1 AN ACT concerning regulation.

## Be it enacted by the People of the State of Illinois, represented in the General Assembly:

- Section 5. The Public Utilities Act is amended by changing Section 8-403.1 as follows:
- 6 (220 ILCS 5/8-403.1) (from Ch. 111 2/3, par. 8-403.1)
- Sec. 8-403.1. Electricity purchased from qualified solid waste energy facility; tax credit; distributions for economic development.
- 10 (a) It is hereby declared to be the policy of this State to
  11 encourage the development of alternate energy production
  12 facilities in order to conserve our energy resources and to
  13 provide for their most efficient use.
  - (b) For the purpose of this Section and Section 9-215.1, "qualified solid waste energy facility" means a facility determined by the Illinois Commerce Commission to qualify as such under the Local Solid Waste Disposal Act, to use methane gas generated from landfills as its primary fuel, and to possess characteristics that would enable it to qualify as a cogeneration or small power production facility under federal law.
- (c) In furtherance of the policy declared in this Section, the Illinois Commerce Commission shall require electric

utilities to enter into long-term contracts to purchase electricity from qualified solid waste energy facilities located in the electric utility's service area, for a period beginning on the date that the facility begins generating electricity and having a duration of not less than 10 years in the case of facilities fueled by landfill-generated methane, or 20 years in the case of facilities fueled by methane generated from a landfill owned by a forest preserve district. The purchase rate contained in such contracts shall be equal to the average amount per kilowatt-hour paid from time to time by the unit or units of local government in which the electricity generating facilities are located, excluding amounts paid for street lighting and pumping service. If the unit or units of local government in which a qualified solid waste energy facility is located purchases all or a portion of its electricity from a supplier other than the electric utility that purchases electricity generated by the qualified solid waste energy facility, then the calculation of the purchase rate paid by the electric utility to the qualified solid waste energy facility under this Section shall be based on the amounts that the unit or units of local government would have paid to the electric utility if the unit or units of local government purchased all of its electricity from the electric utility.

(d) Whenever a public utility is required to purchase electricity pursuant to subsection (c) above, it shall be

entitled to credits in respect of its obligations to remit to 1 2 the State taxes it has collected under the Electricity Excise Tax Law equal to the amounts, if any, by which payments for 3 such electricity exceed (i) the then current rate at which the 5 utility must purchase the output of qualified facilities pursuant to the federal Public Utility Regulatory Policies Act 6 7 of 1978, less (ii) any costs, expenses, losses, damages or 8 other amounts incurred by the utility, or for which it becomes 9 liable, arising out of its failure to obtain such electricity 10 from such other sources. The amount of any such credit shall, 11 in the first instance, be determined by the utility, which 12 shall make a monthly report of such credits to the Illinois 13 Commerce Commission and, on its monthly tax return, to the 14 Illinois Department of Revenue. Under no circumstances shall a 15 utility be required to purchase electricity from a qualified 16 solid waste energy facility at the rate prescribed in 17 subsection (c) of this Section if such purchase would result in estimated tax credits that exceed, on a monthly basis, the 18 19 utility's estimated obligation to remit to the State taxes it 20 has collected under the Electricity Excise Tax Law. The owner 21 or operator shall negotiate facility operating conditions with 22 the purchasing utility in accordance with that utility's posted 23 standard terms and conditions for small power producers. If the 24 Department of Revenue disputes the amount of any such credit, such dispute shall be decided by the Illinois 25 26 Commission. Whenever a qualified solid waste energy facility

has paid or otherwise satisfied in full the capital costs or indebtedness incurred in developing and implementing the qualified solid waste energy facility, whenever the qualified solid waste energy facility ceases to operate and produce electricity from methane gas generated from landfills, or at the end of the contract entered into pursuant to subsection (c) of this Section, whichever occurs first, the qualified solid waste energy facility shall reimburse the Public Utility Fund and the General Revenue Fund in the State treasury for the actual reduction in payments to those Funds caused by this subsection (d) in a manner to be determined by the Illinois Commerce Commission and based on the manner in which revenues for those Funds were reduced. The payments shall be made to the Illinois Commerce Commission, which shall determine appropriate disbursements to the Public Utility Fund and the General Revenue Fund based on this subsection (d).

