

HR0108

LRB100 10428 MST 20634 r

1 HOUSE RESOLUTION

2 WHEREAS, On September 17, 2008, the Electronic Products  
3 Recycling and Reuse Act, Public Act 95-0959, was enacted,  
4 setting forth procedures for the recycling and reuse of covered  
5 electronic devices in Illinois; and

6 WHEREAS, The Electronic Products Recycling and Reuse Act  
7 banned the disposal of covered electronic devices in landfills  
8 and incinerators beginning January 1, 2012; and

9 WHEREAS, To provide adequate collection of discarded  
10 electronic devices and comply with the disposal ban, more than  
11 500 collection sites statewide are currently registered with  
12 the Illinois Environmental Protection Agency (IEPA) to accept  
13 electronic wastes; and

14 WHEREAS, Local governments statewide have contracted with  
15 electronic waste processors and recyclers for collection,  
16 reuse, and recycling of discarded electronics, providing a  
17 vital service to their residents; and

18 WHEREAS, A significant component of the discarded  
19 electronic waste stream collected to date has been, and  
20 continues to be, cathode ray tube (CRT) devices, including  
21 televisions and computer monitors; and

1           WHEREAS, CRT glass contains lead at a sufficiently high  
2 concentration to meet the definition of hazardous waste,  
3 necessitating handling the glass in a manner that protects  
4 human health and the environment; and

5           WHEREAS, The principal recycling market for CRT glass was  
6 historically the production of new CRTs; and

7           WHEREAS, Demand for new CRTs historically provided an  
8 economic incentive to recycle CRT glass for use in the  
9 manufacturing of new CRTs, and recyclers received revenue for  
10 the CRT glass provided to CRT manufacturers; and

11           WHEREAS, New CRTs have essentially ceased to be purchased  
12 in the United States, and there are no CRT manufacturing  
13 facilities located in the United States; and

14           WHEREAS, All CRT glass used in the manufacturing of new  
15 CRTs is now exported to India to the single remaining CRT  
16 manufacturing facility in the world; and

17           WHEREAS, There exist limited additional available outlets  
18 for the legitimate recycling of CRT glass in the United States;  
19 and

1           WHEREAS, The quantity of CRT glass collected far exceeds  
2 current demand and available markets for the glass; and

3           WHEREAS, CRT glass processing and recycling now carries a  
4 substantial cost, a significant change since the Electronic  
5 Products Recycling and Reuse Act was enacted in 2008; and

6           WHEREAS, The increased cost to process CRT glass has caused  
7 a number of electronic waste collection programs operated by  
8 local governments in Illinois to bear the cost increases or to  
9 be discontinued to avoid accumulation of CRTs; and

10           WHEREAS, Stockpiles of abandoned CRT glass have been  
11 discovered at several former electronic waste processing  
12 facilities across the United States, due to the lack of markets  
13 for CRT glass and the high cost associated with existing  
14 markets; and

15           WHEREAS, Kuusakoski Recycling and Peoria Disposal Company  
16 (PDC), both Illinois-based businesses, developed and permitted  
17 a CRT glass solution, the KleanKover Recycling Solution,  
18 whereby CRT glass is treated to reduce the leachable lead  
19 levels in the glass (the principal environmental concern  
20 associated with CRTs) below stringent federal thresholds and  
21 placed as Alternative Daily Cover (ADC) in a permitted  
22 landfill; and

1           WHEREAS, Kuusakoski Recycling and PDC have successfully  
2 operated the KleanKover Recycling Solution since November of  
3 2013; and

4           WHEREAS, Given the lack of viable recycling markets, the  
5 IEPA has determined that treated CRT glass used as ADC can be  
6 counted towards manufacturer recycling goals under the  
7 Electronic Products Recycling and Reuse Act, as documented in  
8 IEPA correspondence to Kuusakoski Recycling on November 26,  
9 2013; and

10           WHEREAS, Sustainable Electronics Recycling International  
11 (SERI), administrators of the R2 Standard (a voluntary  
12 certification standard for electronic waste recyclers) has  
13 prohibited its certified recyclers from using the KleanKover  
14 Recycling Solution or any other use of CRT glass as ADC; and

