census data for employees required to be enrolled in the System occurring during the census data accumulation year ended June 30, 2022, were completely and accurately reported by the University to the System.

The significant elements of census data of the System include each employee's:

- a. date of birth;
 - b. gender; and,
 - c. earned service credit.
- C. The changes in significant elements of census data for employees required to be enrolled in the Plan occurring during the census data accumulation year ended June 30, 2022, were completely and accurately reported by the System to CMS through the System.

The significant elements of census data of the System include each member's:

- a. date of birth;
 - b. gender; and,
 - c. earned service credit.
- D. The employee and/or employer contributions remitted by the University to the System during the proportionate share allocation year ended June 30, 2023, were complete, accurate, and in accordance with applicable laws, rules, and regulations.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants, the standards applicable to attestation engagements contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the Illinois State Auditing Act (Act), and the *Audit Guide*. Those standards, the Act, and the *Audit Guide* require that we plan and perform the examination to obtain reasonable assurance about whether the University complied with the specified requirements in all material respects. An examination involves performing procedures to obtain evidence about whether the University complied with the specified requirements. The nature, timing, and extent of the procedures selected depend on our judgement, including an assessment of the risks of material noncompliance with the specified requirements, whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

We are required to be independent and to meet our other ethical responsibilities in accordance with relevant ethical requirements relating to the engagement.

Our examination does not provide a legal determination on the University's compliance with the specified requirements.

In our opinion, the University complied with the specified requirements during:

- 1) the census data accumulation year for the System ended June 30, 2022;
- 2) the proportionate share allocation year for the System ended June 30, 2023;
- 3) the census data accumulation year for the Plan administered by CMS ended June 30, 2022; and,
- 4) the proportionate share allocation year for the Plan ended June 30, 2023,

in all material respects.

The purpose of this report is solely to describe the scope of our testing and the results of that testing in accordance with the requirements of the *Audit Guide*. Accordingly, this report is not suitable for any other purpose.

Report on Internal Control Over Compliance

Management of the University is responsible for establishing and maintaining effective internal control over compliance with the specified requirements (internal control). In planning and performing our examination, we considered the University's internal control to determine the examination procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the University's compliance with the specified requirements and to test and report on the University's internal control in accordance with the *Audit Guide*, but not for the purpose of expressing an opinion on the effectiveness of the University's internal control. Accordingly, we do not express an opinion on the effectiveness of the University's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with the specified requirements on a timely basis. *A material weakness in internal control* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that material noncompliance with the specified requirements will not be prevented, or detected and corrected, on a timely basis. *A significant deficiency in internal control* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our examination we didn't identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses or significant deficiencies may exist that have not been identified.

The purpose of this report is solely to describe the scope of our testing of internal control and the results of that testing based on the requirements of the *Audit Guide*. Accordingly, this report is not suitable for any other purpose.

Schedule of Prior Findings Not Repeated
For the Year Ended June 30, 2023

A. 2023-001. Finding – Inadequate Internal Controls over Census Data

During the prior examination, Illinois State University (University) did not have adequate internal control over reporting its census data and did not have a reconciliation process to provide assurance census data submitted to its pension and other postemployment benefits (OPEB) plans was complete and accurate. (Finding Code No. 2022-001)

During the current examination, the reconciliation was prepared and no other exceptions were noted in relation to the June 30, 2022 census data.

Report on Compliance

As Special Assistant Auditors for the Auditor General of the State Universities Retirement System (System), we have examined compliance by management of the State of Illinois, Northeastern Illinois University (University) with the specified requirements listed below, as more fully described in the *Audit Guide for Financial Audits and Compliance Attestation Engagements of Illinois State Agencies (Audit Guide)* as adopted by the Auditor General, during:

- 1) the census data accumulation year for the System ended June 30, 2022;
- 2) the proportionate share allocation year for the System ended June 30, 2023;
- 3) the census data accumulation year for the State Employees' Group Insurance Program (Plan) administered by the State of Illinois, Department of Central Management Services (CMS) ended June 30, 2022; and
- 4) the proportionate share allocation year for the Plan ended June 30, 2023.

Management of the University is responsible for compliance with the specified requirements. Our responsibility is to express an opinion on the University's compliance with the specified requirements based on our examination.

The specified requirements are:

- A. All of the University's employees required to be enrolled in the System in accordance with applicable laws, rules, and regulations were properly enrolled in the System during the census data accumulation year ended June 30, 2022.
- B. The changes in significant elements of census data for employees required to be enrolled in the System occurring during the census data accumulation year ended June 30, 2022, were completely and accurately reported by the University to the System.

The significant elements of census data of the System include each employee's:

- a. date of birth;
 - b. gender; and,
 - c. earned service credit.
- C. The changes in significant elements of census data for employees required to be enrolled in the Plan occurring during the census data accumulation year ended June 30, 2022, were completely and accurately reported by the System to CMS through the System.

The significant elements of census data of the System include each member's:

- a. date of birth;
 - b. gender; and,
 - c. earned service credit.
- D. The employee and/or employer contributions remitted by the University to the System during the proportionate share allocation year ended June 30, 2023, were complete, accurate, and in accordance with applicable laws, rules, and regulations.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants, the standards applicable to attestation engagements contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the Illinois State Auditing Act (Act), and the *Audit Guide*. Those standards, the Act, and the *Audit Guide* require that we plan and perform the examination to obtain reasonable assurance about whether the University complied with the specified requirements in all material respects. An examination involves performing procedures to obtain evidence about whether the University complied with the specified requirements. The nature, timing, and extent of the procedures selected depend on our judgement, including an assessment of the risks of material noncompliance with the specified requirements, whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

We are required to be independent and to meet our other ethical responsibilities in accordance with relevant ethical requirements relating to the engagement.