- (e) The Illinois Commerce Commission shall not require an electric utility to purchase electricity from any qualified solid waste energy facility which is owned or operated by an entity that is primarily engaged in the business of producing or selling electricity, gas, or useful thermal energy from a source other than one or more qualified solid waste energy facilities.
- (e-5) A qualified solid waste energy facility may receive the purchase rate provided in subsection (c) of this Section only for kilowatt-hours generated by the use of methane gas

generated from landfills. The purchase rate provided in 1 2 subsection (c) of this Section does not apply to electricity generated by the use of a fuel that is not methane gas 3 generated from landfills. If the Illinois Commerce Commission 5 determines that a qualified solid waste energy facility has 6 violated the requirement regarding the use of methane gas 7 generated from a landfill as set forth in this subsection 8 (e-5), then the Commission shall issue an order requiring that 9 the qualified solid waste energy facility repay the State for 10 all dollar amounts of electricity sales that are determined by 11 the Commission to be the result of the violation. As part of 12 that order, the Commission shall have the authority to revoke 13 the facility's approval to act as a qualified solid waste 14 energy facility granted by the Commission under this Section. 15 If the amount owed by the qualified solid waste energy facility 16 is not received by the Commission within 90 days after the date 17 of the Commission's order that requires repayment, then the Commission shall issue an order that revokes the facility's 18 19 approval to act as a qualified solid waste energy facility granted by the Commission under this Section. The Commission's 20 21 action that vacates prior qualified solid waste energy facility 22 approval does not excuse the repayment to the State treasury 23 required by subsection (d) of this Section for utility tax credits accumulated up to the time of the Commission's action. 24 25 A qualified solid waste energy facility must receive Commission 26 approval before it may use any fuel in addition to methane gas

- generated from a landfill in order to generate electricity. If a qualified solid waste energy facility petitions the Commission to use any fuel in addition to methane gas generated from a landfill to generate electricity, then the Commission shall have the authority to do the following:
  - (1) establish the methodology for determining the amount of electricity that is generated by the use of methane gas generated from a landfill and the amount that is generated by the use of other fuel;
  - (2) determine all reporting requirements for the qualified solid waste energy facility that are necessary for the Commission to determine the amount of electricity that is generated by the use of methane gas from a landfill and the amount that is generated by the use of other fuel and the resulting payments to the qualified solid waste energy facility; and
  - (3) require that the qualified solid waste energy facility, at the qualified solid waste energy facility's expense, install metering equipment that the Commission determines is necessary to enforce compliance with this subsection (e-5).

A public utility that is required to enter into a long-term purchase contract with a qualified solid waste energy facility has no duty to determine whether the electricity being purchased was generated by the use of methane gas generated from a landfill or was generated by the use of some other fuel

- in violation of the requirements of this subsection (e-5).
  - (f) This Section does not require an electric utility to construct additional facilities unless those facilities are paid for by the owner or operator of the affected qualified solid waste energy facility.
    - (g) The Illinois Commerce Commission shall require that:

      (1) electric utilities use the electricity purchased from a qualified solid waste energy facility to displace electricity generated from nuclear power or coal mined and purchased outside the boundaries of the State of Illinois before displacing electricity generated from coal mined and purchased within the State of Illinois, to the extent possible, and (2) electric utilities report annually to the Commission on the extent of such displacements.
    - (h) Nothing in this Section is intended to cause an electric utility that is required to purchase power hereunder to incur any economic loss as a result of its purchase. All amounts paid for power which a utility is required to purchase pursuant to subparagraph (c) shall be deemed to be costs prudently incurred for purposes of computing charges under rates authorized by Section 9-220 of this Act. Tax credits provided for herein shall be reflected in charges made pursuant to rates so authorized to the extent such credits are based upon a cost which is also reflected in such charges.
    - (i) Beginning in February 1999 and through January 2009, each qualified solid waste energy facility that sells

electricity to an electric utility at the purchase rate described in subsection (c) shall file with the Department of Revenue on or before the 15th of each month a form, prescribed by the Department of Revenue, that states the number of kilowatt hours of electricity for which payment was received at that purchase rate from electric utilities in Illinois during the immediately preceding month. This form shall be accompanied by a payment from the qualified solid waste energy facility in an amount equal to six-tenths of a mill (\$0.0006) per kilowatt hour of electricity stated on the form. Beginning on the effective date of this amendatory Act of the 92nd General Assembly, a qualified solid waste energy facility must file the form required under this subsection (i) before the 15th of each month regardless of whether the facility received any payment in the previous month. Payments received by the Department of Revenue shall be deposited into the Municipal Economic Development Fund, a trust fund created outside the State treasury. The State Treasurer may invest the moneys in the Fund in any investment authorized by the Public Funds Investment Act, and investment income shall be deposited into and become part of the Fund. Moneys in the Fund shall be used by the State Treasurer as provided in subsection (j).

