

CROSSING SAFETY IMPROVEMENT PROGRAM

FY 2020 - 2024 Plan

PROPOSED GRADE CROSSING PROTECTION FUND
PROJECTS FOR LOCAL ROADS AND STREETS

ILLINOIS COMMERCE COMMISSION
APRIL 2019

ILLINOIS COMMERCE COMMISSION

April 2, 2019

The Honorable JB Pritzker
Governor, State of Illinois

The Honorable John J. Cullerton
Senate President

The Honorable William E. Brady
Senate Republican Leader

The Honorable Michael J. Madigan
House Speaker

The Honorable James B. Durkin
House Republican Leader

Re: FY 2020-2024 Crossing Safety Improvement Program 5-Year Plan

Dear Governor Pritzker and Members of the Legislative Leadership:

Pursuant to Public Act 90-659, the Illinois Commerce Commission is pleased to announce the FY 2020-2024 Crossing Safety Improvement Program 5-Year Plan. The Plan outlines safety improvements at highway-rail grade crossings and bridges located on local roads and streets throughout the State of Illinois.

The Commission plans to authorize over \$250 million from the Grade Crossing Protection Fund for new grade crossing safety improvements and highway-rail grade separations over the course of this five-year horizon at nearly 800 crossing locations. Assuming local funding matches are available in a timely manner, we expect to initiate:

- 17 new or reconstructed highway-rail grade separations;
- 4 new pedestrian-rail grade separations;
- Automatic warning device installations or circuitry upgrades at over 250 highway-rail grade crossings; and
- Low-cost improvements at over 500 crossings.

As always, the Commission's goal is to maximize the efficient use of the Grade Crossing Protection Fund in the course of achieving the greatest amount of public safety per dollar spent.

Should you have questions, or need clarification about any of the information presented, please contact Michelle Kelm, Director of Governmental Affairs, at (217) 524-0619.

Sincerely,

A handwritten signature in blue ink that reads "Brien J. Sheahan".

Brien J. Sheahan
Chairman

INTRODUCTION

The Illinois Commerce Commission (ICC) has the statutory responsibility to improve safety at public highway-rail crossings in the State of Illinois. Currently, there are 7,595 highway-rail grade crossings in Illinois, of which 763 are on state roads, and 6,832 are on local roads. There are 2,667 highway-rail grade-separated crossings (bridges) in the state. Another 3,589 grade crossings are on private property, which are not under the jurisdiction of the state, and there are also 136 private bridge structures. There are also 323 pedestrian grade crossings and 104 pedestrian grade separated crossings (bridges) in Illinois. Nationally, Illinois is second only to Texas in the total number of highway-rail crossings. Table A summarizes the distribution of highway-rail crossings by type and position.

Table A
Illinois Highway-Rail Crossings

Crossing Type	Crossing Position	Crossings
Public Roadway	At-Grade	7,595
	RR Over	1,719
	RR Under	948
Pedestrian Pathway	At-Grade	323
	RR Over	68
	RR Under	36
Total		10,689

The ICC orders safety improvements at public highway-rail crossings on the local road system, with the cost of such improvements paid by the state, the railroads, and local governments. On state roads, the Illinois Department of Transportation (IDOT) pays the majority of the costs through the State Road Fund. For local roads, the Grade Crossing Protection Fund (GCPF) was created to pay the majority of the costs of improvements.

RAILROAD CROSSING SAFETY — THE THREE E's

Illinois is one of the key transportation hubs in the nation. With approximately 7,376 miles of railroad track, its rail system is the country's second largest, including the nation's largest rail freight hub in Chicago. Illinois has the nation's third largest highway system, with 147,005 miles of highways, streets and roads and 26,783 bridges as of December 2017.

Both the rail and highway systems are among the most heavily used in the nation in terms of volume of traffic, with much of the traffic concentrated in the Chicago metropolitan region. There, the urban mass transit system provided over 588 million passenger trips in 2017 over an extensive network of bus and rail routes.

Keeping the grade crossing portion of this transportation network operating safely and efficiently involves local, state and federal governments as well as the private sector. These safety efforts can be summarized as the Three E's - **Education, Engineering and Enforcement**.