Our examination does not provide a legal determination on the University's compliance with the specified requirements.

In our opinion, the University complied with the specified requirements during:

- 1) the census data accumulation year for the System ended June 30, 2022;
- 2) the proportionate share allocation year for the System ended June 30, 2023;
- 3) the census data accumulation year for the Plan administered by CMS ended June 30, 2022; and,
- 4) the proportionate share allocation year for the Plan ended June 30, 2023,

in all material respects. However, the results of our procedures disclosed instances of noncompliance with the specified requirements, which are required to be reported in accordance with criteria established by the *Audit Guide* and are described in the accompanying Schedule of Findings as item 2023-001.

The University's response to the census data compliance finding identified in our examination is described in the accompanying Schedule of Findings. The University's response was not subjected to the procedures applied in the examination and, accordingly, we express no opinion on the response.

The purpose of this report is solely to describe the scope of our testing and the results of that testing in accordance with the requirements of the *Audit Guide*. Accordingly, this report is not suitable for any other purpose.

Report on Internal Control Over Compliance

Management of the University is responsible for establishing and maintaining effective internal control over compliance with the specified requirements (internal control). In planning and performing our examination, we considered the University's internal control to determine the examination procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the University's compliance with the specified requirements and to test and report on the University's internal control in accordance with the *Audit Guide*, but not for the purpose of expressing an opinion on the effectiveness of the University's internal control. Accordingly, we do not express an opinion on the effectiveness of the University's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with the specified requirements on a timely basis. *A material weakness in internal control* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that material noncompliance with the specified requirements will not be prevented, or detected and corrected, on a timely basis. *A significant deficiency in internal control* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and, therefore, material weaknesses or significant deficiencies may exist that have not been identified. We did identify certain deficiencies in internal control, described in the accompanying Schedule of Findings as item 2023-001, that we consider to be a material weakness.

The University's response to the internal control finding identified in our examination is described in the accompanying Schedule of Findings. The University's response was not subjected to the procedures applied in the examination and, accordingly, we express no opinion on the response.

The purpose of this report is solely to describe the scope of our testing of internal control and the results of that testing based on the requirements of the *Audit Guide*. Accordingly, this report is not suitable for any other purpose.

SIGNED ORIGINAL ON FILE

Decatur, Illinois
February 21, 2024

State of Illinois
Northeastern Illinois University
Schedule of Findings
For the Year Ended June 30, 2023

2023-001. Finding – Inadequate Internal Controls over Census Data

The Northeastern Illinois University (University) did not have adequate internal control over reporting its census data and did not have a reconciliation process to provide assurance census data submitted to its pension and other postemployment benefits (OPEB) plans was complete and accurate.

Census data is demographic data (date of birth, gender, years of service, etc.) of the active, inactive, or retired members of a pension or OPEB plan. The accumulation of inactive or retired members' census data occurs before the current accumulation period of census data used in the plan's actuarial valuation (which eventually flows into each employer's financial statements), meaning the plan is solely responsible for establishing internal controls over these records and transmitting the data to the plan's actuary. In contrast, responsibility for active members' census data during the current accumulation period is split among the plan and each member's current employer(s). Initially, employers must accurately transmit census data elements of their employees to the plan. Then, the plan must record and retain these records for active employees and then transmit this census data to the plan's actuary.

We noted the University's employees are members of the State Universities Retirement System (SURS) for their pensions and the State Employees Group Insurance Program sponsored by the State of Illinois, Department of Central Management Services (CMS) for their OPEB. In addition, we noted these plans have characteristics of different types of pension and OPEB plans, including single employer plans and cost-sharing multiple-employer plans. Additionally, CMS' actuary uses census data for employees of the State's public universities provided by SURS, along with census data for the other participating members provided by the State's four other pensions plans, to prepare their projection of the liabilities of CMS' plan. Finally, SURS' actuary and CMS' actuary used census data transmitted by the University during Fiscal Year 2022 to project pension and OPEB-related balances and activity at the plans during Fiscal Year 2023, which is incorporated into the University's Fiscal Year 2024 financial statements.

During testing, we noted the following:

- The University had not performed an initial complete reconciliation of its census data recorded by SURS to its internal records to establish a base year of complete and accurate census data.
- After establishing a base year, the University had not developed a process to annually obtain from SURS the incremental changes recorded by SURS in their census data records and reconcile these changes back to the University's internal supporting records.

State of Illinois
Northeastern Illinois University
Schedule of Findings
For the Year Ended June 30, 2023

2023-001. Finding – Inadequate Internal Controls over Census Data (Continued)

- During our cut-off testing of data transmitted by the University to SURS, we noted 1 instance of an active employee becoming inactive and 1 instance of an inactive employee becoming active were reported to SURS after the close of the fiscal year in which the event occurred. We also noted 1 instance whereby service credit was different by a total of $\frac{1}{4}$ of a year. These were previously reported, but still had an impact on the June 30, 2022 census data.

We provided SURS' actuary and CMS' actuary with the exceptions we identified during our testing, along with the results of census data testing at the State Employees Retirement System of Illinois, and determined the net effect of these errors, along with the errors of other plan participants, was immaterial to SURS' and CMS' pension and OPEB-related balances and activity at the plans during Fiscal Year 2023.

The Fiscal Control and Internal Auditing Act (30 ILCS 10/3001) requires the University establish and maintain a system, or systems, of internal fiscal and administrative controls to provide assurance funds applicable to operations are properly recorded and accounted for to permit the preparation of reliable financial reports and to maintain accountability over the State's resources.