Beginning on July 1, 2006 through January 31, 2009, each month the State Treasurer shall certify the following to the State Comptroller:

(A) the amount received by the Department of Revenue

under this subsection (i) during the immediately preceding month; and

(B) the amount received by the Department of Revenue under this subsection (i) in the corresponding month in calendar year 2002.

As soon as practicable after receiving the certification from the State Treasurer, the State Comptroller shall transfer from the General Revenue Fund to the Municipal Economic Development Fund in the State treasury an amount equal to the amount by which the amount calculated under item (B) of this paragraph exceeds the amount calculated under item (A) of this paragraph, if any.

The obligation of a qualified solid waste energy facility to make payments into the Municipal Economic Development Fund shall terminate upon either: (1) expiration or termination of a facility's contract to sell electricity to an electric utility at the purchase rate described in subsection (c); or (2) entry of an enforceable, final, and non-appealable order by a court of competent jurisdiction that Public Act 89-448 is invalid. Payments by a qualified solid waste energy facility into the Municipal Economic Development Fund do not relieve the qualified solid waste energy facility of its obligation to reimburse the Public Utility Fund and the General Revenue Fund for the actual reduction in payments to those Funds as a result of credits received by electric utilities under subsection (d).

A qualified solid waste energy facility that fails to

1 timely file the requisite form and payment as required by this

subsection (i) shall be subject to penalties and interest in

conformance with the provisions of the Illinois Uniform Penalty

and Interest Act.

Every qualified solid waste energy facility subject to the provisions of this subsection (i) shall keep and maintain records and books of its sales pursuant to subsection (c), including payments received from those sales and the corresponding tax payments made in accordance with this subsection (i), and for purposes of enforcement of this subsection (i) all such books and records shall be subject to inspection by the Department of Revenue or its duly authorized agents or employees.

When a qualified solid waste energy facility fails to file the form or make the payment required under this subsection (i), the Department of Revenue, to the extent that it is practical, may enforce the payment obligation in a manner consistent with Section 5 of the Retailers' Occupation Tax Act, and if necessary may impose and enforce a tax lien in a manner consistent with Sections 5a, 5b, 5c, 5d, 5e, 5f, 5g, and 5i of the Retailers' Occupation Tax Act. No tax lien may be imposed or enforced, however, unless a qualified solid waste energy facility fails to make the payment required under this subsection (i). Only to the extent necessary and for the purpose of enforcing this subsection (i), the Department of Revenue may secure necessary information from a qualified solid

waste energy facility in a manner consistent with Section 10 of the Retailers' Occupation Tax Act.

All information received by the Department of Revenue in its administration and enforcement of this subsection (i) shall be confidential in a manner consistent with Section 11 of the Retailers' Occupation Tax Act. The Department of Revenue may adopt rules to implement the provisions of this subsection (i).

For purposes of implementing the maximum aggregate distribution provisions in subsections (j) and (k), when a qualified solid waste energy facility makes a late payment to the Department of Revenue for deposit into the Municipal Economic Development Fund, that payment and deposit shall be attributed to the month and corresponding quarter in which the payment should have been made, and the Treasurer shall make retroactive distributions or refunds, as the case may be, whenever such late payments so require.

(j) The State Treasurer, without appropriation, must make distributions immediately after January 15, April 15, July 15, and October 15 of each year, up to maximum aggregate distributions of \$500,000 for the distributions made in the 4 quarters beginning with the April distribution and ending with the January distribution, from the Municipal Economic Development Fund to each city, village, or incorporated town that has within its boundaries an incinerator that: (1) uses or, on the effective date of Public Act 90-813, used municipal waste as its primary fuel to generate electricity; (2) was

