1 AMENDMENT TO HOUSE BILL 4146

2 AMENDMENT NO. \_\_\_\_\_. Amend House Bill 4146 by replacing  
3 everything after the enacting clause with the following:

4 "Section 5. The Managed Care Reform and Patient Rights Act  
5 is amended by changing Section 25 as follows:

6 (215 ILCS 134/25)

7 Sec. 25. Transition of services.

8 (a) A health care plan shall provide for continuity of care  
9 for its enrollees as follows:

10 (1) If an enrollee's physician leaves the health care  
11 plan's network of health care providers for reasons other  
12 than termination of a contract in situations involving  
13 imminent harm to a patient or a final disciplinary action  
14 by a State licensing board and the physician remains within  
15 the health care plan's service area, the health care plan  
16 shall permit the enrollee to continue an ongoing course of

1 treatment with that physician during a transitional  
2 period:

3 (A) of 90 days from the date of the notice of  
4 physician's termination from the health care plan to  
5 the enrollee of the physician's disaffiliation from  
6 the health care plan if the enrollee has an ongoing  
7 course of treatment; or

8 (B) if the enrollee has entered the third trimester  
9 of pregnancy at the time of the physician's  
10 disaffiliation, that includes the provision of  
11 post-partum care directly related to the delivery.

12 (2) Notwithstanding the provisions in item (1) of this  
13 subsection, such care shall be authorized by the health  
14 care plan during the transitional period only if the  
15 physician agrees:

16 (A) to continue to accept reimbursement from the  
17 health care plan at the rates applicable prior to the  
18 start of the transitional period;

19 (B) to adhere to the health care plan's quality  
20 assurance requirements and to provide to the health  
21 care plan necessary medical information related to  
22 such care; and

23 (C) to otherwise adhere to the health care plan's  
24 policies and procedures, including but not limited to  
25 procedures regarding referrals and obtaining  
26 preauthorizations for treatment.

1           (3) During an enrollee's plan year, a health care plan  
2           shall not remove a drug from its formulary or negatively  
3           change its preferred or cost-tier sharing unless, at least  
4           60 days before making the formulary change, the health care  
5           plan:

6                   (A) provides general notification of the change in  
7                   its formulary to current and prospective enrollees;

8                   (B) directly notifies enrollees currently  
9                   receiving coverage for the drug, including information  
10                   on the specific drugs involved and the steps they may  
11                   take to request coverage determinations and  
12                   exceptions, including a statement that a certification  
13                   of medical necessity by the enrollee's prescribing  
14                   provider will result in continuation of coverage at the  
15                   existing level; and

16                   (C) directly notifies by first class mail and  
17                   through an electronic transmission, if available, the  
18                   prescribing provider of all health care plan enrollees  
19                   currently prescribed the drug affected by the proposed  
20                   change; the notice shall include a one-page form by  
21                   which the prescribing provider can notify the health  
22                   care plan by first class mail that coverage of the drug  
23                   for the enrollee is medically necessary.

24                   The notification in paragraph (C) may direct the  
25                   prescribing provider to an electronic portal through which  
26                   the prescribing provider may electronically file a

1       certification to the health care plan that coverage of the  
2       drug for the enrollee is medically necessary. The  
3       prescribing provider may make a secure electronic  
4       signature beside the words "certification of medical  
5       necessity", and this certification shall authorize  
6       continuation of coverage for the drug.

7       If the prescribing provider certifies to the health  
8       care plan either in writing or electronically that the drug  
9       is medically necessary for the enrollee as provided in  
10      paragraph (C), a health care plan shall authorize coverage  
11      for the drug prescribed based solely on the prescribing  
12      provider's assertion that coverage is medically necessary,  
13      and the health care plan is prohibited from making  
14      modifications to the coverage related to the covered drug,  
15      including, but not limited to:

16           (i) increasing the out-of-pocket costs for the  
17           covered drug;

18           (ii) moving the covered drug to a more restrictive  
19           tier; or

20           (iii) denying an enrollee coverage of the drug for  
21           which the enrollee has been previously approved for  
22           coverage by the health care plan.

23       Nothing in this item (3) prevents a health care plan  
24       from removing a drug from its formulary or denying an  
25       enrollee coverage if the United States Food and Drug  
26       Administration has issued a statement about the drug that

1       calls into question the clinical safety of the drug, the  
2       drug manufacturer has notified the United States Food and  
3       Drug Administration of a manufacturing discontinuance or  
4       potential discontinuance of the drug as required by Section  
5       506C of the Federal Food, Drug, and Cosmetic Act, as  
6       codified in 21 U.S.C. 356c, or the drug manufacturer has  
7       removed the drug from the market.

8       Nothing in this item (3) prohibits a health care plan,  
9       by contract, written policy or procedure, or any other  
10      agreement or course of conduct, from requiring a pharmacist  
11      to effect substitutions of prescription drugs consistent  
12      with Section 19.5 of the Pharmacy Practice Act, under which  
13      a pharmacist may substitute an interchangeable biologic  
14      for a prescribed biologic product, and Section 25 of the  
15      Pharmacy Practice Act, under which a pharmacist may select  
16      a generic drug determined to be therapeutically equivalent  
17      by the United States Food and Drug Administration and in  
18      accordance with the Illinois Food, Drug and Cosmetic Act.

19      This item (3) applies to a policy or contract that is  
20      amended, delivered, issued, or renewed on or after January  
21      1, 2019. This item (3) does not apply to a health plan as  
22      defined in the State Employees Group Insurance Act of 1971  
23      or medical assistance under Article V of the Illinois  
24      Public Aid Code.

25       (b) A health care plan shall provide for continuity of care  
26       for new enrollees as follows:

1           (1) If a new enrollee whose physician is not a member  
2 of the health care plan's provider network, but is within  
3 the health care plan's service area, enrolls in the health  
4 care plan, the health care plan shall permit the enrollee  
5 to continue an ongoing course of treatment with the  
6 enrollee's current physician during a transitional period:

7           (A) of 90 days from the effective date of  
8 enrollment if the enrollee has an ongoing course of  
9 treatment; or

10           (B) if the enrollee has entered the third trimester  
11 of pregnancy at the effective date of enrollment, that  
12 includes the provision of post-partum care directly  
13 related to the delivery.

14           (2) If an enrollee elects to continue to receive care  
15 from such physician pursuant to item (1) of this  
16 subsection, such care shall be authorized by the health  
17 care plan for the transitional period only if the physician  
18 agrees:

19           (A) to accept reimbursement from the health care  
20 plan at rates established by the health care plan; such  
21 rates shall be the level of reimbursement applicable to  
22 similar physicians within the health care plan for such  
23 services;

24           (B) to adhere to the health care plan's quality  
25 assurance requirements and to provide to the health  
26 care plan necessary medical information related to

1           such care; and

2                   (C) to otherwise adhere to the health care plan's  
3           policies and procedures including, but not limited to  
4           procedures regarding referrals and obtaining  
5           preauthorization for treatment.

6           (c) In no event shall this Section be construed to require  
7           a health care plan to provide coverage for benefits not  
8           otherwise covered or to diminish or impair preexisting  
9           condition limitations contained in the enrollee's contract. In  
10          no event shall this Section be construed to prohibit the  
11          addition of prescription drugs to a health care plan's list of  
12          covered drugs during the coverage year.

13          (Source: P.A. 91-617, eff. 7-1-00.)

14                Section 99. Effective date. This Act takes effect upon  
15          becoming law.".