Additionally, eligibility criteria for participation in SURS under the Illinois Pension Code (Code) (40 ILCS 5/15-134(a)) states any person who is an employee of the University becomes a participant in SURS. Under the Code (40 ILCS 5/15-107), an employee is any member of the educational, administrative, secretarial, clerical, mechanical, labor, or other staff of an employer whose employment in a position in which services are expected to be rendered on a continuous basis for at least four months or an academic term, whichever is less:

- 1) not a student employed on a less than full-time temporary basis;
- 2) not receiving a retirement or disability annuity from SURS;
- 3) not on military leave;
- 4) not eligible to participate in the Federal Civil Service Retirement System,
- 5) not currently on a leave of absence without pay more than 60 days after the termination of SURS' disability benefits;
- 6) not paid from funds received under the Federal Comprehensive Employment and Training Act as a public service employment program participant hired on or after July 1, 1979;
- 7) not a patient in a hospital or home;
- 8) not an employee compensated solely on a fee basis where such income would net earnings from self-employment;
- 9) not providing military courses pursuant to a federally-funded contract where the University has filed a written notice with SURS electing to exclude these persons from the definition of an employee;

State of Illinois
Northeastern Illinois University
Schedule of Findings
For the Year Ended June 30, 2023

2023-001. Finding – Inadequate Internal Controls over Census Data (Continued)

- 10) currently on lay-off status of not more than 120 days after the lay-off date;
- 11) not on an absence without pay of more than 30 days; and,
- 12) a nonresident alien on a visa defined under subparagraphs (F), (J), (M), or (Q) of Section 1101(a)(15) of Title 8 of the United States Code who (1) has met the Internal Revenue Service’s substantial presence test and (2) became an employee on and after July 1, 1991.

In addition, the Code (40 ILCS 5/15-157) requires the University to, at a minimum, withhold contributions of each employee’s total compensation of 8% (9.5% for firefighters or police officers) for their participation in SURS, unless further contributions by the employee would either exceed the maximum retirement annuity in the Code (40 ILCS 5/15-136(c)) or the Tier 2 earnings limitation within the Code (40 ILCS 5/15-111(b)), and remit these amounts to SURS. Further, the Code (40 ILCS 5/15-155(b)) requires the University remit employer contributions to SURS reflecting the accruing normal costs of an employee paid from federal or trust funds.

Finally, for CMS’ OPEB plan, we noted participation in OPEB is derivative of an employee’s eligibility to participate in SURS, as members of SURS participate in OPEB as annuitants under the State Employees Group Insurance Act of 1971 (Act) (5 ILCS 375/3(b)).

University officials indicated the competing priorities during the implementation of Workday and the impact of staff turnover resulted in delays. The biographical data was provided to SURS and the remaining item needed in FY23 salary information. Given that NEIU moved from Banner to Workday in April 2023, the required data to complete this request needs to be pulled from two databases to complete this task and is currently underway.

Failure to ensure complete and accurate census data was reported to SURS reduces the overall reliability of pension and OPEB-related balances and activity reported in the University’s financial statements, the financial statements of other employers within both plans, and the State of Illinois’ Annual Comprehensive Financial Report. Further, failure to report all eligible employees to SURS may result in employees not receiving the pension and OPEB benefits they are entitled to receive under the Code and the Act. (Finding Code No. 2023-001, 2022-001, 2021-001)

State of Illinois
Northeastern Illinois University
Schedule of Findings
For the Year Ended June 30, 2023

2023-001. Finding – Inadequate Internal Controls over Census Data (Continued)

RECOMMENDATION

We recommend the University continue to work with SURS to complete the base year reconciliation of Fiscal Year 2021 active members' census data from its underlying records to a report of census data submitted to SURS' actuary and CMS' actuary. After completing an initial full reconciliation, the University may limit the annual reconciliations to focus on the incremental changes to the census data file from the prior actuarial valuation, provided no risks are identified that incomplete or inaccurate reporting of census data may have occurred during prior periods. Any errors identified during this process should be promptly corrected by either the University or SURS, with the impact of these errors communicated to both SURS' actuary and CMS' actuary.

Further, we recommend the University ensure all events occurring within a census data accumulation year are timely reported to SURS so these events can be incorporated into the census data provided to SURS' actuary and CMS' actuary.

UNIVERSITY RESPONSE

NEIU agrees with the recommendation.

MANAGEMENT ASSERTION LETTER

February 21, 2024

Pension Plan Auditors
FORVIS, LLP
225 North Water Street, Suite 400
Decatur, Illinois 62523

Ladies and Gentlemen:

We are responsible for the identification of, and compliance with, all aspects of laws, rules, and regulations applicable to identifying and enrolling eligible employees of the Northern Illinois University (University) and reporting their significant elements of census data and related employer and/or employee contributions within the State Universities Retirement System (System). We are responsible for and we have established and maintained an effective system of internal controls over the specified requirements. We have performed an evaluation of the University's compliance with the specified requirements during the applicable periods noted below. Based on this evaluation, we assert the University has materially complied with the specified requirements listed below.

- A. All of the University's employees required to be enrolled in the System in accordance with applicable laws, rules, and regulations were properly enrolled in the System during the census data accumulation year ended June 30, 2022.
- B. The changes in significant elements of census data for employees required to be enrolled in the System occurring during the census data accumulation year ended June 30, 2022, were completely and accurately reported by the University to the System. The significant elements of census data of the System include each employee's:
 - date of birth;
 - gender; and,
 - earned service credit.
- C. The changes in significant elements of census data for employees required to be enrolled in the System occurring during the census data accumulation year ended June 30, 2022, were completely and accurately reported by the University to CMS. The significant elements of census data of the Plan include each employee's:
 - date of birth;
 - gender; and,

- earned service credit.

