LRB104 19821 AAS 35052 a

1 AMENDMENT TO SENATE BILL 3830

2 AMENDMENT NO. _____. Amend Senate Bill 3830 by replacing
3 everything after the enacting clause with the following:

4 "Section 5. The Public Utilities Act is amended by adding
5 Section 8-508.5 as follows:

6 (220 ILCS 5/8-508.5 new)

7 Sec. 8-508.5. Load curtailment of load-serving entities.

8 (a) Any order for load curtailment from PJM
9 Interconnection, LLC (PJM) that is given to a load-serving
10 entity and that concerns the load-serving entity's provision
11 of service to a large load addition customer shall only apply
12 to that large load addition customer and no other customer of
13 the load-serving entity.

14 (b) Any obligation, financial or otherwise, that is
15 assigned to a load-serving entity due to PJM's backstop
16 procurement of new capacity or other comparable services shall

1 be passed through to new large load addition customers under
2 terms that are comparable to the terms under which PJM
3 assigned the obligation to the load-serving entity.

4 (c) Each large load addition customer that triggers a PJM
5 backstop procurement shall, as a condition of using service
6 provided by a public utility, provide appropriate financial
7 security to ensure that the public utility's existing
8 customers are held harmless for the entire contract term and
9 for the value of any backstop procurement obligation imposed
10 by PJM.

11 (d) Any new large load addition customer that applies to a
12 public utility for service shall submit information to PJM
13 that includes, but is not limited to, the following:

14 (1) the large load addition's expected load usage;

15 (2) the large load addition's expected peak load;

16 (3) the large load addition's capacity utilization;

17 (4) whether the large load addition is dependent on
18 another proposed project moving forward; and

19 (5) any other information requested by PJM.

20 (e) Nothing in this Section is intended: (1) to prevent or
21 hinder any action by a load-serving entity that is necessary
22 to maintain the load-serving entity's system reliability; or
23 (2) to prevent the load-serving entity from adopting
24 appropriate voluntary load curtailment programs."
