6 (d) "General license" means a license, pursuant to 7 regulations promulgated by the Agency, effective without the 8 filing of an application to transfer, acquire, own, possess or 9 use quantities of, or devices or equipment utilizing, 10 radioactive material, including but not limited to by-product, 11 source or special nuclear materials.

12 (d-1) "Identical in substance" means the regulations 13 promulgated by the Agency would require the same actions with respect to ionizing radiation, for the same group of affected 14 persons, as would federal laws, regulations, or orders if any 15 federal agency, including but not limited to the Nuclear 16 17 Regulatory Commission, Food and Drug Administration, or Environmental Protection Agency, administered the subject 18 19 program in Illinois.

(f) "Radiation" or "ionizing radiation" means gamma rays 14 15 and x-rays, alpha and beta particles, high speed electrons, 16 neutrons, protons, and other nuclear particles or 17 electromagnetic radiations capable of producing ions directly or indirectly in their passage through matter; but does not 18 19 include sound or radio waves or visible, infrared, or 20 ultraviolet light.

21 (f-5) "Radiation emergency" means the uncontrolled release 22 of radioactive material from a radiation installation which 23 poses a potential threat to the public health, welfare, and 24 safety.

25 (g) "Radiation installation" is any location or facility 26 where radiation machines are used or where radioactive material SB1479 Engrossed - 4 - LRB095 04088 CMK 24126 b

6 gaseous substance which emits radiation spontaneously.

7 (j) "Radiation source" or "source of ionizing radiation" 8 means a radiation machine or radioactive material as defined 9 herein.

(k) "Source material" means (1) uranium, thorium, or any 10 11 other material which the Agency declares by order to be source 12 material after the United States Nuclear Regulatory 13 Commission, or any successor thereto, has determined the 14 material to be such; or (2) ores containing one or more of the 15 foregoing materials, in such concentration as the Agency 16 declares by order to be source material after the United States 17 Nuclear Regulatory Commission, or any successor thereto, has determined the material in such concentration to be source 18 19 material.

20 "Special nuclear material" means (1) (1) plutonium, uranium 233, uranium enriched in the isotope 233 or in the 21 22 isotope 235, and any other material which the Agency declares 23 by order to be special nuclear material after the United States 24 Nuclear Regulatory Commission, or any successor thereto, has 25 determined the material to be such, but does not include source 26 material; or (2) any material artificially enriched by any of SB1479 Engrossed - 5 - LRB095 04088 CMK 24126 b