D. The employee and employer contributions remitted by the University to the System during the proportionate share allocation year ended June 30, 2023, were complete, accurate, and in accordance with applicable laws, rules, and regulations.

Yours truly,

Northern Illinois University

Report on Compliance

As Special Assistant Auditors for the Auditor General of the State Universities Retirement System (System), we have examined compliance by management of the State of Illinois, Northern Illinois University (University) with the specified requirements listed below, as more fully described in the *Audit Guide for Financial Audits and Compliance Attestation Engagements of Illinois State Agencies (Audit Guide)* as adopted by the Auditor General, during:

- 1) the census data accumulation year for the System ended June 30, 2022;
- 2) the proportionate share allocation year for the System ended June 30, 2023;
- 3) the census data accumulation year for the State Employees' Group Insurance Program (Plan) administered by the State of Illinois, Department of Central Management Services (CMS) ended June 30, 2022; and
- 4) the proportionate share allocation year for the Plan ended June 30, 2023.

Management of the University is responsible for compliance with the specified requirements. Our responsibility is to express an opinion on the University's compliance with the specified requirements based on our examination.

The specified requirements are:

- A. All of the University's employees required to be enrolled in the System in accordance with applicable laws, rules, and regulations were properly enrolled in the System during the census data accumulation year ended June 30, 2022.
- B. The changes in significant elements of census data for employees required to be enrolled in the System occurring during the census data accumulation year ended June 30, 2022, were completely and accurately reported by the University to the System.

The significant elements of census data of the System include each employee's:

- a. date of birth;
 - b. gender; and,
 - c. earned service credit.
- C. The changes in significant elements of census data for employees required to be enrolled in the Plan occurring during the census data accumulation year ended June 30, 2022, were completely and accurately reported by the System to CMS through the System.

The significant elements of census data of the System include each member's:

- a. date of birth;
 - b. gender; and,
 - c. earned service credit.
- D. The employee and/or employer contributions remitted by the University to the System during the proportionate share allocation year ended June 30, 2023, were complete, accurate, and in accordance with applicable laws, rules, and regulations.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants, the standards applicable to attestation engagements contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the Illinois State Auditing Act (Act), and the *Audit Guide*. Those standards, the Act, and the *Audit Guide* require that we plan and perform the examination to obtain reasonable assurance about whether the University complied with the specified requirements in all material respects. An examination involves performing procedures to obtain evidence about whether the University complied with the specified requirements. The nature, timing, and extent of the procedures selected depend on our judgement, including an assessment of the risks of material noncompliance with the specified requirements, whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

We are required to be independent and to meet our other ethical responsibilities in accordance with relevant ethical requirements relating to the engagement.

Our examination does not provide a legal determination on the University's compliance with the specified requirements.

In our opinion, the University complied with the specified requirements during:

- 1) the census data accumulation year for the System ended June 30, 2022;
- 2) the proportionate share allocation year for the System ended June 30, 2023;
- 3) the census data accumulation year for the Plan administered by CMS ended June 30, 2022; and,
- 4) the proportionate share allocation year for the Plan ended June 30, 2023,

in all material respects. However, the results of our procedures disclosed instances of noncompliance with the specified requirements, which are required to be reported in accordance with criteria established by the *Audit Guide* and are described in the accompanying Schedule of Findings as item 2023-001.

The University's response to the census data compliance finding identified in our examination is described in the accompanying Schedule of Findings. The University's response was not subjected to the procedures applied in the examination and, accordingly, we express no opinion on the response.

The purpose of this report is solely to describe the scope of our testing and the results of that testing in accordance with the requirements of the *Audit Guide*. Accordingly, this report is not suitable for any other purpose.

Report on Internal Control Over Compliance

Management of the University is responsible for establishing and maintaining effective internal control over compliance with the specified requirements (internal control). In planning and performing our examination, we considered the University's internal control to determine the examination procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the University's compliance with the specified requirements and to test and report on the University's internal control in accordance with the *Audit Guide*, but not for the purpose of expressing an opinion on the effectiveness of the University's internal control. Accordingly, we do not express an opinion on the effectiveness of the University's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with the specified requirements on a timely basis. *A material weakness in internal control* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that material noncompliance with the specified requirements will not be prevented, or detected and corrected, on a timely basis. *A significant deficiency in internal control* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and, therefore, material weaknesses or significant deficiencies may exist that have not been identified. We did identify certain deficiencies in internal control, described in the accompanying Schedule of Findings as item 2023-001, that we consider to be a significant deficiency.

The University's response to the internal control finding identified in our examination is described in the accompanying Schedule of Findings. The University's response was not subjected to the procedures applied in the examination and, accordingly, we express no opinion on the response.

The purpose of this report is solely to describe the scope of our testing of internal control and the results of that testing based on the requirements of the *Audit Guide*. Accordingly, this report is not suitable for any other purpose.

State of Illinois
Northern Illinois University
Compliance Examination of Census Data
For the Year Ended June 30, 2023

2023-001. Finding – Inadequate Internal Controls over Census Data

The Northern Illinois University (University) did not have adequate internal control over reporting its census data to provide assurance census data submitted to its pension and other postemployment benefits (OPEB) plans was complete and accurate.

Census data is demographic data (date of birth, gender, years of service, etc.) of the active, inactive, or retired members of a pension or OPEB plan. The accumulation of inactive or retired members' census data occurs before the current accumulation period of census data used in the plan's actuarial valuation (which eventually flows into each employer's financial statements), meaning the plan is solely responsible for establishing internal controls over these records and transmitting the data to the plan's actuary. In contrast, responsibility for active members' census data during the current accumulation period is split among the plan and each member's current employer(s). Initially, employers must accurately transmit census data elements of their employees to the plan. Then, the plan must record and retain these records for active employees and then transmit this census data to the plan's actuary.

