Subject: New district map proposal.
Date: Monday, October 25, 2021 11:06:01 AM

Dear sir or madam,

The proposed new district map is of great concern to me.

I can't understand how a party that is currently pushing the idea of ending gerrymandering at the national level can demonstrated exactly the reason it should be abolished at the state level.

One would hope that leading from the front would be a far more productive and intelligent way forward.

Hearts and minds will not be won with this kind of blatant political hackery.

Fact is, the process of drawing district lines is broken and could be fixed by a group of computer programmers with a set of rules to go by in under a day.

Make the process fair and logical and then be done with it. Force the representation in Illinois to win elections with good ideas instead of just being in the right party for whatever district they represent.

And while your at it, throw in term limits.

For God's sake, someone lead from the front, please. To watch our current political system is nauseating.

Casey Scranton
Alderman – Ward 1 – City of Mt. Sterling, IL
Owner - Scranton Heating and Cooling
