1 AN ACT concerning State government.

2 **Be it enacted by the People of the State of Illinois,**
3 **represented in the General Assembly:**

4 Section 5. The Mental Health and Developmental
5 Disabilities Administrative Act is amended by changing Section
6 53 as follows:

7 (20 ILCS 1705/53) (from Ch. 91 1/2, par. 100-53)

8 Sec. 53. The Department shall create a consistent case
9 coordination system for persons with a developmental
10 disability who receive services provided or funded by the
11 Department. The objectives of this system shall be to ensure
12 that a full range of an individual's needs is identified and
13 assessed through statewide use of an individual client
14 assessment tool; to ensure that each individual actually
15 receives, in the most effective and efficient combination and
16 sequence, the full range and continuum of services needed; to
17 ensure that all available resources are applied appropriately
18 to each individual served; and to provide a systematic
19 procedure for serving individuals which generates among and
20 within the local service delivery agencies information
21 required for effective system management.

22 Specific to the individual client assessment tool, each
23 individual living in a community integrated living arrangement

1 shall receive an annual client assessment. The annual client
2 assessment shall be completed using the Health Risk Screening
3 Tool. Beginning January 1, 2019, each individual shall receive
4 his or her annual client assessment via the web-based Health
5 Risk Screening Tool. The Health Risk Screening Tool shall
6 replace the current paper-based version of the assessment. The
7 Department shall make changes to the Illinois Administrative
8 Code to correspond with this online version of the Health Risk
9 Screening Tool.

10 "Case coordination" means a mechanism for linking and
11 coordinating segments of the service delivery system to ensure
12 the most comprehensive program for meeting an individual
13 client's needs. It facilitates client movement through an array
14 of services so that at any given time, services received are
15 matched to the needs of the individual.
