LRB100 18949 RLC 39665 a

1 AMENDMENT TO HOUSE BILL 5463

2 AMENDMENT NO. _____. Amend House Bill 5463 by replacing
3 everything after the enacting clause with the following:

4 "Section 5. The Mental Health and Developmental
5 Disabilities Administrative Act is amended by changing Section
6 53 as follows:

7 (20 ILCS 1705/53) (from Ch. 91 1/2, par. 100-53)

8 Sec. 53. The Department shall create a consistent case
9 coordination system for persons with a developmental
10 disability who receive services provided or funded by the
11 Department. The objectives of this system shall be to ensure
12 that a full range of an individual's needs is identified and
13 assessed through statewide use of an individual client
14 assessment tool; to ensure that each individual actually
15 receives, in the most effective and efficient combination and
16 sequence, the full range and continuum of services needed; to

1 ensure that all available resources are applied appropriately
2 to each individual served; and to provide a systematic
3 procedure for serving individuals which generates among and
4 within the local service delivery agencies information
5 required for effective system management.

6 Each individual residing in a community integrated living
7 arrangement shall receive an annual assessment to screen that
8 individual for any health issues or risks. Beginning July 1,
9 2019, each individual shall receive his or her annual client
10 assessment via a web-based, electronic screening tool. The
11 electronic screening tool shall replace the current
12 paper-based assessment. A provider may make a request, along
13 with justifications, to the Department to complete the
14 assessment on paper. Subject to appropriation, the Department
15 may contract with a third-party entity to create and implement
16 the web-based, electronic screening tool. The Department shall
17 make changes to its rules in the Illinois Administrative Code
18 to incorporate a web-based, electronic assessment tool.

19 "Case coordination" means a mechanism for linking and
20 coordinating segments of the service delivery system to ensure
21 the most comprehensive program for meeting an individual
22 client's needs. It facilitates client movement through an array
23 of services so that at any given time, services received are
24 matched to the needs of the individual.
