Sen. Robert Peters

Filed: 3/14/2025

1   AMENDMENT TO SENATE BILL 2258

2   AMENDMENT NO. _____. Amend Senate Bill 2258 on page 6,
3   line 20, by replacing "supplies thermal energy." with
4   "supplies non-combusting thermal energy. "Thermal energy
5   network" includes real estate, fixtures, and personal property
6   that is operated, owned, or used by multiple parties."; and

7   on page 8, lines 24 and 25, by replacing "be focused on
8   existing electric heat customers." with "include an industrial
9   heat application that may additionally include residential and
10   commercial applications. Priority shall be given to pilot
11   proposals that replace leak-prone natural gas distribution
12   infrastructure with distribution infrastructure that supplies
13   non-combusting thermal energy or that replaces thermal energy
14   for buildings currently heated with electric resistance
15   heat."; and

16   on page 10, immediately below line 7, by inserting the

1   following:

2   "(d-5) The Commission shall require projects submitted to

3   the utility-scale renewable thermal energy network program for

4   approval to include a proposed rate structure for thermal

5   energy services supplied to network end users and consumer

6   protection plans for end users. The Commission may approve the

7   proposed rate structure if the projected heating and cooling

8   costs for end users is not greater than the heating and cooling

9   costs the end users would have incurred if the end users had

10 not participated in the program."; and

11 on page 11, lines 10 through 12, by replacing "after the

12 completion of the construction of all thermal energy network

13 projects under this Section" with "after the effective date of

14 this amendatory Act of the 104th General Assembly"; and

15 on page 12, line 6, after "16-108.18.", by inserting "A gas

16 public utility, electric public utility, or combination public

17 utility developing a thermal energy network project that

18 includes an industrial heat application may recover rates

19 proportionally from each class of customer.".
