LRB096 11169 DRJ 26473 a

1 AMENDMENT TO SENATE BILL 2043

2 AMENDMENT NO. \_\_\_\_\_. Amend Senate Bill 2043 by replacing  
3 lines 10 through 26 on page 4 and lines 1 through 18 on page 5  
4 with the following:

5 "(c) The Department of Healthcare and Family Services  
6 (HFS), the Illinois Department of Public Health, the Illinois  
7 Department of Human Services, and the Division of Specialized  
8 Care for Children, University of Illinois at Chicago, with  
9 necessary support from the Department of Central Management  
10 Services, shall integrate into the medical data warehouse  
11 individual record level data owned by one of these agencies  
12 that pertains to maternal and child health, including the  
13 following data sets:

14 (1) Vital Records as they relate to births, birth  
15 outcomes, and deaths.

16 (2) Adverse Pregnancy Outcomes Reporting System  
17 (APORS).

18 (3) Genetics/Newborn Screenings/SIDS.

1           (4) Cornerstone (WIC, FCM, Teen Parents,  
2           Immunization).

3           (5) HFS medical claims data.

4           (6) I-CARE.

5           (7) Children with Special Healthcare Needs Data.

6           By September 1, 2009, the departments of Healthcare and  
7           Family Services, Public Health, and Human Services and the  
8           Division of Specialized Care for Children shall jointly prepare  
9           a work plan for fully integrating these data sets into the  
10           medical data warehouse. The work plan shall provide an overall  
11           project design, including defining a mutually acceptable  
12           transfer format for each discrete data set, the data update  
13           frequency, and a single method of data transfer for each data  
14           set. By October 1, 2009, the Department of Public Health shall  
15           grant to the Department of Healthcare and Family Services  
16           complete access to all vital records data. The Department of  
17           Public Health shall prepare a report detailing that this task  
18           has been accomplished and submit this report to the Commission  
19           on Government Forecasting and Accountability by October 15,  
20           2009. By March 1, 2010, the data sets shall be completely  
21           loaded into the medical data warehouse. By July 1, 2010, data  
22           from the various sources shall be processed so as to be  
23           compatible with other data in the medical data warehouse and  
24           available for analysis in an integrated manner.

25           With the cooperation of the other agencies, HFS shall  
26           submit status reports on the progress of these efforts to the

1 Governor and the General Assembly no later than October 1, 2009  
2 and April 1, 2010, with a final report due no later than  
3 November 1, 2010.

4 On an ongoing basis, the 4 agencies shall review the  
5 feasibility of adding data from additional sources to the  
6 warehouse. Such review may take into account the cost  
7 effectiveness of adding the data, the utility of adding data  
8 that is not available as identifiable individual record level  
9 data, the requirements related to adding data owned by another  
10 entity or not available in electronic form, whether sharing of  
11 the data is otherwise prohibited by law and the resources  
12 required and available for effecting the addition.

13 The departments shall use analysis of the data in the  
14 medical data warehouse to improve maternal and child health  
15 outcomes, and in particular improve birth outcomes, and to  
16 reduce racial health disparities in this area.

17 All access and use of the data shall be in compliance with  
18 all applicable federal and State laws, regulations, and  
19 mandates.

20 Notwithstanding anything in this Section, data  
21 incorporated into the data warehouse shall remain subject to  
22 the same provisions of law regarding confidentiality and use  
23 restrictions as they are subject to in the control of the  
24 contributing agency. The Department of Healthcare and Family  
25 Services shall develop measures to ensure that the interplay of  
26 the several data sets contributed to the data warehouse does

1 not lead to the use or release of data from the data warehouse  
2 that would not otherwise be subject to use or release under  
3 State or federal law."
