Section 20. The Illinois Insurance Code is amended by adding Section 356z.88 as follows:

(215 ILCS 5/356z.88 new)

Sec. 356z.88. Coverage for seizure detection devices.

(a) For the purposes of this Section, "seizure detection device" means a monitoring device cleared by the United States Food and Drug Administration, and any related technology, application, service, or subscription supporting the prescribed use of the device, that provides the following:

(1) individual monitoring and alert services relating to seizure activity;

(2) detection or prediction of seizure activity and transmission of notification of the seizure activity to the individual or a caregiver for appropriate medical response; or

(3) collection of data of the seizure activity of the individual that can be used by a health care provider to diagnose or appropriately treat a health care condition that causes the seizure activity.

(b) A group or individual plan of accident and health insurance or managed care plan amended, delivered, issued, or renewed on or after January 1, 2027 shall provide coverage for medically prescribed seizure detection devices.

(c) All seizure detection devices covered under this Section shall be approved for use by individuals, and the choice of device shall be made based upon the individual's circumstances and medical needs in consultation with the individual's medical provider.

(d) Any individual who has been prescribed a seizure detection device shall not be required to obtain prior authorization for coverage for a seizure detection device, and coverage shall be continuous once the seizure detection device is prescribed.

(e) A group or individual policy of accident and health insurance or a managed care plan that is amended, delivered, issued or renewed on or after January 1, 2027 shall not impose a deductible, coinsurance, copayment, or any other cost-sharing requirement on the coverage of a seizure detection device.
