

WRITTEN STATEMENT FOR 2/11/21 12:00 PM SENATE HEALTH HEARING ON COVID-19 VACCINATIONS

Statement by Dina Wisniewski:

During my research, I have come across a few concerning pieces of information that I am compelled to share in this statement today.

My first concern is that the COVID Vaccine is only administered to those who give Voluntary Consent. This seems it should go without saying; however, the fact that The Nuremberg Code, a set of ethical principles for human experimentation, even exists, leads me to believe it is best to state the obvious. The first principle in The Nuremberg Code is, "The voluntary consent of the human subject is absolutely essential." Voluntary Consent means "the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, over-reaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved, as to enable him to make an understanding and enlightened decision..." My next concern is that the COVID "Vaccine" is not a vaccine, but rather an experimental medical device being rolled out under the guise of a "vaccine." On January 5 2021, Dr David Martin explains in a video what is partially transcribed below:

"Let's make sure we are clear, this is not a vaccine...Vaccines actually are a legally defined term under public health law; they are a legally defined term under CDC and FDA standards. And the vaccine specifically has to stimulate both the immunity within the person receiving it and it also has to disrupt transmission. And that is not what this is. They have been abundantly clear in saying that the mRNA strand that is going into the cell is not to stop the transmission, it is a treatment...If we said we are going to give people prophylactic chemotherapy for the cancer they don't yet have, we'd be laughed out of the room because it's a stupid idea. That's exactly what this is....It is a medical device, not a drug because it meets the CDRH definition of a device. It is not a living system, it is not a biologic system, it is a physical technology - it happens to just come in the size of a molecular package."

I have yet to be able to disprove Dr. David Martin's information that this is not a vaccine, which brings me to my final concerns.

- If the "COVID Vaccine" isn't a vaccine and is instead a medical device, then why does ACIP, Advisory Committee on Immunization Practices, decide if it is approved for Emergency Use?
- If the "COVID Vaccine" isn't a vaccine and is instead a medical device, then it seems everyone who gets it is a part of an experiment.
- If the "COVID Vaccine" isn't a vaccine and is instead a medical device, and everyone who gets it is involuntarily a part of an experiment then it seems the first principle in The Nuremberg Code is being violated at a global level.

I implore you to make sure people are informed of the facts and that we all maintain our individual rights to Voluntary Consent.

Thank you.