We noted the University's employees are members of the State Universities Retirement System (SURS) for their pensions and the State Employees Group Insurance Program sponsored by the State of Illinois, Department of Central Management Services (CMS) for their OPEB. In addition, we noted these plans have characteristics of different types of pension and OPEB plans, including single employer plans and cost-sharing multiple-employer plans. Additionally, CMS' actuary uses census data for employees of the State's public universities provided by SURS, along with census data for the other participating members provided by the State's four other pensions plans, to prepare their projection of the liabilities of CMS' plan. Finally, SURS' actuary and CMS' actuary used census data transmitted by the University during Fiscal Year 2022 to project pension and OPEB-related balances and activity at the plans during Fiscal Year 2023, which is incorporated into the University's Fiscal Year 2024 financial statements.

During testing, we noted the following:

- During our cut-off testing of data transmitted by the University to SURS, we noted 35 instances of an active employee becoming inactive were reported to SURS after the close of the fiscal year in which the event occurred. There were also 2 instances previously reported that still impacted the June 30, 2022 census data.

We provided SURS' actuary and CMS' actuary with the exceptions we identified during our testing, along with the results of census data testing at the State Employees Retirement System of Illinois, and determined the net effect of these errors, along with the errors of other plan participants, was immaterial to SURS' and CMS' pension and OPEB-related balances and activity at the plans during Fiscal Year 2023.

State of Illinois
Northern Illinois University
Compliance Examination of Census Data
For the Year Ended June 30, 2023

2023-001. Finding – Inadequate Internal Controls over Census Data (Continued)

The Fiscal Control and Internal Auditing Act (30 ILCS 10/3001) requires the University establish and maintain a system, or systems, of internal fiscal and administrative controls to provide assurance funds applicable to operations are properly recorded and accounted for to permit the preparation of reliable financial reports and to maintain accountability over the State's resources.

University officials indicated that the exceptions occurred due to untimely processing of status changes for employees separating from the University at the end of the fiscal year. The other two incidents are considered isolated events carried over from prior testing due to the lag in the underlying census data and timing of testing and compliance examination reporting.

Failure to ensure complete and accurate census data was reported to SURS reduces the overall reliability of pension and OPEB-related balances and activity reported in the University's financial statements, the financial statements of other employers within both plans, and the State of Illinois' Annual Comprehensive Financial Report. (Finding Code No. 2023-001, 2022-001, 2021-001)

RECOMMENDATION

We recommend the University ensure all events occurring within a census data accumulation year are timely and accurately reported to SURS so these events can be incorporated into the census data provided to SURS' actuary and CMS' actuary.

UNIVERSITY RESPONSE

Accepted. The University procedure for salaried employees is to complete an event after final vacation payout has been paid to the employee. Vacation payouts are paid the pay period after an employee terminates. The University has prioritized processing of status changes before the end of the fiscal year to ensure that they are completed within 30-days of the vacation payout. Due to the one year lag in the underlying census data relative to the compliance examination of census data report, implementation of corrective action will not take effect until the fiscal 2024 census data which will be reported in the compliance examination of census data for the year ended June 30, 2025.

Report on Compliance

As Special Assistant Auditors for the Auditor General of the State Universities Retirement System (System), we have examined compliance by management of the State of Illinois, Southern Illinois University (University) with the specified requirements listed below, as more fully described in the *Audit Guide for Financial Audits and Compliance Attestation Engagements of Illinois State Agencies (Audit Guide)* as adopted by the Auditor General, during:

- 1) the census data accumulation year for the System ended June 30, 2022;
- 2) the proportionate share allocation year for the System ended June 30, 2023;
- 3) the census data accumulation year for the State Employees' Group Insurance Program (Plan) administered by the State of Illinois, Department of Central Management Services (CMS) ended June 30, 2022; and
- 4) the proportionate share allocation year for the Plan ended June 30, 2023.

Management of the University is responsible for compliance with the specified requirements. Our responsibility is to express an opinion on the University's compliance with the specified requirements based on our examination.

The specified requirements are:

- A. All of the University's employees required to be enrolled in the System in accordance with applicable laws, rules, and regulations were properly enrolled in the System during the census data accumulation year ended June 30, 2022.
- B. The changes in significant elements of census data for employees required to be enrolled in the System occurring during the census data accumulation year ended June 30, 2022, were completely and accurately reported by the University to the System.

The significant elements of census data of the System include each employee's:

- a. date of birth;
 - b. gender; and,
 - c. earned service credit.
- C. The changes in significant elements of census data for employees required to be enrolled in the Plan occurring during the census data accumulation year ended June 30, 2022, were completely and accurately reported by the System to CMS through the System.

The significant elements of census data of the System include each member's:

- a. date of birth;
 - b. gender; and,
 - c. earned service credit.
- D. The employee and/or employer contributions remitted by the University to the System during the proportionate share allocation year ended June 30, 2023, were complete, accurate, and in accordance with applicable laws, rules, and regulations.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants, the standards applicable to attestation engagements contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the Illinois State Auditing Act (Act), and the *Audit Guide*. Those standards, the Act, and the *Audit Guide* require that we plan and perform the examination to obtain reasonable assurance about whether the University complied with the specified requirements in all material respects. An examination involves performing procedures to obtain evidence about whether the University complied with the specified requirements. The nature, timing, and extent of the procedures selected depend on our judgement, including an assessment of the risks of material noncompliance with the specified requirements, whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

We are required to be independent and to meet our other ethical responsibilities in accordance with relevant ethical requirements relating to the engagement.

Our examination does not provide a legal determination on the University's compliance with the specified requirements.