determined by the Illinois Commerce Commission to qualify as a 1 2 qualified solid waste energy facility prior to the effective date of Public Act 89-448; and (3) commenced operation prior to 3 January 1, 1998. Total distributions in the aggregate to all 5 qualified cities, villages, and incorporated towns in the 4 quarters beginning with the April distribution and ending with 6 7 the January distribution shall not exceed \$500,000. The amount of each distribution shall be determined pro rata based on the 8 9 population of the city, village, or incorporated town compared 10 the total population of all cities, villages, 11 incorporated towns eligible to receive a distribution. 12 Distributions received by a city, village, or incorporated town must be held in a separate account and may be used only to 13 14 promote and enhance industrial, commercial, residential, 15 service, transportation, and recreational activities 16 facilities within its boundaries, thereby enhancing the 17 employment opportunities, public health and general welfare, and economic development within the community, including 18 19 administrative expenditures exclusively to further these 20 activities. These funds, however, shall not be used by the city, village, or incorporated town, directly or indirectly, to 21 22 purchase, lease, operate, or in any way subsidize the operation 23 of any incinerator, and these funds shall not be paid, directly or indirectly, by the city, village, or incorporated town to 24 25 the owner, operator, lessee, shareholder, or bondholder of any incinerator. Moreover, these funds shall not be used to pay 26

- attorneys fees in any litigation relating to the validity of Public Act 89-448. Nothing in this Section prevents a city, village, or incorporated town from using other corporate funds for any legitimate purpose. For purposes of this subsection, the term "municipal waste" has the meaning ascribed to it in Section 3.290 of the Environmental Protection Act.
  - (k) If maximum aggregate distributions of \$500,000 under subsection (j) have been made after the January distribution from the Municipal Economic Development Fund, then the balance in the Fund shall be refunded to the qualified solid waste energy facilities that made payments that were deposited into the Fund during the previous 12-month period. The refunds shall be prorated based upon the facility's payments in relation to total payments for that 12-month period.
  - (1) Beginning January 1, 2000, and each January 1 thereafter, each city, village, or incorporated town that received distributions from the Municipal Economic Development Fund, continued to hold any of those distributions, or made expenditures from those distributions during the immediately preceding year shall submit to a financial and compliance and program audit of those distributions performed by the Auditor General at no cost to the city, village, or incorporated town that received the distributions. The audit should be completed by June 30 or as soon thereafter as possible. The audit shall be submitted to the State Treasurer and those officers enumerated in Section 3-14 of the Illinois State Auditing Act.

If the Auditor General finds that distributions have been expended in violation of this Section, the Auditor General shall refer the matter to the Attorney General. The Attorney General may recover, in a civil action, 3 times the amount of any distributions illegally expended. For purposes of this subsection, the terms "financial audit," "compliance audit", and "program audit" have the meanings ascribed to them in Sections 1-13 and 1-15 of the Illinois State Auditing Act.

(m) On and after the effective date of this amendatory Act of the 94th General Assembly, beginning on the first date on which renewable energy certificates or other saleable representations are sold by a qualified solid waste energy facility, with or without the electricity generated by the facility, and utilized by an electric utility or another electric supplier to comply with a renewable energy portfolio standard mandated by Illinois law or mandated by order of the Illinois Commerce Commission, that qualified solid waste energy facility may not sell electricity pursuant to this Section and shall be exempt from the requirements of subsections (a) through (1) of this Section, except that it shall remain obligated for any reimbursements required under subsection (d) of this Section. All of the provisions of this Section shall remain in full force and effect with respect to any qualified solid waste energy facility that sold electric energy pursuant to this Section at any time before July 1, 2006 and that does not sell renewable energy certificates or other

- saleable representations to meet the requirements of a renewable energy portfolio standard mandated by Illinois law or mandated by order of the Illinois Commerce Commission.
- (n) Notwithstanding any other provision of law to the 5 contrary, beginning on July 1, 2006, the Illinois Commerce Commission shall not issue any order determining that a 6 7 facility is a qualified solid waste energy facility unless the 8 qualified solid waste energy facility was determined by the 9 Illinois Commerce Commission to be a qualified solid waste 10 energy facility before July 1, 2006. As a guide to the intent, 11 interpretation, and application of this amendatory Act of the 12 94th General Assembly, it is hereby declared to be the policy 13 of this State to honor each qualified solid waste energy facility contract in existence on the effective date of this 14 15 amendatory Act of the 94th General Assembly if the qualified 16 solid waste energy facility continues to meet the requirements 17 of this Section for the duration of its respective contract 18 term.
- 19 (Source: P.A. 94-836, eff. 6-6-06.)
- 20 Section 99. Effective date. This Act takes effect upon 21 becoming law.