15           WHEREAS, At least 11 government jurisdictions in Illinois,  
16 representing over 4.3 million people and with some of the most  
17 effective e-waste recycling programs in the U.S., have  
18 petitioned SERI to reconsider its position on CRT glass  
19 management, citing the need for additional CRT glass management  
20 options in the U.S.; and

21           WHEREAS, Basel Action Network (BAN), administrators of the

1 eStewards Standard (a separate voluntary certification  
2 standard for electronic waste recyclers) has defined any use of  
3 treated CRT glass within a disposal facility, including use as  
4 ADC, as a "last resort" option, effectively prohibiting use of  
5 the KleanKover Recycling Solution; and

6 WHEREAS, BAN has expressed interest in considering  
7 retrievable storage of CRT glass in permitted, monitored, and  
8 contained designated disposal sites as a preferred CRT glass  
9 management method; and

10 WHEREAS, In response to BAN's interest, PDC has proposed to  
11 develop a designated storage cell at its Indian Creek Landfill  
12 to provide storage and future retrieval of CRT glass, should  
13 markets develop to utilize the leaded glass; and

14 WHEREAS, The Indian Creek Landfill is fully permitted to  
15 develop the retrievable storage cell and accept treated CRT  
16 glass for placement in the cell, as confirmed by IEPA in a  
17 letter to PDC dated January 26, 2015; and

18 WHEREAS, PDC has established a perpetual care fund for the  
19 Indian Creek Landfill, consisting of a trust fund held by a  
20 third-party and available to Tazewell County (the host  
21 jurisdiction for the landfill), which provides funding to  
22 monitor and maintain the landfill into perpetuity, an even

1 greater level of financial and environmental protection than is  
2 required under state and federal regulations; and

3 WHEREAS, PDC hosted a tour at the Indian Creek Landfill on  
4 October 23, 2014 for approximately 35 attendees of the annual  
5 conference of the Illinois Counties Solid Waste Management  
6 Association (ILCSWMA) to show attendees how CRT glass is  
7 currently managed, present the plan for retrievable storage,  
8 and answer questions; and

9 WHEREAS, ILCSWMA conference attendees were subsequently  
10 polled to determine their support for allowing treated CRT  
11 glass to be placed in a landfill regardless of whether it is  
12 used as ADC or placed in a dedicated cell for retrievable  
13 storage, and attendees voiced nearly unanimous support of this  
14 option with only 2 of the approximately 60 participants  
15 dissenting; and

16 WHEREAS, Kuusakoski Recycling and PDC formally petitioned  
17 BAN on November 18, 2014 to modify its standard and allow, as  
18 an additional preferred CRT glass management option, the  
19 placement of treated CRT glass in a retrievable storage cell  
20 within a permitted disposal site which has a perpetual care  
21 fund established; and

22 WHEREAS, At least 10 government jurisdictions in Illinois

1 representing nearly 4 million people have sent letters to BAN  
2 in support of Kuusakoski Recycling and PDC's petition and  
3 urging BAN'S approval in order to maintain their vital  
4 electronic waste collection and recycling programs for their  
5 residents; and

6 WHEREAS, The option of retrievable storage of treated CRT  
7 glass in a dedicated cell at a permitted disposal site will  
8 provide needed environmentally protective, cost effective, and  
9 immediately available capacity for CRT glass, resulting in  
10 relief for residents, local governments, and recyclers across  
11 Illinois and the United States to manage this problematic  
12 material and reduce the potential for future discoveries of  
13 stockpiled material that would pose a significant  
14 environmental threat; therefore, be it

15 RESOLVED, BY THE HOUSE OF REPRESENTATIVES OF THE ONE  
16 HUNDREDTH GENERAL ASSEMBLY OF THE STATE OF ILLINOIS, that we  
17 urge the Basel Action Network and the e-Stewards Leadership  
18 Council to approve the pending petition submitted by Kuusakoski  
19 Recycling and Peoria Disposal Company to allow the placement of  
20 treated CRT glass into a dedicated retrievable storage cell in  
21 a permitted disposal facility; and be it further

22 RESOLVED, That suitable copies of this resolution be  
23 delivered to the Executive Director of the Basel Action Network

1 and the policy director of the Basel Action Network.