In our opinion, the University complied with the specified requirements during:

- 1) the census data accumulation year for the System ended June 30, 2022;
- 2) the proportionate share allocation year for the System ended June 30, 2023;
- 3) the census data accumulation year for the Plan administered by CMS ended June 30, 2022; and,
- 4) the proportionate share allocation year for the Plan ended June 30, 2023,

in all material respects.

The purpose of this report is solely to describe the scope of our testing and the results of that testing in accordance with the requirements of the *Audit Guide*. Accordingly, this report is not suitable for any other purpose.

Report on Internal Control Over Compliance

Management of the University is responsible for establishing and maintaining effective internal control over compliance with the specified requirements (internal control). In planning and performing our examination, we considered the University's internal control to determine the examination procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the University's compliance with the specified requirements and to test and report on the University's internal control in accordance with the *Audit Guide*, but not for the purpose of expressing an opinion on the effectiveness of the University's internal control. Accordingly, we do not express an opinion on the effectiveness of the University's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with the specified requirements on a timely basis. *A material weakness in internal control* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that material noncompliance with the specified requirements will not be prevented, or detected and corrected, on a timely basis. *A significant deficiency in internal control* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our examination we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses or significant deficiencies may exist that have not been identified.

The purpose of this report is solely to describe the scope of our testing of internal control and the results of that testing based on the requirements of the *Audit Guide*. Accordingly, this report is not suitable for any other purpose.

Report on Compliance

As Special Assistant Auditors for the Auditor General of the State Universities Retirement System (System), we have examined compliance by management of the State of Illinois, University of Illinois (University) with the specified requirements listed below, as more fully described in the *Audit Guide for Financial Audits and Compliance Attestation Engagements of Illinois State Agencies (Audit Guide)* as adopted by the Auditor General, during:

- 1) the census data accumulation year for the System ended June 30, 2022;
- 2) the proportionate share allocation year for the System ended June 30, 2023;
- 3) the census data accumulation year for the State Employees' Group Insurance Program (Plan) administered by the State of Illinois, Department of Central Management Services (CMS) ended June 30, 2022; and
- 4) the proportionate share allocation year for the Plan ended June 30, 2023.

Management of the University is responsible for compliance with the specified requirements. Our responsibility is to express an opinion on the University's compliance with the specified requirements based on our examination.

The specified requirements are:

- A. All of the University's employees required to be enrolled in the System in accordance with applicable laws, rules, and regulations were properly enrolled in the System during the census data accumulation year ended June 30, 2022.
- B. The changes in significant elements of census data for employees required to be enrolled in the System occurring during the census data accumulation year ended June 30, 2022, were completely and accurately reported by the University to the System.

The significant elements of census data of the System include each employee's:

- a. date of birth;
 - b. gender; and,
 - c. earned service credit.
- C. The changes in significant elements of census data for employees required to be enrolled in the Plan occurring during the census data accumulation year ended June 30, 2022, were completely and accurately reported by the System to CMS through the System.

The significant elements of census data of the System include each member's:

- a. date of birth;
 - b. gender; and,
 - c. earned service credit.
- D. The employee and/or employer contributions remitted by the University to the System during the proportionate share allocation year ended June 30, 2023, were complete, accurate, and in accordance with applicable laws, rules, and regulations.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants, the standards applicable to attestation engagements contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the Illinois State Auditing Act (Act), and the *Audit Guide*. Those standards, the Act, and the *Audit Guide* require that we plan and perform the examination to obtain reasonable assurance about whether the University complied with the specified requirements in all material respects. An examination involves performing procedures to obtain evidence about whether the University complied with the specified requirements. The nature, timing, and extent of the procedures selected depend on our judgement, including an assessment of the risks of material noncompliance with the specified requirements, whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

We are required to be independent and to meet our other ethical responsibilities in accordance with relevant ethical requirements relating to the engagement.

Our examination does not provide a legal determination on the University's compliance with the specified requirements.

In our opinion, the University complied with the specified requirements during:

- 1) the census data accumulation year for the System ended June 30, 2022;
- 2) the proportionate share allocation year for the System ended June 30, 2023;
- 3) the census data accumulation year for the Plan administered by CMS ended June 30, 2022; and,
- 4) the proportionate share allocation year for the Plan ended June 30, 2023,

in all material respects. However, the results of our procedures disclosed instances of noncompliance with the specified requirements, which are required to be reported in accordance with criteria established by the *Audit Guide* and are described in the accompanying Schedule of Findings as item 2023-001.

The University's response to the census data compliance finding identified in our examination is described in the accompanying Schedule of Findings. The University's response was not subjected to the procedures applied in the examination and, accordingly, we express no opinion on the response.

The purpose of this report is solely to describe the scope of our testing and the results of that testing in accordance with the requirements of the *Audit Guide*. Accordingly, this report is not suitable for any other purpose.

Report on Internal Control Over Compliance

Management of the University is responsible for establishing and maintaining effective internal control over compliance with the specified requirements (internal control). In planning and performing our examination, we considered the University's internal control to determine the examination procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the University's compliance with the specified requirements and to test and report on the University's internal control in accordance with the *Audit Guide*, but not for the purpose of expressing an opinion on the effectiveness of the University's internal control. Accordingly, we do not express an opinion on the effectiveness of the University's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with the specified requirements on a timely basis. *A material weakness in internal control* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that material noncompliance with the specified requirements will not be prevented, or detected and corrected, on a timely basis. *A significant deficiency in internal control* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and, therefore, material weaknesses or significant deficiencies may exist that have not been identified. We did identify certain deficiencies in internal control, described in the accompanying Schedule of Findings as item 2023-001, that we consider to be a significant deficiency.