Education: The ICC is actively involved in developing programs to educate the public about the danger at highway-rail grade crossings. One example of this public education program is the ICC's participation in Operation Lifesaver. The Operation Lifesaver program is a public-private partnership designed to increase public awareness of grade crossing hazards. It also strives to improve driver and pedestrian behavior at railroad crossings by encouraging compliance with traffic laws relating to crossing signs and signals.

Enforcement: Enforcement of existing traffic and trespass laws is key. For instance, persons crossing railroad tracks after the warning signals have activated may be fined up to \$500 for the 1st offense and \$1000 for 2nd offense, or ordered to complete community service.

Engineering: Grade crossing safety improvements are also critical to reducing collisions. The ICC orders physical and system improvements, including the installation and upgrading of grade crossing warning signs and signals and, where warranted, grade separations. While education and enforcement are absolutely essential, the focus of this report is the engineering of capital improvements to further railroad crossing safety on local roads.

2018 IN REVIEW - Collision and Casualty Rates

In 2018, preliminary statistics indicate there were 82 collisions at public crossings in Illinois, compared to 88 in 2017, a decrease of 6.8 percent. National preliminary figures for 2018 indicate 1,829 collisions occurred, compared to 1,838 in 2017, which is a 0.5 percent decrease.

10 Year Trend in Collisions at Public Crossings: USA

(Note: Data Provided by the Federal Railroad Administration)

10 Year Trend in Collisions at Public Crossings: Illinois

(Note: Data Provided by the Federal Railroad Administration)

The general public commonly thinks of grade crossing collisions as involving trains colliding with cars, and in most incidents that is the case; however, each year a substantial number of collisions involve motor vehicles driving into the sides of trains. In 2018, 31.7% (26 of 82) of all collisions involved cars driving into the sides of trains, a percentage which has remained constant over the years. The 26 vehicle-train collisions in 2018 resulted in four fatalities and eight injuries.

Total fatalities resulting from collisions at highway-rail crossings in Illinois decreased from 25 in 2017 to 19 in 2018. Fatality statistics, however, are not a particularly good measure of safety. Fatalities are a function of random events, such as how many occupants were riding in a car involved in a collision, or multiple fatalities involved in the same incident (as in the death of eleven passengers involved in the Amtrak/steel truck collision that occurred near Bourbonnais, in 1999). Table B illustrates the distribution of fatalities by collision type in 2018.

Table B
Illinois Highway-Rail Grade Crossing Collisions

Type of Collision	Total Collisions	Fatal Collisions	Total Fatalities
Train Struck Vehicle	39	4	4
Vehicle Struck Train	26	4	4
Pedestrian	17	11	11
Total	82	19	19

RAILROAD CROSSING SAFETY FUNDING

The Grade Crossing Protection Fund (GCPF), appropriated to the Illinois Department of Transportation but administered by the ICC, was created by state law to assist local jurisdictions (counties, townships and municipalities) in paying for safety improvements at highway-railroad crossings on local roads and streets only. Assistance from the GCPF cannot be used for safety improvements at highway-rail crossings located on the state road or highway system. Those improvements are paid for by the Illinois Department of Transportation. Beginning with Fiscal Year 2010, each month \$3.25 million in state motor fuel tax receipts is transferred from the Motor Fuel Tax (MFT) fund to the Grade Crossing Protection Fund. This amount provides the GCPF with \$39 million annually to be used for safety improvements at highway-rail crossings on local roads and streets. The GCPF is typically used to help pay for the following types of projects:

- **Warning Device Upgrades:** Installation of automatic flashing light signals and gates at public grade crossings currently not equipped with automatic warning devices; installation of automatic flashing light signals and gates at public grade crossings currently equipped only with automatic flashing light signals; signal circuitry improvements at public grade crossings currently equipped only with automatic warning devices;
- **Grade Separations - New and Reconstructed:** Construction, reconstruction, or repair of bridges carrying a local road or street over railroad tracks (overpass); construction, reconstruction, or repair of bridges carrying railroad tracks over a local road or street (subway);
- **Grade Separations - Vertical Clearance Improvements:** Lowering the existing highway pavement surface under a railroad bridge to improve vertical clearance for motor vehicles;
- **Pedestrian Grade Separations:** Construction of a bridge to carry pedestrian/bicycle traffic over or under railroad tracks;
- **Interconnects:** Upgrading the circuitry at grade crossings where warning signals are connected to the adjacent traffic signals so that the two systems operate in a synchronized manner;
- **Highway Approaches:** Improvements to the portion of the public roadway directly adjacent to the crossing surface;
- **Connecting Roads:** Construction of a roadway between a closed crossing and an adjacent open, improved crossing;
- **Remote Monitoring Devices:** Sensor devices in the circuitry of grade crossing warning devices which immediately alert the railroad to any failures in warning device operations;
- **Crossing Closures:** Provide an incentive payment to local agencies for the voluntarily closure of public highway-rail grade crossings; and
- **Crossing Surface Renewals:** Up to \$2 million in assistance annually can be allocated for crossing surface improvements.

The cost of railroad crossing safety improvements varies substantially depending on the nature of the work undertaken. A standard installation of gates with automatic flashing light signals on a two-lane road typically costs approximately \$300,000. Additional costs for road improvements could typically range from \$2,000 to \$100,000, depending on the road type and location. Grade separation structures are very costly. The GCPF has made contributions to pavement lowering (vertical clearance improvements) projects costing between \$35,000 - \$4 million, and to new underpass structures costing more than \$50 million. Bridges over railroads can cost from \$600,000 for a rural structure to over \$40 million for a multi-lane multi-railroad urban structure. Typically, the ICC authorizes contributions from GCPF that pay up to 60% of the cost for grade separation projects and 85% to 95% for grade crossing improvements. ICC policy is to allocate no more than \$12 million from the GCPF to any individual project unless unusual circumstances warrant otherwise. When the numbers of crossing locations needing improvement are multiplied by project costs, the problem of allocating sufficient assistance from the GCPF becomes apparent.

CROSSING SAFETY IMPROVEMENT PROJECTS

This report presents the railroad crossing safety capital improvements that ICC staff proposes to implement during FY 2020 and looks ahead to the projects contemplated for FY 2021-FY 2024. In all cases it is assumed that any required local funding match will be available. In some cases, local funding may not be available during the same fiscal year in which a crossing improvement has been programmed. In those circumstances the Rail Safety Section staff will recommend to the ICC that assistance from the GCPF for the project be reallocated to another fiscal year to accommodate the local agency.

The ICC receives numerous requests from local communities and railroads for assistance from the Grade Crossing Protection Fund for safety improvements at public highway-rail crossings. During development of each multi-year crossing safety improvement program plan, the large number of potential projects requires the ICC to prioritize projects based upon several criteria, including the relative safety of the existing crossing and the volume and types of existing train and highway traffic. After each potential project is prioritized based on engineering requirements, geographic location is also considered so safety improvements throughout the state can be addressed as equitably as possible. Projects not selected for the Plan are considered again as part of future 5-Year Plans.

The project list for Fiscal Year 2020 (July 1, 2019 through June 30, 2020) includes capital improvement projects that local governments or railroads have previously submitted to the ICC for evaluation and approval, as well as projects based on established priorities. The project list for FY 2021-2024 (out-year list) includes projects based on a continued effort to meet those established priorities:

- **High Collision History** - Each year the ICC places a high priority on upgrading public highway-rail grade crossings which have a pronounced history of train/vehicle collisions, or which have a high predictive value for future collisions. The FY 2020-2024 Plan will address safety improvements at as many of these crossing locations as possible.
- **Rail Corridors** - The ICC has identified as a priority the need to improve public highway-rail grade crossings in rail corridors where conventional speed passenger trains operate.
- **Highway and Pedestrian Grade Separations (Bridges)** - The ICC is continually seeking locations where grade crossing blockages cause substantial motorist or emergency vehicle delay, or where heavy vehicular traffic represents a heightened threat of train/vehicle collisions. This Plan includes funding assistance for numerous highway/rail bridge projects on local roads and streets throughout the state.

