3 Section 25. The Freedom from Drone Surveillance Act is
4 amended by changing Section 15 as follows:

5 (725 ILCS 167/15)

6 Sec. 15. Exceptions. This Act does not prohibit the use of
7 a drone by a law enforcement agency:

8 (1) To counter a high risk of a terrorist attack by a
9 specific individual or organization if the United States
10 Secretary of Homeland Security determines that credible
11 intelligence indicates that there is that risk.

12 (2) If a law enforcement agency first obtains a search
13 warrant based on probable cause issued under Section 108-3
14 of the Code of Criminal Procedure of 1963. The warrant
15 must be limited to a period of 45 days, renewable by the
16 judge upon a showing of good cause for subsequent periods
17 of 45 days.

18 (3) If a law enforcement agency possesses reasonable
19 suspicion that, under particular circumstances, swift
20 action is needed to prevent imminent harm to life, or to
21 forestall the imminent escape of a suspect or the
22 destruction of evidence. The use of a drone under this
23 paragraph (3) is limited to a period of 48 hours. Within 24
24 hours of the initiation of the use of a drone under this

1 paragraph (3), the chief executive officer of the law
2 enforcement agency or the chief executive officer's
3 designee must report in writing the use of a drone to the
4 local State's Attorney.

5 (4) If a law enforcement agency is not undertaking a
6 criminal investigation but is attempting to locate a
7 missing person, engaging in search and rescue operations,
8 or aiding a person who cannot otherwise be safely reached.

9 (5) If a law enforcement agency is using a drone
10 solely for crime scene and traffic crash scene
11 photography. Crime scene and traffic crash photography
12 must be conducted in a geographically confined and
13 time-limited manner to document specific occurrences. The
14 use of a drone under this paragraph (5) on private
15 property requires either a search warrant based on
16 probable cause under Section 108-3 of the Code of Criminal
17 Procedure of 1963 or lawful consent to search. The use of a
18 drone under this paragraph (5) on lands, highways,
19 roadways, or areas belonging to this State or political
20 subdivisions of this State does not require a search
21 warrant or consent to search. Any law enforcement agency
22 operating a drone under this paragraph (5) shall make
23 every reasonable attempt to only photograph the crime
24 scene or traffic crash scene and avoid other areas.

25 (6) If a law enforcement agency is using a drone
26 during a disaster or public health emergency, as defined

1 by Section 4 of the Illinois Emergency Management Agency
2 Act. The use of a drone under this paragraph (6) does not
3 require an official declaration of a disaster or public
4 health emergency prior to use. A law enforcement agency
5 may use a drone under this paragraph (6) to obtain
6 information necessary for the determination of whether or
7 not a disaster or public health emergency should be
8 declared, to monitor weather or emergency conditions, to
9 survey damage, or to otherwise coordinate response and
10 recovery efforts. The use of a drone under this paragraph
11 (6) is permissible during the disaster or public health
12 emergency and during subsequent response and recovery
13 efforts.

14 (7) To conduct an infrastructure inspection of a
15 designated building or structure at the express request of
16 a local government agency. Any law enforcement agency
17 operating a drone under this paragraph (7) shall make
18 every reasonable attempt to photograph only the building
19 or structure and to avoid other areas.

20 (8) To demonstrate the capabilities and functionality
21 of a police drone for public relations purposes, provided
22 that no information is collected or recorded by the drone
23 during such demonstration.

24 (9) In response to Public Safety Answering Point
25 (PSAP) dispatched calls for service, when the sole purpose
26 for using a drone is for one or more first responders to

1 locate victims, to assist with immediate victim health or
2 safety needs, or to coordinate the response of emergency
3 vehicles and personnel to an emergency. As used in this
4 paragraph (9), "Public Safety Answering Point" and "PSAP"
5 have the meaning given to those terms in Section 2 of the
6 Emergency Telephone System Act.

7 (10) If a law enforcement agency is using a drone at a
8 routed event or special event. The use of a drone under
9 this paragraph (10) requires that:

10 (A) notice is posted at the event location for at
11 least 24 hours before the event and clearly
12 communicates that drones may be used at the upcoming
13 event for the purpose of real-time monitoring of
14 participant safety;

15 (B) notice is posted, if practical, at major entry
16 points to the event clearly informing the attendees
17 that a drone may be used for the purpose of real-time
18 monitoring of participant safety; and

19 (C) the drone is flown in accordance with Federal
20 Aviation Administration safety regulations.

21 Under this paragraph (10), a law enforcement agency
22 may use the drone:

23 (i) in advance of an event, before event
24 participants have begun to assemble, for the sole
25 purpose of creating maps and determining appropriate
26 access routes, staging areas, and traffic routes,

1 provided that no personal identifying information is
2 recorded and provided further that no recorded
3 information is used in any criminal prosecution; or

4 (ii) during the event to proactively support
5 public safety personnel by monitoring the event
6 footprint in real time:

7 (I) to detect a breach of event space,
8 including a breach by an unauthorized vehicle, an
9 interruption of a parade route, or a breach of an
10 event barricade or fencing;

11 (II) to evaluate crowd size and density;

12 (III) to identify activity that could present
13 a public safety issue for the crowd as a whole,
14 including crowd movement;

15 (IV) to assist in the response of public
16 safety personnel to a real-time public safety
17 incident at the event; and

18 (V) to assess the traffic and pedestrian flow
19 around the event in real time.