The University's response to the internal control finding identified in our examination is described in the accompanying Schedule of Findings. The University's response was not subjected to the procedures applied in the examination and, accordingly, we express no opinion on the response.

The purpose of this report is solely to describe the scope of our testing of internal control and the results of that testing based on the requirements of the *Audit Guide*. Accordingly, this report is not suitable for any other purpose.

Schedule of Findings
For the Year Ended June 30, 2023

2023-001. Finding – Inadequate Internal Controls over Census Data

The University of Illinois (University) did not have adequate internal control over reporting its census data to provide assurance census data submitted to its pension and other postemployment benefits (OPEB) plans was complete and accurate.

Census data is demographic data (date of birth, gender, years of service, etc.) of the active, inactive, or retired members of a pension or OPEB plan. The accumulation of inactive or retired members' census data occurs before the current accumulation period of census data used in the plan's actuarial valuation (which eventually flows into each employer's financial statements), meaning the plan is solely responsible for establishing internal controls over these records and transmitting the data to the plan's actuary. In contrast, responsibility for active members' census data during the current accumulation period is split among the plan and each member's current employer(s). Initially, employers must accurately transmit census data elements of their employees to the plan. Then, the plan must record and retain these records for active employees and then transmit this census data to the plan's actuary.

We noted the University's employees are members of the State Universities Retirement System (SURS) for their pensions and the State Employees Group Insurance Program sponsored by the State of Illinois, Department of Central Management Services (CMS) for their OPEB. In addition, we noted these plans have characteristics of different types of pension and OPEB plans, including single employer plans and cost-sharing multiple-employer plans. Additionally, CMS' actuary uses census data for employees of the State's public universities provided by SURS, along with census data for the other participating members provided by the State's four other pensions plans, to prepare their projection of the liabilities of CMS' plan. Finally, SURS' actuary and CMS' actuary used census data transmitted by the University during Fiscal Year 2022 to project pension and OPEB-related balances and activity at the plans during Fiscal Year 2023, which is incorporated into the University's Fiscal Year 2024 financial statements.

During testing, we noted the following:

- During our cut-off testing of data transmitted by the University to SURS, we noted 1 instance of an active employee becoming inactive and 1 instance of inactive employee becoming active that were reported to SURS after the close of the fiscal year in which the event occurred.

University of Illinois
Schedule of Findings
For the Year Ended June 30, 2023

2023-001. Finding – Inadequate Internal Controls over Census Data (Continued)

We provided SURS' actuary and CMS' actuary with the exceptions we identified during our testing, along with the results of census data testing at the State Employees Retirement System of Illinois, and determined the net effect of these errors, along with the errors of other plan participants, was immaterial to SURS' and CMS' pension and OPEB-related balances and activity at the plans during Fiscal Year 2023.

The Fiscal Control and Internal Auditing Act (30 ILCS 10/3001) requires the University establish and maintain a system, or systems, of internal fiscal and administrative controls to provide assurance funds applicable to operations are properly recorded and accounted for to permit the preparation of reliable financial reports and to maintain accountability over the State's resources.

In addition, the Code (40 ILCS 5/15-157) requires the University to, at a minimum, withhold contributions of each employee's total compensation of 8% (9.5% for firefighters or police officers) for their participation in SURS, unless further contributions by the employee would either exceed the maximum retirement annuity in the Code (40 ILCS 5/15-136(c)) or the Tier 2 earnings limitation within the Code (40 ILCS 5/15-111(b)), and remit these amounts to SURS. Further, the Code (40 ILCS 5/15-155(b)) requires the University remit employer contributions to SURS reflecting the accruing normal costs of an employee paid from federal or trust funds.

Finally, for CMS' OPEB plan, we noted participation in OPEB is derivative of an employee's eligibility to participate in SURS, as members of SURS participate in OPEB as annuitants under the State Employees Group Insurance Act of 1971 (Act) (5 ILCS 375/3(b)).

University officials indicated transactions impacting this census data accumulation period were not reported in a timely manner because of coding issues used in certain automated processes, and significant workload at the unit level.

Failure to ensure complete and accurate census data was reported to SURS reduces the overall reliability of pension and OPEB-related balances and activity reported in the University's financial statements, the financial statements of other employers within both plans, and the State of Illinois' Annual Comprehensive Financial Report. Further, failure to report all eligible employees to SURS may result in employees not receiving the pension and OPEB benefits they are entitled to receive under the Code and the Act. (Finding Code No. 2023-001, 2022-001, 2021-001)

State of Illinois
University of Illinois

For the Year Ended June 30, 2023

2023-001. Finding – Inadequate Internal Controls over Census Data (Continued)

RECOMMENDATION

We recommend the University continue to focus on the incremental changes to the census data file from the prior actuarial valuation, provided no risks are identified that incomplete or inaccurate reporting of census data may have occurred during prior periods. Any errors identified during this process should be promptly corrected by either the University or SURS, with the impact of these errors communicated to both SURS' actuary and CMS' actuary.

Further, we recommend the University ensure all events occurring within a census data accumulation year are timely reported to SURS so these events can be incorporated into the census data provided to SURS' actuary and CMS' actuary.

Finally, we recommend the University ensure all eligible employees are reported to SURS, along with any required employee and employer contributions.

UNIVERSITY RESPONSE

Accepted. With 73,000 employees, the University has numerous electronic and manual controls in place to ensure that employees who are eligible for SURS and OPEB are identified correctly. The University also has numerous controls over census data for the University's 33,000 employees eligible for SURS and OPEB benefits. However, the University acknowledges its controls over census data did not always ensure timely reporting of employee events to SURS. The University will continue to enhance controls to improve the timeliness of reporting certain employee events impacting pension and OPEB census data.