The ICC also has authority to utilize the GCPF to assist local communities with the cost of constructing pedestrian grade separations in areas where it is necessary to improve safety. This Plan includes funding assistance for several pedway/rail bridge projects throughout the state.

- **Interconnected Crossings** - The ICC and IDOT are continuing a program to identify and improve highway-rail grade crossings that require the interconnection of crossing warning signals with traffic control signals at adjacent highway intersections.

FY 2020 PLAN

Projects programmed for submittal to the ICC in FY 2020 are listed in Appendix 1. In FY 2020 it is anticipated the ICC will consider projects requiring commitments from the GCPF totaling nearly \$50 million, including over \$28 million for bridge projects.

In FY 2020, the ICC will also set aside \$5 million from the GCPF in contingency funds to address emergency projects which may require rapid resolution; experimental crossing safety projects; low-cost safety improvements at multiple crossings; and incentive payments to local agencies for the voluntary closure of public highway-rail grade crossings. It is anticipated that in the next four years the contingency funds will be used to help pay for low-cost improvements [replacement of incandescent flashing light signals with light emitting diode (LED) flashing light signals, for example] involving approximately 100 crossings not currently equipped with LED flashing light signals. These projects are summarized in Table C.

TABLE C		
FY 2020 Projects by Project Type		
Total Estimated Assistance from the GCPF		
PROJECT TYPE	CROSSINGS	\$MILLIONS
Highway-Rail Bridge Projects	4	27.4
Pedestrian-Rail Bridge Project	1	0.9
Grade Crossing Improvement Projects	42	14.5
Low-Cost Emergency Projects; Experimental Projects; Voluntary Crossing Closure Incentive Payments; Crossing Surface Renewals	100 (Est) ¹	7.0
¹ (Exact number of crossings in this category yet to be determined)		
Total	147 (Est)¹	49.8

NOTE: At the time the FY 2020 portion of the Plan was prepared, it was anticipated that assistance from the GCPF would be available for each project noted in Appendix 1. GCPF assistance may cease for certain projects should the General Assembly fail to appropriate, or otherwise not make available, sufficient funds.

FY 2021 – 2024 PLAN

Projects programmed for submittal to the ICC in FY 2021-2024 are listed in Appendix 2. For those four years, it is anticipated the ICC will consider projects requiring commitments from the GCPF totaling over \$203 million, affecting over 600 crossings in over 70 counties. In addition, \$20 million from the GCPF will be set aside in contingency funds during FY 2021-2024. These projects are summarized in Table D.

TABLE D		
FY 2021-2024 Projects by Project Type		
Total Estimated Assistance from the GCPF		
<u>PROJECT TYPE</u>	<u>CROSSINGS</u>	<u>\$MILLIONS</u>
Bridge Projects (13 Highway-Rail Bridges; 3 Pedestrian-Rail Bridges)	16	90.5
Grade Crossing Improvement Projects	211	84.7
Low-Cost Emergency Projects; Experimental Projects; Voluntary Crossing Closure Incentive Payments; Crossing Surface Renewals	400 (Est) ¹	28.0
¹ (Exact number of crossings in this category yet to be determined)		
Totals	627 (Est)¹	203.2

NOTE: At the time the FY 2021-2024 portion of the Plan was prepared, it was anticipated that assistance from the GCPF would be available for each project noted in Appendix 2. GCPF assistance may cease for certain projects should the General Assembly fail to appropriate, or otherwise not make available, sufficient funds.

FY 19 PROJECTS

Projects programmed for FY 2019 are listed in Appendix 3. It is currently estimated that the ICC will issue Orders authorizing nearly \$74 million in GCPF assistance for safety improvement projects at over 1300 crossings in over 50 counties throughout the state by June 30, 2019. These projects are summarized in Table E below. Appendix 3 lists each individual project with specific location and cost information.

TABLE E		
Projects by Project Type		
Amount of GCPF Assistance Approved by the ICC		
<u>PROJECT TYPE</u>	<u>CROSSINGS</u>	<u>\$MILLIONS</u>
