Importance: High

Good afternoon. I believe that all politicians should be removed from the map making process. The proposed map is a huge Gerrymandered aimed at protecting politicians and power.

I believe the U of I political science dept can develop a better, more fair, nonpartisan Congressional Map. I have seen what they have created and the maps better represent people. The maps do not represent political power interests, but the interests of people.

Example, why is there a 2 block wide striping Peru Illinois toed into the same district as Hyed park/science museum, the 2nd Congressional. This is obviously gerrymandering. Same goes for the little sliver from St. Louis to Champaign.

I have seen the national democratic party campaign against gerrymandering. I guess that's only if Republicans created the map. I dare you to try the non partisan maps, that is if you are about the people and transparency. I doubt you are. This is why the people are fed up with Illinois government.

Do what is it even if it costs you your elected seat.

Blessings