MANAGEMENT ASSERTION LETTER

February 21, 2024

Pension Plan Auditors
FORVIS, LLP
225 North Water Street, Suite 400
Decatur, Illinois 62523

Ladies and Gentlemen:

We are responsible for the identification of, and compliance with, all aspects of laws, rules, and regulations applicable to identifying and enrolling eligible employees of the Western Illinois University (University) and reporting their significant elements of census data and related employer and/or employee contributions within the State Universities Retirement System (System). We are responsible for and we have established and maintained an effective system of internal controls over the specified requirements. We have performed an evaluation of the University's compliance with the specified requirements during the applicable periods noted below. Based on this evaluation, we assert the University has materially complied with the specified requirements listed below.

- A. All of the University's employees required to be enrolled in the System in accordance with applicable laws, rules, and regulations were properly enrolled in the System during the census data accumulation year ended June 30, 2022.
- B. The changes in significant elements of census data for employees required to be enrolled in the System occurring during the census data accumulation year ended June 30, 2022, were completely and accurately reported by the University to the System. The significant elements of census data of the System include each employee's:
 - date of birth;
 - gender; and,
 - earned service credit.
- C. The changes in significant elements of census data for employees required to be enrolled in the System occurring during the census data accumulation year ended June 30, 2022, were completely and accurately reported by the University to CMS. The significant elements of census data of the Plan include each employee's:
 - date of birth;
 - gender; and,
 - earned service credit.

D. The employee and employer contributions remitted by the University to the System during the proportionate share allocation year ended June 30, 2023, were complete, accurate, and in accordance with applicable laws, rules, and regulations.

Yours truly,

Western Illinois University

Report on Compliance

As Special Assistant Auditors for the Auditor General of the State Universities Retirement System (System), we have examined compliance by management of the State of Illinois, Western Illinois University (University) with the specified requirements listed below, as more fully described in the *Audit Guide for Financial Audits and Compliance Attestation Engagements of Illinois State Agencies (Audit Guide)* as adopted by the Auditor General, during:

- 1) the census data accumulation year for the System ended June 30, 2022;
- 2) the proportionate share allocation year for the System ended June 30, 2023;
- 3) the census data accumulation year for the State Employees' Group Insurance Program (Plan) administered by the State of Illinois, Department of Central Management Services (CMS) ended June 30, 2022; and
- 4) the proportionate share allocation year for the Plan ended June 30, 2023.

Management of the University is responsible for compliance with the specified requirements. Our responsibility is to express an opinion on the University's compliance with the specified requirements based on our examination.

The specified requirements are:

- A. All of the University's employees required to be enrolled in the System in accordance with applicable laws, rules, and regulations were properly enrolled in the System during the census data accumulation year ended June 30, 2022.
- B. The changes in significant elements of census data for employees required to be enrolled in the System occurring during the census data accumulation year ended June 30, 2022, were completely and accurately reported by the University to the System.

The significant elements of census data of the System include each employee's:

- a. date of birth;
 - b. gender; and,
 - c. earned service credit.
- C. The changes in significant elements of census data for employees required to be enrolled in the Plan occurring during the census data accumulation year ended June 30, 2022, were completely and accurately reported by the System to CMS through the System.

The significant elements of census data of the System include each member's:

- a. date of birth;
 - b. gender; and,
 - c. earned service credit.
- D. The employee and/or employer contributions remitted by the University to the System during the proportionate share allocation year ended June 30, 2023, were complete, accurate, and in accordance with applicable laws, rules, and regulations.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants, the standards applicable to attestation engagements contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the Illinois State Auditing Act (Act), and the *Audit Guide*. Those standards, the Act, and the *Audit Guide* require that we plan and perform the examination to obtain reasonable assurance about whether the University complied with the specified requirements in all material respects. An examination involves performing procedures to obtain evidence about whether the University complied with the specified requirements. The nature, timing, and extent of the procedures selected depend on our judgement, including an assessment of the risks of material noncompliance with the specified requirements, whether due to fraud or error. We believe that the evidence we obtained is sufficient and appropriate to provide a reasonable basis for our opinion.

We are required to be independent and to meet our other ethical responsibilities in accordance with relevant ethical requirements relating to the engagement.

Our examination does not provide a legal determination on the University's compliance with the specified requirements.

In our opinion, the University complied with the specified requirements during:

- 1) the census data accumulation year for the System ended June 30, 2022;
- 2) the proportionate share allocation year for the System ended June 30, 2023;
- 3) the census data accumulation year for the Plan administered by CMS ended June 30, 2022; and,
- 4) the proportionate share allocation year for the Plan ended June 30, 2023,

in all material respects.

The purpose of this report is solely to describe the scope of our testing and the results of that testing in accordance with the requirements of the *Audit Guide*. Accordingly, this report is not suitable for any other purpose.

Report on Internal Control Over Compliance

Management of the University is responsible for establishing and maintaining effective internal control over compliance with the specified requirements (internal control). In planning and performing our examination, we considered the University's internal control to determine the examination procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the University's compliance with the specified requirements and to test and report on the University's internal control in accordance with the *Audit Guide*, but not for the purpose of expressing an opinion on the effectiveness of the University's internal control. Accordingly, we do not express an opinion on the effectiveness of the University's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with the specified requirements on a timely basis. *A material weakness in internal control* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that material noncompliance with the specified requirements will not be prevented, or detected and corrected, on a timely basis. *A significant deficiency in internal control* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our examination we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses or significant deficiencies may exist that have not been identified.

The purpose of this report is solely to describe the scope of our testing of internal control and the results of that testing based on the requirements of the *Audit Guide*. Accordingly, this report is not suitable for any other purpose.
