

**SB2250**

**94TH GENERAL ASSEMBLY**

**State of Illinois**

**2005 and 2006**

**SB2250**

Introduced 1/11/2006, by Sen. Edward D. Maloney

**SYNOPSIS AS INTRODUCED:**

55 ILCS 5/5-1062.1

from Ch. 34, par. 5-1062.1

Amends the Counties Code. Changes the list of groups that are responsible for the coordination of watershed planning councils to include the Southwest Conference of Mayors. Effective immediately.

LRB094 16748 HLH 52019 b

**A BILL FOR**

1 AN ACT concerning local government.

2 **Be it enacted by the People of the State of Illinois,**  
3 **represented in the General Assembly:**

4 Section 5. The Counties Code is amended by changing Section  
5 5-1062.1 as follows:

6 (55 ILCS 5/5-1062.1) (from Ch. 34, par. 5-1062.1)

7 Sec. 5-1062.1. Stormwater management planning councils in  
8 Cook County.

9 (a) Stormwater management in Cook County shall be conducted  
10 as provided in Section 7h of the Metropolitan Water Reclamation  
11 District Act. As used in this Section, "District" means the  
12 Metropolitan Water Reclamation District of Greater Chicago.

13 The purpose of this Section is to create planning councils,  
14 organized by watershed, to contribute to the stormwater  
15 management process by advising the Metropolitan Water  
16 Reclamation District of Greater Chicago and representing the  
17 needs and interests of the members of the public and the local  
18 governments included within their respective watersheds.

19 (b) Stormwater management planning councils shall be  
20 formed for each of the following established watersheds of the  
21 Chicago Metropolitan Area: North Branch Chicago River, Lower  
22 Des Plaines Tributaries, Cal-Sag Channel, Little Calumet  
23 River, Poplar Creek, and Upper Salt Creek. In addition a  
24 stormwater management planning council shall be established  
25 for the combined sewer areas of Cook County. Additional  
26 stormwater management planning councils may be formed by the  
27 District for other watersheds within Cook County. Membership on  
28 the watershed councils shall consist of the chief elected  
29 official, or his or her designee, from each municipality and  
30 township within the watershed and the Cook County Board  
31 President, or his or her designee, if unincorporated area is  
32 included in the watershed. A municipality or township shall be

1 a member of more than one watershed council if the corporate  
2 boundaries of that municipality or township extend into more  
3 than one watershed, or if the municipality or township is  
4 served in part by separate sewers and combined sewers.  
5 Subcommittees of the stormwater management planning councils  
6 may be established to assist the stormwater management planning  
7 councils in performing their duties. The councils may adopt  
8 bylaws to govern the functioning of the stormwater management  
9 councils and subcommittees.

10 (c) The principal duties of the watershed planning councils  
11 shall be to advise the District on the development and  
12 implementation of the countywide stormwater management plan  
13 with respect to matters relating to their respective watersheds  
14 and to advise and represent the concerns of the units of local  
15 government in the watershed area. The councils shall meet at  
16 least quarterly and shall hold at least one public hearing  
17 during the preparation of the plan.

18 (d) The District shall give careful consideration to the  
19 recommendations and concerns of the watershed planning  
20 councils throughout the planning process and shall coordinate  
21 the 6 watershed plans as developed and to coordinate the  
22 planning process with the adjoining counties to ensure that  
23 recommended stormwater projects will have no significant  
24 adverse impact on the levels or flows of stormwater in the  
25 inter-county watershed or on the capacity of existing and  
26 planned stormwater retention facilities. The District shall  
27 include cost benefit analysis in its deliberations and in  
28 evaluating priorities for projects from watershed to  
29 watershed. The District shall identify in an annual published  
30 report steps taken by the District to accommodate the concerns  
31 and recommendations of the watershed planning councils.

32 (e) The stormwater management planning councils may  
33 recommend rules and regulations to the District governing the  
34 location, width, course, and release rates of all stormwater  
35 runoff channels, streams, and basins in their respective  
36 watersheds.

1           (f) The Northwest Municipal Conference, the South Suburban  
2           Mayors and Managers Association, the Southwest Conference of  
3           Mayors, and the West Central Municipal Conference shall be  
4           responsible for the coordination of the planning councils  
5           created under this Section.

6           (Source: P.A. 93-1049, eff. 11-17-04.)

7           Section 99. Effective date. This Act takes effect upon  
8           becoming law.
